Advances in Machine Learning and Data Science Damodar Reddy Edla,Pawan Lingras,Venkatanareshbabu K.,2018-05-16 The Volume of "Advances in Machine Learning and Data Science - Recent Achievements and Research Directives" constitutes the proceedings of First International Conference on Latest Advances in Machine Learning and Data Science (LAMDA 2017). The 37 regular papers presented in this volume were carefully reviewed and selected from 123 submissions. These days we find many computer programs that exhibit various useful learning methods and commercial applications. Goal of machine learning is to develop computer programs that can learn from experience. Machine learning involves knowledge from various disciplines like, statistics, information theory, artificial intelligence, computational complexity, cognitive science and biology. For problems like handwriting recognition, algorithms that are based on machine learning out perform all other approaches. Both machine learning and data science are interrelated. Data science is an umbrella term to be used for techniques that clean data and extract useful information from data. In field of data science, machine learning algorithms are used frequently to identify valuable knowledge from commercial databases containing records of different industries, financial transactions, medical records, etc. The main objective of this book is to provide an overview on latest advancements in the field of machine learning and data science, with solutions to problems in field of image, video, data and graph processing, pattern recognition, data structuring, data clustering, pattern mining, association rule based approaches, feature extraction techniques, neural networks, bio inspired learning and various machine learning algorithms.

Component-Based Rails Applications Stephan Hagemann,2018-06-22 Use Components to Improve Maintainability, Reduce Complexity, and Accelerate Testing in Large Rails Applications "This book gives Ruby pros a comprehensive guide for increasing the sophistication of their designs, without having to forsake the principles of elegance that keep them in our corner of the software world." —Obie Fernandez, author, The RailsTM 5 Way, Fourth Edition As Rails applications grow, even experienced developers find it difficult to navigate code bases, implement new features, and keep tests fast. Components are the solution, and Component-Based Rails Applications shows how to make the most of them. Writing for programmers and software team leads who are comfortable with Ruby and Rails, Stephan Hagemann introduces a practical, start-to-finish

methodology for modernizing and restructuring existing Rails applications. One step at a time, Hagemann demonstrates how to revamp Rails applications to exhibit visible, provably independent, and explicitly connected parts—thereby simplifying them and making them far easier for teams to manage, change, and test. Throughout, he introduces design concepts and techniques you can use to improve applications of many kinds, even if they weren't built with Rails or Ruby. Learn how components clarify intent, improve collaboration, and simplify innovation and maintenance Create a full Rails application within a component, from first steps to migrations and dependency management Test component-based applications, manage assets and dependencies, and deploy your application to production Identify the seams in an existing Rails application, and refactor it to extract components Master a scripted, repeatable approach for refactoring Rails applications of any size Use component-based Rails with two popular structural patterns: hexagonal and DCI architecture Leverage your new component skills with other frameworks and languages Overcome the unique challenges that arise as you componentize Rails applications If you're ready to simplify and revitalize your complex Rails systems, you're ready for Component-Based Rails Applications. Register your book for convenient access to downloads, updates, and/or corrections as they become available. See inside book for details.

Analysis and Modelling of Faces and Gestures Wenyi Zhao,Shaogang Gong,Xiaou Tang,2005-10-26 During the last 30 years, face recognition and related problems such as face detection/tracking and facial expression recognition have attracted researchers from both the engineering and psychology communities. In addition, extensive research has been carried out to study hand and body gestures. The understanding of how humans perceive these important cues has significant scientific value and extensive applications. For example, human-computer interaction, visual surveillance, and smart video indexing are active application areas. Aiming towards putting such amazing perception capability onto computer systems, researchers have made substantial progress. However, technological challenges still exist in many aspects. Following a format similar to the IEEE International Workshop on Analysis and Modeling of Faces and Gestures (AMFG) 2003, this one-day workshop (AMFG 2005) provided a focused international forum to bring together well-known researchers and research groups to review the status of recognition, analysis and modeling of faces and gestures, to discuss the challenges that we are facing, and to explore future directions. Overall, 30 papers were selected from 90 submitted manuscripts. The topics of these papers range from feature representation, robust recognition, learning, and 3D modeling to psychology. In addition, two invited talks were given, by Prof. Kanade and Dr. Phillips. The technical program was organized into four oral sessions and two poster sessions. This workshop would not have been possible without the timely reviews provided by the members of the Technical Program Committee under a tight schedule. October 2005 Wenyi Zhao Shaogang Gong Xiaoou Tang

