Snow Leopards in Danger Sofia Maimone,2013-08-01 Some people call snow leopards ghost cats because of their mysterious, elusive natures. Found only in the mountain regions of Asia, snow leopards are sleek big cats, able to jump from one precipice to the next in search of prey. Their beautiful fur makes them a target for poachers, unfortunately. However, conservation groups today are working hard to make sure these endangered big cats don't disappear forever. This book gives readers a glimpse into the life of snow leopards and the dangers they experience.

Image Segmentation Tao Lei,Asoke K. Nandi,2022-10-11 Image Segmentation Summarizes and improves new theory, methods, and applications of current image segmentation approaches, written by leaders in the field The process of image segmentation divides an image into different regions based on the characteristics of pixels, resulting in a simplified image that can be more efficiently analyzed. Image segmentation has wide applications in numerous fields ranging from industry detection and bio-medicine to intelligent transportation and architecture. Image Segmentation: Principles, Techniques, and Applications is an up-to-date collection of recent techniques and methods devoted to the field of computer vision. Covering fundamental concepts, new theories and approaches, and a variety of practical applications including medical imaging, remote sensing, fuzzy clustering, and watershed transform. In-depth chapters present innovative methods developed by the authors—such as convolutional neural networks, graph convolutional networks, deformable convolution, and model compression—to assist graduate students and researchers apply and improve image segmentation in their work. Describes basic principles of image segmentation and related mathematical methods such as clustering, neural networks, and mathematical morphology. Introduces new methods for achieving rapid and accurate image segmentation based on classic image processing and machine learning theory. Presents techniques for improved convolutional neural networks for scene segmentation, object recognition, and change detection, etc. Highlights the effect of image segmentation in various application scenarios such as traffic image analysis, medical image analysis, remote sensing applications, and material analysis, etc. Image Segmentation: Principles, Techniques, and Applications is an essential resource for undergraduate and

graduate courses such as image and video processing, computer vision, and digital signal processing, as well as researchers working in computer vision and image analysis looking to improve their techniques and methods.

*Bombs on Trains* Lyndsey Norton,2012-04-16 This is the story of Detective Sergeant Rebecca Castle and her struggle to stop terrorists from destroying the Eurostar, the Channel Tunnel, and the Royal Train, as she discovers the high cost of promotion along the way. From the battleground of Basra to the Tunnel in Kent, with the aid of the SAS and MI5, this tale takes her through the bloody extermination of soldiers, the kidnap of her husband, and the power of having the whole resources of the UK in her hands to stop Abdullah Razzac Fakesh from achieving his goal.

**Stories of a Chicago Police Officer:** Murphy,2016-03-17 Sex or lunch, what would you do, six days in a row? If you dont find the baby soon, will she freeze to death? It appears to be a single gunshot wound directly under the chin; should we assume suicide or possibly foul play? It appears the grandfather had a heart attack and fell through the glass storm window. Do we remove the body before the young grandkids show up? Its against rules but we cant allow the childrens last memory of grandpa to be crumpled and bleeding. Is that a gun in his hand or is that a cell phone? Its too dark, but the call was a man with a gun! If youre right youre a hero. If youre wrong you go to the morgue. These decisions are made on a daily basis if you are a Chicago Police Officer. Hopefully youre right. If youre wrong not only do you suffer but your family does as well. No police officer wants to make a split second decision but at times thats all you have.

**Interdisciplinary Approaches to Disability** Katie Ellis,Rosemarie Garland-Thomson, Mike Kent,Rachel Robertson,2018-12-12 How can a deep engagement with disability studies change our understanding of sociology, literary studies, gender studies, aesthetics, bioethics, social work, law, education, or history? *Interdisciplinary Approaches to Disability* (the companion volume to *Manifestos for the Future of Critical Disability Studies*) identifies both the practical and theoretical implications of such an interdisciplinary dialogue and challenges people in disability studies as well as other disciplinary fields to critically reflect on their professional praxis in terms of theory, practice, and methods. Topics covered include interdisciplinary outlooks ranging from media studies, games studies, education, performance, history and curation through to theology and immunology. Perspectives are drawn from different regions from the European Union to the Global South with chapters that draw on a range of different national backgrounds. Our contributors who write as either disabled people or allies do not proceed from a singular approach to disability, often reflecting different or even opposing positions. The collection features contributions from both established and new voices in international disability studies outlining their own visions for the future of the field. *Interdisciplinary Approaches to Disability* will be of interest to all scholars and students working within the fields of disability studies, cultural studies, sociology, law history and education. The concerns

raised here are further in Manifestos for the Future of Critical Disability Studies.

High-Quality Visual Experience Marta Mrak,Mislav Grgic,Murat Kunt,2010-09-08 Last few years have seen rapid acceptance of high-definition television (HDTV) technology around the world. This technology has been hugely successful in delivering more realistic television experience at home and accurate imaging for professional applications. Adoption of high definition continues to grow as consumers demand enhanced features and greater quality of content. Following this trend, natural evolution of visualisation technologies will be in the direction of fully realistic visual experience and highly precise imaging. However, using the content of even higher resolution and quality is not straightforward as such videos require significantly higher access bandwidth and more processing power. Therefore, methods for radical reduction of video bandwidth are crucial for realisation of high visual quality. Moreover, it is desirable to look into other ways of accessing visual content, solution to which lies in innovative schemes for content delivery and consumption. This book presents selected chapters covering technologies that will enable greater flexibility in video content representation and allow users to access content from any device and to interact with it.

**Provocateur** Anthony Joseph Paul Cortese,1999 Contending that the racial and ethnic hatred Americans so deplore in other countries is in fact latent in modern western society itself, Cortese (sociology, Southern Methodist U.) critiques postmodern social arrangement based on gender, race, and ethnicity as manifested in advertising. He picks as examples the hardest hitting and most timely print ads to demonstrate the various types of subtle messages. He also presents a large and a small plan of attack that includes policy implications for advertising and a practical guide to combating symbolic racism on the individual level.
