Mastering Responsive Web Design Ricardo Zea, 2015-08-24 Become a master in RWD with this practical, engaging guide About This Book Build responsive designs with solid yet simple HTML5 and CSS3 best practices Use CSS preprocessors (Sass) to speed up the creation of CSS Each chapter covers a different feature of RWD with carefully chosen, interesting examples, including the latest developments in responsive design Who This Book Is For If you already know some HTML and CSS and understand the principles of responsive web design, this book is for you. There's something here for you to learn regardless of if you're a web designer or web developer, or whether you're a seasoned expert web professional. What You Will Learn Install and use Sass with SCSS syntax to create your CSS Use HTML5 tags the right way for the right type of content Enhance the experience of users with assistive technology with ARIA roles Design with desktop-first approach but implement with mobile-first methodology For your layouts, either create and use your own scalable CSS grid, or use Flexbox Create three types of navigation for small screen devices Find the best way to serve the best type of image and how to make videos responsive Build custom responsive emails to ensure the message gets across regardless of the device In Detail Responsive web design is getting more complex day by day and without the necessary design and development skill sets, it's a matter of time before we're left behind. Building meaningful and accessible websites and apps using HTML5 and CSS3 is a must if we want to create memorable experiences for the users. In the ever-changing world of web designers and developers, being proficient in responsive web design is no longer an option, it is mandatory. Whether you're a web designer or web developer, or a seasoned expert web professional, this book will bolster your HTML and CSS skills to a master level. The

book is designed in a way that each chapter will take you one step closer to becoming an expert in RWD. The book begins with introducing you to the power of CSS preprocessors, Sass in this case, to increase the speed of writing repetitive CSS tasks, then use simple but meaningful HTML examples; and add ARIA roles to increase accessibility. You will also understand why a mobile-first approach is ideal. Next, you will learn how to use an easily scalable CSS grid or if you prefer, use Flexbox instead. Create navigations for small screen devices using the “drawer navigation,” “off-canvas” or “toggle” navigation patterns, and also implement images and media in both responsive and responsible ways. Finally, you will build a solid and meaningful typographic scale and make sure your messages and communications display correctly with responsive emails. Style and approach Designing and developing for the web should be fun, and that's the tone used in the book. This book is written in a step-by-step format with clean-cut examples. You will also find tips and notes all over the book to help clarify those small and simple details most books and tutorials assume you already know.

Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Agroecological Transitions: From Theory to Practice in Local Participatory Design Jacques-Eric Bergez, Elise Audouin, Olivier Therond, 2019-02-28 This Open Access book presents feedback from the ‘Territorial Agroecological Transition in Action’- TATA-BOX research project, which was devoted to these specific issues. The multidisciplinary and multi-organisation research team steered a four-year action-research process in two territories of France. It also presents: i) the key dimensions to be considered when dealing with agroecological transition: diversity of agriculture models, management of uncertainties, polycentric governance, autonomies, and role of actors’ networks; ii) an operational and original participatory process and associated boundary tools to support local stakeholders in shifting from a shared diagnosis to a shared action plan for transition, and in so doing developing mutual understanding and involvement; iii) an analysis of

the main effects of the methodology on research organisation and on stakeholders' development and application; iv) critical analysis and foresights on the main outcomes of TATA-BOX, provided by external researchers.

Ludic, Co-design and Tools Supporting Smart Learning Ecosystems and Smart Education Óscar Mealha, Mihai Dascalu, Tania Di Mascio, 2021-08-30 This book brings together the contributions of the 6th International Conference on Smart Learning Ecosystems and Regional Development, which aims at promoting reflection and discussion concerning R&D work, policies, case studies, entrepreneur experiences with a special focus on understanding the relevance of smart learning ecosystems (e.g., schools, campus, working places, informal learning contexts, etc.) for regional development and social innovation and how the effectiveness of the relation of citizens and smart ecosystems can be boosted. This forum has a special interest in understanding how technology-mediated instruments can foster the citizen's engagement with learning ecosystems and territories, namely by understanding innovative human-centric design and development models/techniques, education/training practices, informal social learning, innovative citizen-driven policies, technology-mediated experiences and their impact. This set of concerns will contribute to foster the social innovation sectors and ICT and economic development and deployment strategies alongside new policies for smarter proactive citizens. Chapter "Robots as My Future Colleagues: Changing Attitudes Toward Collaborative Robots by Means of Experience-Based Workshops" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Digital Transformation of the Design, Construction and Management Processes of the Built Environment Bruno Daniotti, Marco Gianinetto, Stefano Della Torre, 2019-12-30 This open access book focuses on the development of methods, interoperable and integrated ICT tools, and survey techniques for optimal management of the building process. The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things, big data, advanced manufacturing, robotics, 3D printing, blockchain technologies and artificial intelligence. The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization. The book describes the contribution of the ABC Department of the Polytechnic University of Milan (Politecnico di Milano) to R&D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process, including design, construction, and management. Informative case studies complement the theoretical discussion. The book will be of interest to all stakeholders in the building process - owners, designers, constructors, and faculty managers - as well as the research sector.

