The Conservation of Decorated Surfaces on Earthen Architecture Leslie Rainer,Angelyn Bass Rivera,2006 For millennia, people of all cultures have decorated the surfaces of their domestic, religious, and public buildings. Earthen architecture in particular has been, and continues to be, a common ground for surface decoration such as paintings, sculpted bas-relief, and ornamental plasterwork. This volume explores the complex issues associated with preserving these surfaces. Case studies from Asia, Europe, Africa, the Middle East, and the Americas are presented. The publication is the result of a colloquium held in 2004 at Mesa Verde National Park, Colorado, co-organized by the Getty Conservation Institute (GCI) and the National Park Service (NPS). The meeting brought together fifty-five conservators, cultural resource managers, materials scientists, engineers, architects, archaeologists, anthropologists, and artists from eleven countries. Divided into four themes-- Archaeological Sites, Museum Practice, Historic Buildings, and Living Traditions--the papers examine the conservation of decorated surfaces on earthen architecture within these different contexts.

King Leopold's Ghost Adam Hochschild,2019-05-14 With an introduction by award-winning novelist Barbara Kingsolver In the late nineteenth century, when the great powers in Europe were tearing Africa apart and seizing ownership of land for themselves, King Leopold of Belgium took hold of the vast and mostly unexplored territory surrounding the Congo River. In his devastatingly barbarous colonization of this area, Leopold stole its rubber and ivory, pummelled its people and set up a ruthless regime that would reduce the population by half. . While he did all this, he carefully constructed an image of himself as a deeply feeling humanitarian. Winner of the Duff Cooper Prize in 1999, King Leopold's Ghost is the true and haunting account of this man's brutal regime and its lasting effect on a ruined nation. It is also the inspiring and deeply moving account of a handful of missionaries and other idealists who travelled to Africa and unwittingly found themselves in the middle of a gruesome holocaust. Instead of turning away, these brave few chose to stand up against Leopold. Adam Hochschild brings life to this largely untold story and, crucially, casts blame on those responsible for this atrocity.

The Road to En-dor E. H. Jones,Neil Gaiman,2014-05-01 The incredible true story of two WWI POWs who used amateur

magic to convince their captors that they were in touch with the spirit world Captured during World War I, Lieutenant E. H. Jones, a Welsh officer in the Indian Army, and Lieutenant C. W. Hill, an Australian serving in the R.A.F., were prisoners of war at the Yozgad prison camp in Turkey. Duty-bound as officers to attempt to escape, Jones sensed that what had previously been the harmless fun of fooling around with a homemade Ouija board could be turned into something much more productive. Playing on the credulous nature of their captors, Hill and Jones weaved an incredibly elaborate plot, hatched to plan their escape. Acting as mediums for the Ouija board, they attempted to convince their captors that they were gradually descending into insanity—which, had it been true, would have seen them repatriated. A true story of bravery, dedication, and extreme hardship, this book is a fascinating insight account of a daring escapade. As well as containing astonishing original materials including photographs, letters, and postcards, the book contains a preface by the author's grandson, as well as a foreword by Neil Gaiman who is linked to a film which is currently in pre-production. A free companion ebook is available to download from the Hesperus website (www.hesperuspress.com/the-road-to-en-dor) which includes back stories on the characters, maps, letters, and coded messages; and an exclusive short story written by Jones.

Violent Borders Reece Jones, 2016-10-11 This engaging analysis of the refugee crisis explores how borders are formed, policed—and used to inflict violence on the poor. “In an era of terrorism, global inequality, and rising political tension over migration, Jones argues that tight border controls make the world worse, not better.” —Boston Globe Forty thousand people have died trying to cross between countries in the past decade, and yet international borders only continue to harden. The United Kingdom has voted to leave the European Union; the United States elected a president who campaigned on building a wall; while elsewhere, the popularity of right-wing antimigrant nationalist political parties is surging. Reece Jones argues that the West has helped bring about the deaths of countless migrants, as states attempt to contain populations and limit access to resources and opportunities. “We may live in an era of globalization,” he writes, “but much of the world is increasingly focused on limiting the free movement of people.” In *Violent Borders*, Jones crosses the migrant trails of the world, documenting the billions of dollars spent on border security projects and the dire consequences for countless millions. While the poor are restricted by the lottery of birth to slum dwellings in the ailing decolonized world, the wealthy travel without constraint, exploiting pools of cheap labor and lax environmental regulations. With the growth of borders and resource enclosures, the deaths of migrants in search of a better life are intimately connected to climate change,

environmental degradation, and the growth of global wealth inequality.

