The Mendicant Houses of Medieval London, 1221-1539 Jens Röhrkasten,2004 The mendicant Orders had a profound impact on urban society, life and culture from the thirteenth century onwards. Being engaged in extensive and ambitious pastoral activities they depended on outside support for their material existence. Their influence extended into ecclesiastical as well as secular affairs, leading to the creation of a network of connections to different social groups and on occasion even an involvement in politics. The role of the mendicants in a medieval capital has not yet been systematically studied. A first attempt to study a city of this scale is here made for London.

Exploring the Evidence Linda Clark,2014 Of necessity, historians of the late Middle Ages have to rely on an eclectic mix of sources, ranging from the few remaining medieval buildings, monuments, illuminated manuscripts and miscellaneous artefacts, to a substantial but often uncatalogued body of documentary material, much of it born of the medieval administrator's penchant for record keeping. Exploring this evidence requires skills in lateral thinking and interpretation - qualities which are manifested in this volume. Employing the copious legal records kept by the English Crown, one essay reveals the thinking behind exceptions to pardons sold by successive kings, while another, using clerical taxation returns, adds colour to contemporary criticism of friars for betraying their vows of poverty. Case studies of the registers of two hospitals, one in London the other in Canterbury, lead to insights into the relations of their administrators with civic and spiritual authorities. A textual dissection of the epilogues in William Caxton's early printed works focuses on the universal desire for commemoration. Other essays about royal livery collars and the English coinage are nourished by material remains, and where contemporary records fail to survive, as in the listing of burials in parish churches, notes kept by sixteenth-century heralds and antiquaries provide clues for novel identifications. The book-ends are exemplars of the historian's craft: the one, taking as its starting point the will of Ralph, Lord Cromwell, explores in forensic detail how his executors coped with their enormous task in a time of civil war; the other, by examining research into the economy of fifteenth-century England undertaken since the 1880s, provides an over-view which scholars of the period will find invaluable. Contributors: Martin Allen, Christopher Dyer, David Harry, Susanne Jenks, Maureen Jurkowski, Simon Payling, Euan Roger, Christian Steer, Sheila Sweetinburgh, Matthew Ward.

American Film Cycles Amanda Ann Klein,2011-12-01 A series of movies that share images, characters, settings, plots, or themes, film cycles have been an industrial strategy since the beginning of cinema. While some have viewed them as subgenres, mini-genres, or nascent film genres, Amanda Ann Klein argues that film cycles are an entity in their own right and a subject worthy of their own study. She posits that film cycles retain the marks of their historical, economic, and generic contexts and therefore can reveal much about the state of contemporary politics, prevalent social ideologies, aesthetic trends, popular desires, and anxieties. American Film Cycles presents a series of case studies of successful film cycles, including the melodramatic gangster films of the 1920s, the 1930s Dead End Kids cycle, the 1950s juvenile delinquent teenpic cycle, and the 1990s ghetto action cycle. Klein situates these films in several historical trajectories—the Progressive movement of the 1910s and 1920s, the beginnings of America's involvement in World War II, the birth of the teenager in the 1950s, and the drug and gangbanger crises of the early 1990s. She shows how filmmakers, audiences, film reviewers, advertisements, and cultural discourses interact with and have an impact on the film texts. Her findings illustrate the utility of the film cycle in broadening our understanding of established film genres, articulating and building upon beliefs about contemporary social problems, shaping and disseminating deviant subcultures, and exploiting and reflecting upon racial and political upheaval.

History of Bassishaw Ward PhD Fox, Christine M,2014-05-07 This is the first comprehensive yet accessible study of the history of Bassishaw Ward c.1200 - c.1600. It provides a detailed analysis of how the ward evolved physically, politically, financially, and spiritually and is set within the context of medieval London studies. Bassishaw, one of the smallest wards in medieval London, was at the heart of city government and the cloth trade. City merchants and tradesmen gravitated to the area not just for trade, but also to seek legal advice and arbitration. Bassishaw's only parish church, St Michael Bassishaw, benefitted from the presence of affluent merchants who chose to live within its jurisdiction. The wealth of surviving city records make it possible to challenge preconceptions about the past; highlighting the complex dynamics of city government, economy, and its inhabitants; allowing parallels to be drawn between the past and present.

The Irreducible Subgroups of Exceptional Algebraic Groups Adam R. Thomas,2021-06-18 This paper is a contribution to the study of the subgroup structure of exceptional algebraic groups over algebraically closed fields of arbitrary characteristic. Following Serre, a closed subgroup of a semisimple algebraic group G is called irreducible if it lies in no proper parabolic subgroup of G . In this paper we complete the classification of irreducible connected subgroups of exceptional algebraic groups, providing an explicit set of representatives for the conjugacy classes of such subgroups. Many consequences of this classification are also given. These include results concerning the representations of such subgroups on various G -modules: for example, the conjugacy classes of irreducible connected subgroups are determined by their composition factors on the adjoint module of G , with one exception. A result of Liebeck and Testerman shows that each irreducible connected subgroup X of G has only finitely many overgroups and hence the overgroups of X form a lattice. We provide tables that give representatives of each conjugacy class of connected overgroups within this lattice structure. We use this to prove results concerning the subgroup structure of G : for example, when the characteristic is 2, there exists a maximal connected subgroup of G containing a conjugate of every irreducible subgroup A_1 of G .