Advances in Intelligent, Interactive Systems and Applications Fatos Xhafa,Srikanta Patnaik,Madjid Tavana,2019-01-16 This book presents the proceedings of the International Conference on Intelligent, Interactive Systems

and Applications (IISA2018), held in Hong Kong, China on June 29–30, 2018. It consists of contributions from diverse areas of intelligent interactive systems (IIS), such as: autonomous systems; pattern recognition and vision systems; e-enabled systems; mobile computing and intelligent networking; Internet & cloud computing; intelligent systems and applications. The book covers the latest ideas and innovations from both the industrial and academic worlds, and shares the best practices in the fields of computer science, communication engineering and latest applications of IOT and its use in industry. It also discusses key research outputs, providing readers with a wealth of new ideas and food for thought.

RGB-D Image Analysis and Processing Paul L. Rosin,Yu-Kun Lai,Ling Shao,Yonghuai Liu,2019-10-26 This book focuses on the fundamentals and recent advances in RGB-D imaging as well as covering a range of RGB-D applications. The topics covered include: data acquisition, data quality assessment, filling holes, 3D reconstruction, SLAM, multiple depth camera systems, segmentation, object detection, salience detection, pose estimation, geometric modelling, fall detection, autonomous driving, motor rehabilitation therapy, people counting and cognitive service robots. The availability of cheap RGB-D sensors has led to an explosion over the last five years in the capture and application of colour plus depth data. The addition of depth data to regular RGB images vastly increases the range of applications, and has resulted in a demand for robust and real-time processing of RGB-D data. There remain many technical challenges, and RGB-D image processing is an ongoing research area. This book covers the full state of the art, and consists of a series of chapters by internationally renowned experts in the field. Each chapter is written so as to provide a detailed overview of that topic. RGB-D Image Analysis and Processing will enable both students and professional developers alike to quickly get up to speed with contemporary techniques, and apply RGB-D imaging in their own projects.

Image Co-segmentation Avik Hati,Rajbabu Velmurugan,Sayan Banerjee,Subhasis Chaudhuri,2023-02-02 This book presents and analyzes methods to perform image co-segmentation. In this book, the authors describe efficient solutions to this problem ensuring robustness and accuracy, and provide theoretical analysis for the same. Six different methods for image co-segmentation are presented. These methods use concepts from statistical mode detection, subgraph matching, latent class graph, region growing, graph CNN, conditional encoder–decoder network, meta-learning, conditional variational encoder–decoder, and attention mechanisms. The authors have included several block diagrams and illustrative examples for the ease of readers. This book is a highly useful resource to researchers and academicians not only in the specific area of image co-segmentation but also in related areas of image processing, graph neural networks, statistical learning, and few-shot learning.

Medical Image Computing and Computer Assisted Intervention – MICCAI 2018 Alejandro F. Frangi,Julia A. Schnabel,Christos Davatzikos,Carlos Alberola-López,Gabor Fichtinger,2018-09-13 The four-volume set LNCS 11070, 11071, 11072, and 11073 constitutes the refereed proceedings of the 21st International Conference on Medical Image Computing