A Book of the Beginnings Gerald Massey,2007-03-01 Containing an attempt to recover and reconstitute the lost origins of the myths and mysteries, types and symbols, religion and language, with Egypt for the mouthpiece and Africa as the birthplace.

Introductory Grammar of Amharic Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

The Baobabs: Pachycauls of Africa, Madagascar and Australia G.E. Wickens,2008-03-02 This is the only comprehensive account of all eight species in the genus *Adansonia*. It describes the historical background from the late Roman period to the present. It covers the extraordinary variety of economic uses of baobabs. There are also appendices on vernacular names, gazetteer, economics, nutrition and forest mensuration. This book fills a gap in the botanical literature. It deals with a genus that has fascinated and intrigued scientists and lay persons for centuries.

Chumash Ethnobotany Janice Timbrook,2023 The Chumash people have lived for thousands of years in coastal California from San Luis Obispo to Santa Barbara, a homeland of uncommon biological richness and diversity. This thoroughly-researched book, in documenting some 175 of the plant species important to Chumash culture, offers a glimpse of life in southern California from pre-European contact through historic times. The 2023 edition adds a new Preface to address topics not explicitly discussed in the original text: plant management techniques that the Chumash employed and their ecological effects; organization of plant knowledge through classification systems and naming; and patterns of usage - which plant families predominated in providing particular necessities of life. The Introduction includes a brief history of the Chumash and explains the purpose of the book, how it is organized, sources, and acknowledgements. The body of the book is a Plant Catalog, organized alphabetically by scientific botanical name and including each plant's common name in English, California Spanish, and as many as six Chumashan languages. Each entry describes in detail not just how the plant was utilized but also

its other roles in Chumash life and thought. Following the main text are a Bibliography, an alphabetical listing of Chumash plant-related names and words with their corresponding scientific name and English common name, and an extensive Index. Chumash Ethnobotany draws primarily upon the voluminous and richly detailed field notes and plant collections of John P. Harrington (1884-1961), who interviewed ten Chumash consultants over a period of 50 years (1911-1961). Harrington's Chumash materials comprise some 300,000 handwritten pages and over 450 plant specimens. Information was also incorporated from a wide variety of other sources: ethnographic accounts and modern Chumash consultants; archaeological reports; historical accounts by explorers, missionaries, and settlers; letters, botanical research articles, and floras. Documentation is also provided from neighboring tribes who use or used the same or related species in a similar fashion. The book is intended to reach a broad audience, making the information accessible to both interested laypersons and scholars. It is illustrated with Chris Chapman's watercolor botanical portraits and Timbrook's own woodcut-like interpretations of scenes from Chumash life.

Teutonic Mythology Jacob Grimm, 1966

Thirty Years in the South Seas Richard Parkinson, 1999 Richard Parkinson's *Dreissig Jahre in der Sudsee* was first published in 1907. In this 900-page work, Parkinson drew together and expanded on the scientific and popular papers he had been publishing since 1887, creating in the process a landmark ethnography of the Bismarck Archipelago. His travels covered the islands now known as New Britain, New Ireland, New Hanover, Manus, and Buka and Bougainville, but he also collected information about the mainland of New Guinea (Kaiser Wilhelmsland). His observations covered a wide range, from religious life and ceremonies to artefacts and language. It is clear he talked extensively with people - though mostly with a translator - and compared accounts. He also took many photographs, some 200 of which were included in the volume. Given the period, all his human subjects had to be posed, but the range of associated detail, probably unconsciously included, is very wide.--BOOK JACKET.