Proceedings of the 2nd International Conference on Culture, Design and Social Development (CDSD 2022) Mohd Fauzi bin Sedon M. Dom, Peter Thomas Zabielskis, Xudong Liu, Xiao Liu, 2023-03-02 This is an open access book. Culture is the spiritual activity and product of human society relative to economy and politics. The traditional concept of human beings

believes that culture is a social phenomenon, a product created by human beings for a long time, and at the same time a historical phenomenon, which is the accumulation of human society and history. The technical, economical and cultural nature of art design determines that only with high social and economic development can art and culture flourish. Art design is the product of the combination of art and technology. Art design is also a kind of productivity, which promotes the development of social economy. As a driving factor for social and economic development, design art will also better serve the social economy with its own more perfect operating system. The 2nd International Conference on Culture, Design and Social Development (CSDS 2022) was held in Nanjing from December 2 to 4, 2022. The purpose of the conference is to provide an international platform for experts, scholars, engineers and technicians, and technical R&D personnel engaged in related fields such as culture, design and social development, to share scientific research results, broaden research ideas, collide with new ideas, and strengthen academic research, and to explore the key challenges and research directions faced by the development of this field, and promote the industrialization cooperation of academic achievements. Experts, scholars, business people and other relevant personnel from universities and research institutions at home and abroad are cordially invited to attend and exchange.

The 2nd International Conference on Intelligent Design and Innovative Technology (ICIDIT 2023) will be held in Chengdu, China from August 04 to 06, 2023. This conference mainly focuses on the latest research on Intelligent Design and Innovative Technology. This conference brings together experts, scholars, researchers and relevant practitioners in this field from all over the world to share research results, discuss hot issues, and provide participants with cutting-edge scientific and technological information, so that you can timely understand the development trends of the industry and master the latest technologies, broaden research horizons and promote academic progress.

The Internet and National Elections Randolph Kluver, Nicholas Jankowski, Kirsten Foot, Steven M. Schneider, 2007-05-07 This volume represents an important contribution towards gaining a cross-national understanding of the current and emerging impacts of the Internet on political practice.

Contextual Process Digitalization Albert Fleischmann, Stefan Oppl, Werner Schmidt, Christian Stary, 2020-03-30 This open access book presents an overview and step-by-step explanation of process management. It starts with the individual participants' perspectives on their work in a process and its structuring and harmonization, and then moves on to its specification in a model and how it is embedded in the organizational and IT environment of the company. Lastly, the book examines the joint processing of instances in the resulting socio-technical systems. A corresponding illustration, which expands with the overview, enables readers to gain a comprehensive understanding of business process management. The

book presents various facets of business process management from the perspective of the participants, and introduces a selection of models that have proved useful in practice. The design of such models supports the transition from a more-or-less unstructured or unsatisfactory way of working to a structured process that corresponds to the ideas of the company and its customers. The book is intended for professionals in industry as well as students in the field of business information systems who are looking for guidelines on how to discover, create and implement real-world processes.

