Barbara Scott-Goodman

Happy Hour Marlowe Granados,2021-09-07 With the verve and bite of Ottessa Moshfegh and the barbed charm of Nancy Mitford, Marlowe Granados's stunning debut brilliantly captures a summer of striving in New York City. Isa Epley, all of twenty-one years old, is already wise enough to understand that the purpose of life is the pursuit of pleasure. She arrives in New York with her newly blond best friend looking for adventure. They have little money, but that's hardly going to stop them. By day, the girls sell clothes on a market stall, pinching pennies for their Bed-Stuy sublet and bodega lunches. By night, they weave between Brooklyn, the Upper East Side, and the Hamptons among a rotating cast of celebrities, artists, Internet entrepreneurs, stuffy intellectuals, and bad-mannered grifters. Resources run ever tighter and the strain tests their friendship as they try to convert social capital into something more lasting than precarious gigs as au pairs, nightclub hostesses, paid audience members, and aspiring foot fetish models. Through it all, Isa's bold, beguiling voice captures the precise thrill of cultivating a life of glamour and intrigue as she juggles paying her dues with skipping out on the bill. Happy Hour is a novel about getting by and having fun in a system that wants you to do neither.

Risk Terrain Modeling Joel M. Caplan,Leslie W. Kennedy,2016-06-28 Risk terrain modeling (RTM) diagnoses the spatial attractors of criminal behavior and makes accurate predictions of where crime will occur at the micro-level. This book presents RTM as part of a larger risk management agenda that defines and measures crime problems; suggests ways in

which they can be addressed through interventions; proposes measures for assessing effectiveness of treatment and sustainability of efforts; and offers suggestions for how police organizations can address vulnerabilities and exposures in the communities that they serve through strategies that go beyond specific deterrence of offenders. Technical and conceptual aspects of RTM are considered into the context of past criminological research, leading to a discussion of crime vulnerabilities and exposures, and the Theory of Risky Places. Then best practices for RTM, crime prediction, and risk reduction are set to ACTION. Case studies empirically demonstrate how RTM can be used to analyze the spatial dynamics of crime, allocate resources, and implement customized crime and risk reduction strategies that are transparent, measurable, and effective. Researchers and practitioners will learn how the combined factors that contribute to criminal behavior can be targeted, connections to crime can be monitored, spatial vulnerabilities can be assessed, and actions can be taken to reduce the worst effects--Provided by publisher.
