*Touching Ice* Laurann Dohner, 2016-11-21 What can go wrong overseeing a bunch of android sex bots on an automated whorehouse in deep space? Great job, if Megan doesn't die of boredom. Then she catches sight of the sexiest male she's ever seen. On her grainy security monitor, she watches all his sexual exploits with the bots, and fantasizes. But that's all she can do because he's a cyborg. Then fate steps in. There's a crash and Megan must escape or die. The cyborgs are rescuing the sex bots-taking them onboard their ship. She knows cyborgs hate humans. They'll kill her if she asks for help so she devises an insane plan-pretend to be the most realistic sex bot ever made. **Modelling and Motion Capture Techniques for Virtual Environments** Nadia Magnenat-Thalmann, Daniel Thalmann,2003-05-20 The CAPTECH'98 workshop took place at the University of Geneva on November 26-27, 1998, sponsored by FIP Working Group 5.10 (Computer Graphics and Virtual Worlds) and the Suisse Romande regional doctoral seminar in computer science. The subject of the conference was ongoing research in data capture and interpretation. The goals of capturing real world data in order to perceive, understand, and interpret them and then reacting to them in a suitable way are currently important research problems. These data can be very diverse: sounds, emotions, shapes, motions, forces, muscles, actions, etc. Once captured, they have to be treated either to make the invisible visible, or to understand a particular phenomenon so as to formulate an appropriate reaction, or to integrate various information in a new multimedia format. The conference included six sessions of presented papers and three panel discussions. Invited speakers treating various aspects of the topic were: Professor R. Earnshaw from Bradford University, Professor T. L. Kunii from Hosei University, and Professor P. Robert from EPFL. Professor K. Bauknecht, of the University of Zürich, President of IFIP, offered the welcoming address. Mr. E. Badique, project officer for the EU in Brussels, discussed recent results of the EU ACTS research program. Finally, the Geneva Computer Animation '98 Film Festival highlighted the evening of November 26.

*The Failure to Prevent Genocide in Rwanda* Frederik Grünfeld, Anke Huijboom, 2007 This volume is about the failure to prevent genocide in Rwanda in 1994. In particular, the research focuses on why the early warnings of an emerging genocide were not translated into early preventative action. The warnings were well documented by the most authoritative source, the Canadian U.N. peace-keeping commander General Romeo Dallaire and sent to the leading political civil servants in New York. The communications and the decisionmaking are scrutinized, i.e., who received what messages at what time, to whom the messages were forwarded and which (non-) decisions were taken in response to the alarming reports of weapon deliveries and atrocities. This book makes clear that this genocide could have been prevented. Published under the Transnational Publishers imprint.

*Design Studies and Intelligence Engineering* L.C. Jain, V.E. Balas, Q. Wu, 2024-02-27 The discipline of design studies applies various technologies, from basic theory to application systems, while intelligence engineering encompasses computer-aided industrial design, human-factor design, and greenhouse design, and plays a major part within design science. Intelligence engineering technologies also include topics from theory and application, such as computational technologies, sensing technologies, and video detection. This book presents the proceedings of DSIE2023, the 2023 International Symposium on Design Studies and Intelligence Engineering, held on 28 & 29 October 2023 in Hangzhou, China. The conference provides a platform for professionals and researchers from industry and academia to present and discuss recent advances in the fields of design studies and intelligence engineering. It also fosters cooperation among the organizations and researchers involved in these overlapping fields, and invites internationally renowned professors to further explore these topics in some depth, providing the opportunity for them to discuss the technical presentations with conference participants. In all, 275 submissions were received for the conference, 105 of which were accepted after thorough review by 3 or 4 referees for presentation at the conference and inclusion here. Providing a valuable overview of the latest developments, the book will be of interest to all those working in the fields of design studies and intelligence engineering.
