The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Creativity, Inc. (The Expanded Edition) Ed Catmull, Amy Wallace, 2023-09-28 The co-founder and longtime president of Pixar updates and expands his 2014 New York Times bestseller on creative leadership, reflecting on the management principles that built Pixar's singularly successful culture, and on all he learned during the past nine years that allowed Pixar to retain its creative culture while continuing to evolve. "Might be the most thoughtful management book ever."—Fast Company For nearly thirty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, Finding Nemo, The Incredibles, Up, and WALL-E, which have gone on to set box-office records and garner eighteen Academy Awards. The joyous storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student, and then forged a partnership with George Lucas that led, indirectly, to his founding Pixar with Steve Jobs and John Lasseter in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie's success—and in the twenty-five movies that followed—was the unique environment that

Catmull and his colleagues built at Pixar, based on philosophies that protect the creative process and defy convention, such as: • Give a good idea to a mediocre team and they will screw it up. But give a mediocre idea to a great team and they will either fix it or come up with something better. • It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them. • The cost of preventing errors is often far greater than the cost of fixing them. • A company's communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody. Creativity, Inc. has been significantly expanded to illuminate the continuing development of the unique culture at Pixar. It features a new introduction, two entirely new chapters, four new chapter postscripts, and changes and updates throughout. Pursuing excellence isn't a one-off assignment but an ongoing, day-in, day-out, full-time job. And Creativity, Inc. explores how it is done.

Shifting Images of the Hasmoneans Vered No'am, 2018 The shifting image of the Hasmoneans in the eyes of their contemporaries and later generations is a compelling issue in the history of the Maccabean revolt and the Hasmonean commonwealth. Based on a series of six Jewish folktales from the Second Temple period that describe the Hasmonean dynasty and its history from its legendary founders, through achievement of full sovereignty, to downfall, this volume examines the Hasmoneans through the lens of reception history. On the one hand, these brief, colorful legends are embedded in the narrative of the historian of the age, Flavius Josephus; on the other hand, they are scattered throughout the extensive halakhic-exegetical compositions known as rabbinic literature, redacted and compiled centuries later. Each set of parallel stories is examined for the motivation underlying its creation, its original message, language, and the historical context. This analysis is followed by exploration of the nature of the relationship between the Josephan and the rabbinic versions, in an attempt to reconstruct the adaptation of the putative original traditions in the two corpora, and to decipher the disparities, different emphases, reworking, and unique orientations typical of each. These adaptations reflect the reception of the pristine tales and thus disclose the shifting images of the Hasmoneans in later generations and within distinct contexts. The compilation and characterization of these sources which were preserved by means of two such different conduits of transmission brings us closer to reconstruction of a lost literary continent, a hidden Jewish Atlantis of early pseudo-historical legends and facilitates examination of the relationship between the substantially different libraries and worlds of Josephus and rabbinic literature.

Flowers and Towers Nira Tessler, 2015-11-25 This book explores the meaning and symbolism of the flower motif in the art of women artists, from the nineteenth century to the present day. It begins with a discussion of the symbolic significance of the flower in canonical texts such as the Song of Songs, in which the female lover is likened to a "lily among the thorns," and to an "enclosed garden." These allegorical images permeated into Christian iconography, attaining various expressions in the plastic arts from the twelfth through nineteenth centuries. The heart of the book is a discussion of the meaning of the change in representations of the flower, and at the same time the appearance of amazing images of "masculine" skyscrapers, in the works of avant-garde American women artists during the 1920s and 30s, in three hubs of Modernist art: New York, California, and Mexico. Tessler explains how modernist artists of various fields of art – such as Glaspell, Stettheimer, O'Keeffe, Pelton, Cunningham, Mather, Modotti and Kahlo – were aware of the religious symbolism of the flower in Judaism and Christianity, and turned it into an emblem of the new modern woman with her own views of the world. *Flowers and Towers* concludes by presenting the works of contemporary feminist American artists such as Chicago and Schapiro, who pay tribute to those same Modernist artists by creating a new and daring image of the flower and using "feminine" materials and techniques that link them, as it were, to their spiritual mothers.

Technology-Enhanced Learning for a Free, Safe, and Sustainable World Tinne De Laet,Roland Klemke,Carlos Alario-Hoyos,Isabel Hilliger,Alejandro Ortega-Arranz,2021-09-08 This book constitutes the proceedings of the 16th European Conference on Technology Enhanced Learning, EC-TEL 2021, held in Bolzano, Italy, in September 2021. The 21 research full papers and 28 short papers presented in this volume were carefully reviewed and selected from 98 submissions. The European Conference on Technology-Enhance Learning, is committed to address global challenges and quality education. The papers deal with the Sustainable Development Goals, particularly SDG 4 and SDG 10, to help to reduce the existing gaps and inequalities between countries and regions from around the world in terms of inclusiveness, equity, access, and quality of education.

