**Tricia Foley Life/Style** Tricia Foley, 2015-09-29 Designer and lifestyle authority Tricia Foley illustrates her approach to creating elegantly pared-down environments for the home and work space. Designer Tricia Foley is best known for her timeless classical style, characterized by clean lines, natural materials, and vintage furnishings—from flea-market finds to antiques—and a palette of calming hues of cream, ivory, and white. In this book, Foley addresses such aspects of home design as selecting the perfect shade of white, setting up the pantry, bringing collected objects together, creating artful tabletops, organizing the home office, and much more. A collector—of china, of linens, of books—she explains that the only way to keep harmony is through editing. The designer provides a treasure trove of useful ideas, from her favorite storage products and essential items for the guest room to seasonal entertaining ideas and holiday decor. Foley’s romantic Long Island, New York, property—consisting of an eighteenth-century farmhouse and several outbuildings—serves as her personal laboratory and reflects a simple and well-designed style inherited from the basic tenets of Shaker design. Beautifully photographed, this inspiring book is a must-have for design-savvy individuals who desire a simple, but stylish, lifestyle.

The Gentle Art of Swedish Death Cleaning Margareta Magnusson, 2018-01-02 \*The basis for the wonderfully funny and moving TV series developed by Amy Poehler and Scout Productions\* A charming, practical, and unsentimental approach to putting a home in order while reflecting on the tiny joys that make up a long life. In Sweden there is a kind of decluttering called *döstädning*, *dö* meaning “death” and *städning* meaning “cleaning.” This surprising and invigorating process of clearing out unnecessary belongings can be undertaken at any age or life stage but should be done sooner than later, before others have to do it for you. In *The Gentle Art of Swedish Death Cleaning*, artist Margareta Magnusson, with Scandinavian humor and wisdom, instructs readers to embrace minimalism. Her radical and joyous method for putting things in order helps families broach sensitive conversations, and makes the process uplifting rather than overwhelming. Margareta suggests which possessions you can easily get rid of (unworn clothes, unwanted presents, more plates than you’d ever use) and which you might want to keep (photographs, love letters, a few of your children’s art projects). Digging into her late husband’s tool shed, and her own secret drawer of vices, Margareta introduces an element of fun to a potentially daunting task. Along the way readers get a glimpse into her life in Sweden, and also become more comfortable with the idea of letting go.

Make Time Jake Knapp,John Zeratsky,2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (*Insider*, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do.

Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. Make Time is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. Make Time isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., Make Time will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

**Handbook of Blended Shore Education** Gabriele Stroschen,2008-11-07 As we confront the future of our professional endeavors, we tend to rely with confidence on longstanding and widely honored assumptions about the world and ourselves. We believe we have accumulated sturdy structures of knowledge, effective practices, and sound values. Yet, we rely on these resources with scant consciousness that in the long run our assumptions, practices, and values may not only be inimical to the viability of our profession, but as well, oppressive in their effects on others. There is at least one assumption - common across many professions and cultures - that is of particular significance. It is the assumption that the world is made up of discrete entities or units. There are not only the species of plants and animals, for example, but there is me as opposed to you, us vs. them, my business enterprise in competition with yours, our nation or religion and yours. And with this assumption of separable units, we assemble ways of sustaining and protecting those units of which we feel a part. We erect buildings, laws, schools, governments, and armies to ensure that what is inside the boundary will flourish, and what is outside cannot threaten us. In effect, the assumption of a world of independent entities establishes the way in which we understand and conduct ourselves within relationships.
