Cyber-nationalism in China Ying Jiang, 2012 The prevailing consumerism in Chinese cyberspace is a growing element of Chinese culture and an important aspect of this book. Chinese bloggers, who have strongly embraced consumerism and tend to be apathetic about politics, have nonetheless demonstrated political passion over issues such as the Western media's negative coverage of China. In this book, Jiang focuses upon this passion - Chinese bloggers' angry reactions to the Western media's coverage of censorship issues in current China - in order to examine China's current potential for political reform. A central focus of this book, then, is the specific issue of censorship and how to interpret the Chinese characteristics of it as a mechanism currently used to maintain state control. While *Cyber-Nationalism in China* examines fundamental questions surrounding the political implications of the Internet in China, it avoids simply predicting that the Internet does or does not lead to democratization. Applying a theoretical approach based on the Foucauldian notion of governmentality, the book builds on current scholarship that has attempted to move beyond examining the dynamics of the socio-cultural and -political use of new media technologies. Instead, this book's more intricate theoretical approach does not only accommodate the kind

of liberal (apolitical or political) use observed on the Internet in China, but indicates that desires for political change, such as they are, are implicitly embedded in the relationship between China's online communities and state apparatus - noting, however, that the latter claims total governance over the Internet in the name of the people.

Rebuilding Poland Padraic Kenney,1997 The first book to examine the communist takeover in Poland from the bottom up, and the first to use archives opened in 1989, Rebuilding Poland provides a radically new interpretation of the communist experience. Padraic Kenney argues that the postwar takeover was also a social revolution, in which workers expressed their hopes for dramatic social change and influenced the evolution--and eventual downfall--of the communist regime. Kenney compares Łódź, Poland's largest manufacturing center, and Wrocław, a city rebuilt as Polish upon the ruins of wartime destruction. His account of dramatic strikes in the textile mills of Łódź shows how workers resisted the communist party's encroachment on factory terrain and its infringements of worker dignity. The contrasting absence of labor conflict among migrants in the frontier city of Wrocław holds important clues to the nature of stalinism in Poland: communist power was strongest where workers lacked organizational ties or cultural roots. In the collective reaction of workers in Łódź and the individualism of those in Wrocław, Kenney locates the beginnings of the end of the communist regime. Losing the battle for worker identity, the communists placed their hopes in labor competition, which ultimately left the regime hostage to a

resistant work force and an overextended economy incapable of reform.

*Everything You Love Will Burn* Vegas Tenold, 2018-02-20 The dark story of the shocking resurgence of white supremacist and nationalist groups, and their path to political power Six years ago, Vegas Tenold embedded himself among the members of three of America's most ideologically extreme white nationalist groups-the KKK, the National Socialist Movement, and the Traditionalist Workers Party. At the time, these groups were part of a disorganized counterculture that felt far from the mainstream. But since then, all that has changed. Racially-motivated violence has been on open display at rallies in Charlottesville, Berkeley, Pikesville, Phoenix, and Boston. Membership in white nationalist organizations is rising, and national politicians, including the president, are validating their perceived grievances. *Everything You Love Will Burn* offers a terrifying, sobering inside look at these newly empowered movements, from their conventions to backroom meetings with Republican operatives. Tenold introduces us to neo-Nazis in Brooklyn; a millennial Klanswoman in Tennessee; and a rising star in the movement, nicknamed the Little Fū by the Southern Poverty Law Center, who understands political power and is organizing a grand coalition of far-right groups to bring them into the mainstream. *Everything You Love Will Burn* takes readers to the dark, paranoid underbelly of America, a world in which the white race is under threat and the enemy is everywhere.

*Plotinus, Porphyry and Iamblichus* Andrew Smith, 2024-10-28 This selection of twenty-five essays by Andrew Smith is devoted to Neoplatonism and especially to Plotinus and Porphyry. It deals with Plotinus' development of the Platonic Forms, and includes a lengthy assessment of Porphyry's contribution to the Platonic tradition. The themes also embrace a number of issues that have become particularly prominent in the more recent growth of interest in these philosophers of late antiquity. For example, the importance of practical ethical activity is examined particularly in the case of Plotinus and it is argued from several perspectives that a theoretical basis for reconciling the life of contemplation with that of everyday living may be found in his metaphysics. This also involves his speculations on time and eternity as well as his observations about human consciousness. A closer examination of the role of religion, magic and myth in the life of the philosopher reveals a much richer and more nuanced appreciation of their importance than has been accorded them by an earlier generation of scholars. In particular the contribution of Iamblichus is recognised as a profound attempt to account for divine activity in the world and the first attempt to propose a solution to the problems involved in presenting metaphysics of religious ritual.

*Texts and Culture in Late Antiquity* J. H. D. Scourfield,2007-12-31 Late Antiquity has increasingly been viewed as a period of transformation and dynamic change in its literature as in society and politics. In this volume, thirteen scholars focus on the intellectual and literary culture of the time, investigating complex relationships between late-Antique authors and the texts which they had inherited through the classical ('pagan') and Christian traditions. Particular emphasis is placed on works that carried special authority: Homer, Virgil, Plato, and the Bible. The volume thus contributes to the history of the reception of classical texts, and through its inclusiveness (classical and classicizing, philosophical, and patristic writing are all represented) seeks to offer a view of the textual world of late Antiquity as a unified whole. It affords a scholarly introduction to a sweep of late-Antique literature in Greek and Latin. Authors and genres discussed include Juvencus and Claudian, Plotinus and Proclus, Jerome and John Cassian, geographical and grammatical writing, and Christian cento.