and Computer-Assisted Intervention, MICCAI 2018, held in Granada, Spain, in September 2018. The 373 revised full papers presented were carefully reviewed and selected from 1068 submissions in a double-blind review process. The papers have been organized in the following topical sections: Part I: Image Quality and Artefacts; Image Reconstruction Methods; Machine Learning in Medical Imaging; Statistical Analysis for Medical Imaging; Image Registration Methods. Part II: Optical and Histology Applications: Optical Imaging Applications; Histology Applications; Microscopy Applications; Optical Coherence Tomography and Other Optical Imaging Applications. Cardiac, Chest and Abdominal Applications: Cardiac Imaging Applications: Colorectal, Kidney and Liver Imaging Applications; Lung Imaging Applications; Breast Imaging Applications; Other Abdominal Applications. Part III: Diffusion Tensor Imaging and Functional MRI: Diffusion Tensor Imaging; Diffusion Weighted Imaging; Functional MRI; Human Connectome. Neuroimaging and Brain Segmentation Methods: Neuroimaging; Brain Segmentation Methods. Part IV: Computer Assisted Intervention: Image Guided Interventions and Surgery; Surgical Planning, Simulation and Work Flow Analysis; Visualization and Augmented Reality. Image Segmentation Methods: General Image Segmentation Methods, Measures and Applications; Multi-Organ Segmentation; Abdominal Segmentation Methods; Cardiac Segmentation Methods; Chest, Lung and Spine Segmentation; Other Segmentation Applications.

The Politics of Art, Death and Refuge Helen Hintjens,2022-12-08 This book deals in different ways with the politics of death, with art and politics and with the politics of refuge and asylum. Cutting across these fields brings to the fore the fluid quality of social life under late capitalism. The elements of time, space and emotion are part of the overall approach adopted. The individual chapters illustrate themes of despair, striving and the politics of hope, and bring out the fluid and unpredictable qualities of social life. The guiding metaphor is fluidity, or what Urry refers to as "waves; continuous flow; pulsing; fluidity and viscosity" characteristic of life, death, refuge and art under the contemporary global system. Between the worlds of culture, political violence and art, the interconnected themes in this study illuminate conditions of 'liminality', or in-betweenness. The study presents a politics of hope under late capitalism, and cuts through more usual boundaries between art and science, harm and help, death and the politics of bare life. Each chapter grapples with issues that help illustrate wider trends in Global Development and International Relations scholarship and teaching. Amidst growing cynicism about human or even humanitarian values, the volume appeals for a politics of hope and social justice, based on the fluid contours of borderless and amorphous processes of self-organising and radical anarchy.

Identity, Insecurity and Image D. E. Ager,1999-01-01 This text is about the relationship between language and the society that uses it. It specifically aims to discover what drove and drives the French to concentrate so much on language, on what it is that characterises their approach, and on the explanations for the policies governments have pursued in the past and

present.

Phenix City John Lyles,2010-07-19 From settling the Southern Frontier to its reputation as wickedest city in America, the history of Phenix City is detailed through vintage images. Phenix City, Alabama, on the western bank of the Chattahoochee River across from Columbus, Georgia, was officially incorporated as Brownville in 1883. However, its history can be traced through Girard, Knights Station, Summerville, Fort Mitchell, the Creek Indian town of Coweta, and several other communities within Russell County. Phenix City has provided a setting for many of the important events in Alabama's history from early Spanish explorers, to its rich Native American heritage, to its role in opening and settling the Southern frontier, to its adherence to King Cotton, to its rebirth after being regarded the wickedest city in America. Phenix City has undergone profound change and yet has retained its rural charm.

Transitional Justice and the Arab Spring Kirsten Fisher,Robert Stewart,2015-03-24 This book presents a varied and critical picture of how the Arab Spring demands a re-examination and re-conceptualization of issues of transitional justice. It demonstrates how unique features of this wave of revolutions and popular protests that have swept the Arab world since December 2010 give rise to distinctive concerns and problems relative to transitional justice. The contributors explore how these issues in turn add fresh perspective and nuance to the field more generally. In so doing, it explores fundamental questions of social justice, reconstruction and healing in the context of the Arab Spring. Including the perspectives of academics and practitioners, Transitional Justice and the Arab Spring will be of considerable interest to those working on the politics of the Middle East, normative political theory, transitional justice, international law, international relations and

human rights.