Surrealism at Play Susan Laxton,2019-02-14 In *Surrealism at Play* Susan Laxton writes a new history of surrealism in which she traces the centrality of play to the movement and its ongoing legacy. For surrealist artists, play took a consistent role in their aesthetic as they worked in, with, and against a post-World War I world increasingly dominated by technology and functionalism. Whether through exquisite-corpse drawings, Man Ray's rayographs, or Joan Miró's visual puns, surrealists became adept at developing techniques and processes designed to guarantee aleatory outcomes. In embracing chance as the means to produce unforeseeable ends, they shifted emphasis from final product to process, challenging the disciplinary structures of industrial modernism. As Laxton demonstrates, play became a primary method through which surrealism refashioned artistic practice, everyday experience, and the nature of subjectivity.

Human Rights, Suffering, and Aesthetics in Political Prison Literature Yenna Wu,2011-06-16 This interdisciplinary volume of essays studies human rights in political prison literature, while probing the intersections of suffering, politics, and aesthetics in an interliterary and intercultural context. As the first book to explore the concept of global aesthetics in political prison narratives, it demonstrates how literary insight enhances the study of human rights. Covering varied geographical and geopolitical regions, this collection encourages comparative analyses and cross-cultural understanding. Seeking to interrogate linguistic, structural, and cultural constructions of the political prison experience, it highlights the literary aspects without losing sight of the political and the theoretical. The contributors cross various disciplinary boundaries and adopt different interpretive perspectives in analyzing prison narratives, especially memoirs, from such diverse countries as China, Egypt, Morocco, Syria, Romania, Russia, Uruguay, and the U.S. The volume emphasizes the literary works produced since the second half of the twentieth century, particularly since the political seismic shift in 1989. The authors treated range from the canonical to the less well-known: Nawal El Saadawi, Varlam Shalamov, Zhang Xianliang, Cong Weixi, Wumingshi, Carlos Liscano, Fatna El Bouih, Nabil Sulayman, Faraj Bayraqdar, Hasiba 'Abdalrahman, Tahar Ben Jelloun, Nicolae Steinhardt, Irina Ratushinskaya, etc. Critical issues investigated include how the writers represent their sufferings, experiences, and emotions during incarceration; their strategies of survival; and how political prison literature

can reveal hidden violations of human rights, while resisting official discourse and serving other functions in society. Examining the commonalities and differences in global experiences of imprisonment, the eight chapters engage with the aesthetics of self-making and resistance, individual and collective memory, denial and conversion, catharsis and redemption, and the experiencing and witnessing of trauma. Topics also include the politics of remembering and the politics of representation, such as the problematic relationship between narrative, language, and representations of torture. Similarly under discussion are prison aesthetics of happiness, the role of spectacle in the criminal justice system, and the intersection of prison, gender, and silences. At a juncture when more and more people all over the world actively defy repressive regimes and demand political reform, this book makes a timely contribution to the advocacy and discourse of universal human rights.

Mathematics Curriculum Reforms Around the World Yoshinori Shimizu, Renuka Vithal, 2023-06-28 This Open Access volume by the International Commission on Mathematical Instruction (ICMI) is an outcome of the ICMI Study 24 and gives a status-quo of school mathematics reform around the world and what we can learn from this movement. Each theme and section of the book offers descriptions and analyses of multiple case studies in different countries and contexts, along with opportunities to compare, contrast and learn from these diverse experiences. The volume provides a synthesis and meta-analysis of the different historical, geographical and global aspects of school mathematics reforms and explores in which way curricula are elaborated, proposed, changed, and reorganized. It offers a more informed and comprehensive analysis of the roles of different actors and of the many aspects influencing and shaping mathematics curriculum reforms that are taking or have taken place. It also explores the possibilities and means to tackle a curricular reform in the current scenario we live in and how to unfold future developments. This book will be of interest to practitioners and scholars with an interest in school mathematics curriculum reforms. It will also be a useful resource to those involved in school mathematics curriculum reform initiatives by providing current information about the curriculum changes that are taking place in respect of content, teacher education, educational materials, and a range of implementation challenges across diverse contexts.

Proceedings of the Fifth International Conference on Arts and Design Education (ICADE 2022) Juju Masunah, Tati Narawati, Yudi Sukmayadi, Zakarias S. Soeteja, Trianti Nugraheni, Rita Milyartini, Agus Budiman, 2023-10-29 This is an open access book. The 5th INTERNATIONAL CONFERENCE ON ARTS AND DESIGN EDUCATION (ICADE) “Digital Media Literacy and Mastery of Post-pandemic in Arts and Design Education” BACKGROUND The past year has been one of enormous turbulence and upheaval where nobody has been left untouched by the impact of the global pandemic, even a great change has been forced upon artists and educators in their work creation process as well as learning and teaching practice. What and how artists and educators have thought and gone through to keep their field sustained should be

