Basket Weavers for the California Curio Trade Marvin Cohodas,2019-12-03 The peoples of northwestern California's Lower Klamath River area have long been known for their fine basketry. Two early-twentieth-century weavers of that region, Elizabeth Hickox and her daughter Louise, created especially distinctive baskets that are celebrated today for their elaboration of technique, form, and surface designs. Marvin Cohodas now explores the various forces that influenced Elizabeth Hickox, analyzing her relationship with the curio trade, and specifically with dealer Grace Nicholson, to show how those associations affected the development and marketing of baskets. He explains the techniques and patterns that Hickox created to meet the challenge of weaving design into changing three-dimensional forms. In addition to explicating the Hickoxes' basketry, Cohodas interprets its uniqueness as a form of intersocietal art, showing how Elizabeth first designed her distinctive trinket basket to convey a particular view of the curio trade and its effect on status within her community. Through its close examination of these superb practitioners of basketry, *Basket Weavers for the California Curio Trade* addresses many of today's most pressing questions in Native American art studies concerning individuality, patronage, and issues of authenticity. Graced with historic photographs and full-color plates, it reveals the challenges faced by early-twentieth-century Native weavers. Published with the assistance of The Southwest Museum, Los Angeles.

African Mathematics Abdul Karim Bangura,2012 This is the first comprehensive text on African Mathematics that can be used to address some of the problematic issues in this area. These issues include attitudes, curriculum development, educational change, academic achievement, standardized and other tests, performance factors, student characteristics, cross-cultural differences and studies, literacy, native speakers, social class and differences, equal education, teaching methods, knowledge level, educational guidelines and policies, transitional schools, comparative education, other subjects

such as physics and social studies, surveys, talent, educational research, teacher education and qualifications, academic standards, teacher effectiveness, lesson plans and modules, teacher characteristics, instructional materials, program effectiveness, program evaluation, African culture, African history, Black studies, class activities, educational games, number systems, cognitive ability, foreign influence, and fundamental concepts. What unifies the chapters in this book can appear rather banal, but many mathematical insights are so obvious and so fundamental that they are difficult to absorb, appreciate, and express with fresh clarity. Some of the more basic insights are isolated by accounts of investigators who have earned their contemporaries' respect. Winner of the 2012 Cecil B. Currey Book Award.

A Companion to the Flavian Age of Imperial Rome Andrew Zissos, 2016-01-11 *A Companion to the Flavian Age of Imperial Rome* provides a systematic and comprehensive examination of the political, economic, social, and cultural nuances of the Flavian Age (69–96 CE). Includes contributions from over two dozen Classical Studies scholars organized into six thematic sections Illustrates how economic, social, and cultural forces interacted to create a variety of social worlds within a composite Roman empire Concludes with a series of appendices that provide detailed chronological and demographic information and an extensive glossary of terms Examines the Flavian Age more broadly and inclusively than ever before incorporating coverage of often neglected groups, such as women and non-Romans within the Empire

The Pagan Dream of the Renaissance Joscelyn Godwin, 2005-02-10 *The Pagan Dream of the Renaissance* recounts the almost untold story of how the rediscovery of the pagan, mythological imagination during the Renaissance brought a profound transformation to European culture. This highly illustrated book, available for the first time in paperback, shows that the pagan imagination existed side-by-side -- often uneasily -- with the official symbols, doctrines, and art of the Church.

Godwin carefully documents how pagan themes and gods enhanced both public and private life. Palaces and villas were decorated with mythological images/ stories, music, and dramatic pageants were written about pagan themes/ and landscapes were designed to transform the soul. This was a time of great social and cultural change, when the pagan idea represented nostalgia for a classical world untroubled by the idea of sin and in no need of redemption. A stunning book with hundreds of photos that bring alive this period with all its rich conflict between Christianity and classicism.
