*The Untelling* Tayari Jones, 2007-10-15 From the author of the Oprah Book Club Selection *An American Marriage*, here is an emotionally powerful novel that succeeds mightily...truly a wonderful story (Boston Globe). Aria is no stranger to tragedy - as a young girl, she and her older sister and mother survived a car crash that took the lives of their father and beloved baby sister. And although relations with her remaining family are strained, she's done her best to establish a solid, normal life for herself, living in Atlanta and teaching literacy to girls who have fallen on hard times. But now she has a secret that she's not yet ready to share with Dwayne, her devoted boyfriend, or Rochelle, her roommate and best friend: Aria is pregnant. Or so she thinks. The truth is about to make her question her every assumption and reevaluate the life she has worked so hard to build for herself...as it sends her reeling in a direction she had no idea she was destined to go. Praise for Tayari Jones Tayari Jones is blessed with vision to see through to the surprising and devastating truths at the heart of ordinary lives, strength to wrest those truths free, and a gift of language to lay it all out, compelling and clear. -- Michael Chabon Tayari Jones has emerged as one of the most important voices of her generation. -- Essence One of America's finest writers. -- Nylon.com Tayari Jones is a wonderful storyteller. -- Ploughshares

**Coping with Complexity** Dani Marinova, 2016-07-31 When parties undergo abrupt organisational changes between elections - such as when they fuse, split, join or abandon party lists - they alter profoundly the organisation and supply of

electoral information to voters. The alternatives on the ballot are no longer fixed but need to be actively sought out instead. This book examines how voters cope with the complexity triggered by party instability. Breaking with previous literature, it suggests that voters are versatile and ingenious decision-makers. They adapt to informational complexity with a set of cognitively less costly heuristics uniquely suited to the challenges they face. A closer look at the impact of party instability on the vote advances and qualifies quintessential theories of vote choice, including proximity voting, direction-intensity appeals, economic voting and the use of cognitive heuristics. The rich and nuanced findings illustrate that political parties hold a key to understanding voter behaviour and representation in modern democracy.

**Presidential Responsiveness and Public Policy-Making** Jeffrey E. Cohen, 2010-05-07 We expect a president to respond to public opinion as an elected official in a democracy. Indeed, the president needs public support to overcome opposition to his policies in Congress and the bureaucracy. At the same time the president may want to pursue policies that do not have widespread support. How does public opinion affect presidential policy making? Jeffrey Cohen finds that presidents are responsive to the public in selecting issues to focus on. If an issue has captured the interest of the people, then the president will focus on that issue. Cohen finds that having chosen to work on an issue, presidents pay less attention to public opinion when making a policy. The president will try to maintain control over the details of the policy so that the outcome fits his policy agenda. Cohen examines the way presidents from Eisenhower through Clinton have dealt with public opinion in policy making. He uses case studies of issues such as Clinton and gays in the military, Bush and the extension of unemployment benefits, and Kennedy and cutting the income tax, to explore the relationship between presidents and public opinion. In addition Cohen uses a quantitative analysis of State of the Union addresses and positions on roll call votes of presidents from Eisenhower through George Bush to test his theories. This book should appeal to political scientists and historians interested in the presidency and in public opinion, as well as general readers interested in the history of the American presidency. Jeffrey Cohen is Professor of Political Science, Fordham University.

Parties and Their Members Susan E. Scarrow, 1996-03-21 Why would parties continue to care about membership enrollment in an age of television campaigning and direct-mail fundraising? To answer this question, *Parties and their Members* traces organizing strategies employed by British and German membership parties during the past half century. Using careful analysis of historical records and interviews with party officials, the author shows that party organizers have reacted to technological and social developments by modifying their ideas about how members can help parties achieve their goals.

**Parliamentary Debates** New Zealand. Parliament,1953

**Where Do the Parties Stand?** Stella Gianfreda,2021-07-29 This book analyses the politicization of immigration and the European Union in Italy, the UK, and the European Parliament (EP) from 2015 to 2020. The book uses the case studies of Italy, the UK, and the EP to study party positioning specifically towards immigration and the European Union, to understand to what extent mainstream-left, mainstream-right and populist parties adopt different framing strategies to compete on the new cultural dimension created by globalization. The book draws on saliency theory, issue ownership theory, and yield theory to investigate the multidimensional nature of political competition, and the relevance of institutional settings in determining party framing strategies. Bridging two fields that typically do not interact—party politics and migration studies—this book fills gaps in the academic literature and as such will be appropriate for students and researchers interested in party politics, European politics, immigration politics, populism, and text analysis.

**Politics and Peasants in Interwar Romania** Sorin Radu,Oliver Jens Schmitt,2017-11-06 The volume discusses the integration of peasants into the nation building project of Greater Romania with a focus on social and cultural practices.

Thus, it addresses one of the key questions of the new political system in post-imperial East Central and Southeast Europe. It advocates a shift from a multiple top-down perspective (capital - province, urban political elites - rural voters) to an analysis concentrating on regionally diverse rural societies with a special interest in the predominantly ethnic Romanian population.

*Policy Making in Multilevel Systems* Jan Biela, Annika Hennl, André Kaiser, 2024-10-31 Does the territorial state organisation matter for effective policy making, and if so, in what way? So far, we know relatively little about its effects on policy making and policy outputs. Starting from the hypothesis that decentralised policy making has positive effects whereas federalism has a slightly negative impact on policy performance, this book systematically tests the independent and interdependent effects of different combinations of federal/unitary and decentralised/centralised structures of decision making and implementation. Based on a mixed methods design it first quantitatively tests the relationships for the OECD countries in cross-sectional as well as panel designs. In a second step, qualitative case studies are conducted for four countries: federal-centralised Austria, federal-decentralised Switzerland, unitary-decentralised Denmark, and unitary-centralised Ireland. The authors study two space-related policy areas, both with regard to the decision making and the implementation stage of the policy-making process: regional policy and transport policy.

