African Agency in International Politics William Brown, Sophie Harman, 2013-03-20 This book analyses the rapidly increasing role of African states, leaders and other political actors in international politics in the 21st Century. In contrast to the conventional approach of studying how external actors impacted on Africa's international relations, this book seeks to open up a new approach, focusing on the impact of African political actors on international politics. It does this by analysing African agency - the degree to which African political actors have room to manoeuvre within the international system and exert influence internationally, and the uses they make of that room for manoeuvre. Bringing together leading scholars from Africa and Europe to explore the role and conception of African Agency, this book addresses a wide range of issues, from relations with western and non-western donors, Africa's role in the UN and World Trade Organisation, negotiations over climate change, trade agreements with the European Union, regional diplomatic strategies, the character and extent of African state agency, and agency within corporate social responsibility initiatives. African Agency in International Politics will be of interest to scholars and students of Africa's international relations, African politics, development, geography, diplomacy, trade, the environment, political science and security studies.

Illness and Image Sander L. Gilman, 2018-01-16 The humanities in higher education are too often labeled as impractical and are not usually valued in today's marketplace. Yet in professional fields, such as the health sciences, interest in what the humanities can offer has increased. Advocates claim the humanities offer health care professionals greater insight into how to work with those who need their help. *Illness and Image* introduces undergraduates and professionals to the medical

humanities, using a series of case studies, beginning with debates about male circumcision from the ancient world to the present, to the meanings of authenticity in the face transplantation arena. The case studies address the interpretation of mental illness as a disability and the new category of mental illness, self-harm. Sander L. Gilman shows how medicine projects such categories' existence into the historical past to show that they are not bound in time and space and, therefore, are real. *Illness and Image* provides students and researchers with models and possible questions regarding categories often assumed to be either trans-historical or objective, making it useful as a textbook.

*RGB-D Image Analysis and Processing* Paul L. Rosin, Yu-Kun Lai, Ling Shao, Yonghuai Liu, 2019-10-26 This book focuses on the fundamentals and recent advances in RGB-D imaging as well as covering a range of RGB-D applications. The topics covered include: data acquisition, data quality assessment, filling holes, 3D reconstruction, SLAM, multiple depth camera systems, segmentation, object detection, saliency detection, pose estimation, geometric modelling, fall detection, autonomous driving, motor rehabilitation therapy, people counting and cognitive service robots. The availability of cheap RGB-D sensors has led to an explosion over the last five years in the capture and application of colour plus depth data. The addition of depth data to regular RGB images vastly increases the range of applications, and has resulted in a demand for robust and real-time processing of RGB-D data. There remain many technical challenges, and RGB-D image processing is an ongoing research area. This book covers the full state of the art, and consists of a series of chapters by internationally renowned experts in the field. Each chapter is written so as to provide a detailed overview of that topic. *RGB-D Image Analysis and Processing* will enable both students and professional developers alike to quickly get up to speed with contemporary techniques, and apply RGB-D imaging in their own projects.
