The First Apartment Book Kyle Schuneman, Heather Summerville, 2012 In The First Apartment Book, Kyle shares brilliant design ideas and thirty simple DIY projects that show how anyone can infuse a first home with personality whether you're renting, moving in with a roommate or significant other for the first time, or are a newly minted owner eager to put

your stamp on your place. The First Apartment Book is both a tour of amazing photographs from ten real homes across the country and a hardworking resource of great ideas. Kyle explains how each of the featured apartments achieves the perfect balance between cool design and the homeowner's lifestyle, with a sprinkling of influences from the resident's city thrown in. Kyle scours flea markets for functional pieces with personality and incorporates Pollock-inspired art and touches of taxicab yellow to make a small studio in New York City function as four different yet coherent rooms. Graffiti-like dip-dye curtains and a skateboard table reflect a Seattle renter's hip sensibility. In Cleveland, Kyle creates a modern preppy space for a plaid-loving local using subdued colors and careful pattern mixing. A couple's salon-style hanging of rock posters in Nashville feels utterly unique, and Kyle's clever ideas for storing to store their musical instruments keep the duo sane. Short on time and long on style, the thirty DIY projects include no-sew pillows, yarn-wrapped picture frames, and a dresser update using a little glue and fabric. Full of bold, vibrant photos and hundreds of big ideas for small spaces, The First Apartment Book proves that no matter what your landlord, your floor plan, or your wallet says, there are no limits on how cool your first apartment can be.

Urban Pioneer Sara Emslie, 2023-09-12 Bestselling author Sara Emslie shines a spotlight on urban industrial style and shows how reclaimed materials can bring warmth and personality to your living space. New pressures on housing mean that pioneering homeowners are converting ex-industrial, non-residential spaces into innovative homes, while others are taking inspiration from the industrial look to bring character to newbuild interiors. In the 1960s and '70s, many urban warehouses and factories became vacant, attracting the first wave of artists and creatives seeking large, affordable studio spaces. Since then, industrial areas in many cities have become sought-after residential districts and urban regeneration has gone from

strength to strength. Nowadays the trend shows no sign of waning, with a second generation of urban pioneers cleverly converting former lofts, warehouses, schools, factories, offices and retail spaces into unique and highly desirable homes. In *Urban Pioneer*, Sara Emslie investigates the practicalities of transforming non-residential spaces into homes, the key elements of the look—from exposed brickwork to copper piping and metal roof trusses—and the related rise in the popularity of industrial design. She then explores twelve inspiring and varied real-life homes that showcase the very best of the Urban Pioneer look.

Human Dimension and Interior Space Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings.

With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.