disseminated as a mutual learning to enhance our awareness on arts and design sustainability and role during pandemic. ICADE 5 aims to bring together leading academic artists, arts and design researchers and scholars to exchange and share their notion, experiences, and research results on all aspects of Digital Media Literacy and Mastery in Arts and Design education during pandemic and its urgencies after pandemics. It also provides a premier interdisciplinary platform for arts and design researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted which involves digital media literacy or mastery in the fields of Arts and Design education. The 5th International Conference on Arts and Design Education (ICADE) is a conference hosted by Faculty of Arts and Design Education Universitas Pendidikan Indonesia. This conference will be held on September 22nd, 2022 through Zoom Webinar. ICADE has covered a broad range of topic on music, dance, drama, visual arts, visual communication design, arts education, film and television, and multidisciplinary arts fields. This conference scopes may pertain how artist, designer, or arts and design educators finally adapt and conquer digital media to support their work creation and studies activities during pandemic; attitude changes toward art and design works creation; best practice of art and design creation and studies during pandemic; sorts of digital media which might be left or continuously used after pandemic; what finally the digital media can't ever cover during pandemic even to this moment (post-pandemic); potential disruptive/constructive point of digital media use; as well as other substance where we spot a relation between a digital media with arts and design creation and studies.

Intelligent Robotics and Applications Haibin Yu, Jinguo Liu, Lianqing Liu, Zhaojie Ju, Yuwang Liu, Dalin Zhou, 2019-08-01 The volume set LNAI 11740 until LNAI 11745 constitutes the proceedings of the 12th International Conference on Intelligent Robotics and Applications, ICIRA 2019, held in Shenyang, China, in August 2019. The total of 378 full and 25 short papers presented in these proceedings was carefully reviewed and selected from 522 submissions. The papers are organized in topical sections as follows: Part I: collective and social robots; human biomechanics and human-centered robotics; robotics for cell manipulation and characterization; field robots; compliant mechanisms; robotic grasping and manipulation with incomplete information and strong disturbance; human-centered robotics; development of high-performance joint drive for robots; modular robots and other mechatronic systems; compliant manipulation learning and control for lightweight robot. Part II: power-assisted system and control; bio-inspired wall climbing robot; underwater acoustic and optical signal processing for environmental cognition; piezoelectric actuators and micro-nano manipulations; robot vision and scene understanding; visual and motional learning in robotics; signal processing and underwater bionic robots; soft locomotion robot; teleoperation robot; autonomous control of unmanned aircraft systems. Part III: marine bio-inspired robotics and soft robotics: materials, mechanisms, modelling, and control; robot intelligence technologies and system integration; continuum mechanisms and robots; unmanned underwater vehicles; intelligent robots for environment

detection or fine manipulation; parallel robotics; human-robot collaboration; swarm intelligence and multi-robot cooperation; adaptive and learning control system; wearable and assistive devices and robots for healthcare; nonlinear systems and control. Part IV: swarm intelligence unmanned system; computational intelligence inspired robot navigation and SLAM; fuzzy modelling for automation, control, and robotics; development of ultra-thin-film, flexible sensors, and tactile sensation; robotic technology for deep space exploration; wearable sensing based limb motor function rehabilitation; pattern recognition and machine learning; navigation/localization. Part V: robot legged locomotion; advanced measurement and machine vision system; man-machine interactions; fault detection, testing and diagnosis; estimation and identification; mobile robots and intelligent autonomous systems; robotic vision, recognition and reconstruction; robot mechanism and design. Part VI: robot motion analysis and planning; robot design, development and control; medical robot; robot intelligence, learning and linguistics; motion control; computer integrated manufacturing; robot cooperation; virtual and augmented reality; education in mechatronics engineering; robotic drilling and sampling technology; automotive systems; mechatronics in energy systems; human-robot interaction.

Salmond David Torrance, 2012-05-23 NEW POST-REFERENDUM EDITION. Alex Salmond is well known in Scotland, the UK and beyond as the leader of the Scottish National Party and Scotland's First Minister, but relatively little is understood about Salmond as a human being, what makes him a Nationalist, what shaped his political views, and what sort of country he believes an independent Scotland can be. In this first biography, with which close colleagues and friends have co-operated, the acclaimed political biographer David Torrance turns his attention to perhaps one of the most capable and interesting politicians Scotland has produced in the last few decades. Utilising a raft of published and unpublished material, Torrance charts the life and career of Alex Salmond from his schooldays, his political activism at St Andrews University, his early career at the Royal Bank of Scotland, his election as the MP for Banff and Buchan and, in greater depth than ever before, his two spells as leader of the SNP and, from 2007, as First Minister of Scotland.

 web may 1 2020 abstract we show that the upscaling of wind turbines from rotor diameters of 15 20 m to presently large rotors of 150 200 m has changed the requirements for the aerodynamic blade element momentum bem models in the aeroelastic codes this is because the typical scales in the inflow turbulence are now comparable with the rotor