*Making History* Alex Callinicos, 2004-07-01 Making History is about the question - central to social theory - of how human agents draw their powers from the social structures they are involved in. Drawing on classical Marxism, analytical philosophy, and a wide range of historical writing, Alex Callinicos seeks to avoid two unacceptable extremes - dissolving the subject into an impersonal flux, as poststructuralists tend to - and treating social structures as the mere effects of individual action (for example, rational-choice theory). Among those discussed are Althusser, Anderson, Benjamin, Brenner, Cohen, Elster, Foucault, Giddens, Habermas, and Mann. Callinicos has written an extended introduction to this new edition that reviews developments since Making History was first published in 1987. This republication gives a new generation of readers access to an important intervention in Marxism and social theory.

*Comparative Democratic Politics* Hans Keman, 2002-03-26 Democracy is the most widely used way of organizing politics in the contemporary world. Comparative Democratic Politics brings together a team of renowned international scholars to provide a comprehensive review of theory and research in this essential area of comparative study. A key aim to the book is to introduce and understand representative democracy as a political process and contemporary system of governance in need of constant attention and scrutiny. Four important themes include: · the contribution of comparative politics as a distinct field within political science to our understanding of democracy, democratic politics and democratic theory · what we can learn from a comparative analysis of the role, functioning and behaviour of the principal actors (electorate, parties and institutions) across nations · the relationship between politics and public policy formation and processes of democratic decision-making and corresponding policy-making capacity · how we measure contemporary democracy or democratic performance in both a

procedural and material sense. Comparative Democratic Politics will afford new and important insights to the contemporary study of representative democracy. It will be essential reading for all students and academics of political science and public policy seeking a deeper understanding of both the world's so called established and emerging democracies.

*Making a Difference* Richard Davis, Diana Owen, David Taras, Stephen Ward, 2008-03-13 This book is a cross-national analysis of the role of the internet in national electoral campaigns. It covers an array of electoral and party systems throughout the globe from parliamentary to presidential, party-based to candidate-oriented, multi-party to two-party, and stable party system to dynamic party system. It takes a look at three groups of nations with varying levels of Internet access\_ those where internet usage is common across demographic groups, those where usage has reached significant levels but not widespread penetration, and those where internet access is still limited to a small elite. Each chapter is a study of a particular nation, focusing on its electoral and party systems, the accessibility of the Internet to the population, the nature of candidate/party usage, and the effects of the internet on the conduct of campaigns. By reviewing the findings from these studies, *Making a Difference* draws conclusions about exactly how the internet influences electoral politics.

*India Briefing, 1987* Marshall M. Bouton, 2019-04-02 This annual review of major events, issues, and trends in Indian affairs presents an authoritative and insightful assessment of India in 1986. Interpretive essays illuminate the causes and consequences of a tumultuous year, as leading specialists discuss Indian politics, economy, society, culture, and foreign relations. The contributors examine such important developments as the breakdown of the Punjab accord, the resurgence of militant communalism, Prime Minister Rajiv Gandhi's faltering leadership, the dramatic heightening of Indo-Pakistan tensions, the growing resistance to economic reforms, and the impact of the video revolution on Indian culture. Filling an important gap in the literature on contemporary Indian affairs, this book will be invaluable for students and scholars of South Asia as well as for journalists, policymakers, businesspeople, and serious travelers who wish to understand current and future developments in India.

## **The Europeanization of National Political Parties ,**

**Conservative Parties and the Birth of Democracy** Daniel Ziblatt, 2017-04-17 How do democracies form and what makes them die? Daniel Ziblatt revisits this timely and classic question in a wide-ranging historical narrative that traces the evolution of modern political democracy in Europe from its modest beginnings in 1830s Britain to Adolf Hitler's 1933 seizure of power in Weimar Germany. Based on rich historical and quantitative evidence, the book offers a major reinterpretation of European history and the question of how stable political democracy is achieved. The barriers to inclusive political rule, Ziblatt finds, were not inevitably overcome by unstoppable tides of socioeconomic change, a simple triumph of a growing middle class, or even by working class collective action. Instead, political democracy's fate surprisingly hinged on how conservative political parties – the historical defenders of power, wealth, and privilege – recast themselves and coped with the rise of their own radical right. With striking modern parallels, the book has vital implications for today's new and old democracies under siege.

*The New Politics of Class* Geoffrey Evans, James Tilley, 2017-02-16 This book explores the new politics of class in 21st century Britain. It shows how the changing shape of the class structure since 1945 has led political parties to change, which has both reduced class voting and increased class non-voting. This argument is developed in three stages. The first is to show that there has been enormous social continuity in class divisions. The authors demonstrate this using extensive evidence on class and educational inequality, perceptions of inequality, identity and awareness, and political attitudes over more than fifty years. The second stage is to show that there has been enormous political change in response to changing class sizes. Party policies, politicians' rhetoric, and the social composition of political elites have radically altered. Parties offer similar policies, appeal less to specific classes, and are populated by people from more similar backgrounds. Simultaneously the mass media have stopped talking about the politics of class. The third stage is to show that these political changes have had three major consequences. First, as Labour and the Conservatives became more similar, class differences in party preferences disappeared. Second, new parties, most notably UKIP, have taken working class voters from the mainstream parties. Third, and most importantly, the lack of choice offered by the mainstream parties has led to a huge increase in class-based abstention from voting. Working class people have become much less likely to vote. In that sense, Britain appears to have followed the US down a path of working class political exclusion, ultimately undermining the representativeness of our democracy. They conclude with a discussion of the Brexit referendum and the role that working class alienation played in its historic outcome.