Proceedings of the 2022 3rd International Conference on Modern Education and Information Management (ICMEIM 2022) Vishalache Balakrishnan, Intakhab Alam Khan, Mehmet Cüneyt Birkök, 2023-02-10 This is an open access book. As the process of social modernization continues to advance, people realize that the key to social modernization is the modernization of people, and the modernization of people is inseparable from the modernization of education. It can be seen that education modernization is the foundation of social modernization. Education modernization is an important reform direction of education development, including modernization of education concept, modernization of education content, modernization of education equipment, modernization of teachers and modernization of education management. And information management is one of the important methods to realize education modernization. Information management is the social activity of planning, organizing, leading and controlling information resources by means of modern information technology in order to effectively develop and utilize information resources. Simply put, information management is the management of information resources and information activities by human beings. Information management is a general term for the information that people collect, process and input and output in the whole management process. The process of information management includes information collection, information transmission, information processing and information storage. Using the new generation of information management technology to enhance the digitalization, networking and intelligence of education management, promote the transformation of education decision-making from experience-driven to data-driven, education management from one-way management to collaborative governance, education service from passive response to active service, and support the modernization of education governance system and governance capacity with information technology. Focusing on education and information management with modernization, this conference provides a platform for scholars in related fields to exchange and share information, discuss how the two affect each other, and: Promote the modernization of education by studying certain educational issues that exist. Open up new perspectives, broaden horizons, and examine the issues under discussion by participants. Create a forum for sharing, research and exchange at an international level, where participants will be informed of the latest research directions, results and content in different fields, thus inspiring them to come up with new research ideas. For those who cannot attend the conference, papers in the social sciences and humanities will be accepted and published in the form of conference proceedings.

Peace and Ethnic Identity in Northern Ireland Henry Jarrett, 2017-10-16 Consociational power sharing is often perceived

to be the method of conflict management that is most likely to succeed in deeply divided societies. The case of Northern Ireland in particular is heralded by many as a consociational success story. Since the signing of the Good Friday (Belfast) Agreement in 1998, significant conflict transformation has taken place in the form of a considerable reduction in levels of violence and the establishment of power sharing between unionists and nationalists. This book looks at what consociational power sharing achieves after its implementation - specifically, whether it can work to overcome existing identities in divided societies, or whether it simply freezes divisions. It argues that if consociational power sharing is facilitating a move towards a genuinely shared society, this would be demonstrated in the focus of the election campaigns of Northern Ireland's political parties, which would be almost exclusively based around socio-economic issues affecting the whole population, rather than narrow single identity concerns. However, the book claims that, on the whole, this has not been realised. Although election campaigns are today less strident than they were in the pre-1998 era, it remains the case that they usually foreground single identity symbolism, as it is this that resonates with voters. Whilst consociational power sharing has been very successful in reducing levels of violent conflict and facilitating elite level cooperation between unionists and nationalists, it has been much less successful in reducing divisions within wider society to facilitate a genuinely shared Northern Irish identity. By establishing an important middle ground between consociational proponents and critics, this research will be of significant interest to students and scholars of ethnic politics, political sociology, conflict management, and divided societies more generally.

Bio-Inspired Information Pathways Martin Ziegler,

Advances on Mechanics, Design Engineering and Manufacturing III Lionel Roucoules, Manuel Paredes, Benoit Eynard, Paz Morer Camo, Caterina Rizzi, 2021-04-21 This open access book gathers contributions presented at the International Joint Conference on Mechanics, Design Engineering and Advanced Manufacturing (JCM 2020), held as a web conference on June 2-4, 2020. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and process design; innovative design; and computer-aided design. Further topics covered include virtual simulation and reverse engineering; additive manufacturing; product manufacturing; engineering methods in medicine and education; representation techniques; and nautical, aeronautics and aerospace design and modeling. The book is organized into four main parts, reflecting the focus and primary themes of the conference. The contributions presented here not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work; they are also intended to stimulate new research directions, advanced applications of the methods discussed and future interdisciplinary collaborations.

Technology, Design and the Arts - Opportunities and Challenges Rae Earnshaw, Susan Liggett, Peter Excell, Daniel Thalmann, 2020-06-22 This open access book details the relationship between the artist and their created works, using tools

such as information technology, computer environments, and interactive devices, for a range of information sources and application domains. This has produced new kinds of created works which can be viewed, explored, and interacted with, either as an installation or via a virtual environment such as the Internet. These processes generate new dimensions of understanding and experience for both the artist and the public's relationships with the works that are produced. This has raised a variety of interdisciplinary opportunities and issues, and these are examined. The symbiotic relationship between artistic works and the cultural context in which they are produced is reviewed. Technology can provide continuity by making traditional methods and techniques more efficient and effective. It can also provide discontinuity by opening up new perspectives and paradigms. This can generate new ideas, and produce a greater understanding of artistic processes and how they are implemented in practice. Tools have been used from the earliest times to create and modify artistic works. For example, naturally occurring pigments have been used for cave paintings. What has been created provides insight into the cultural context and social environment at the time of creation. There is an interplay between the goal of the creator, the selection and use of appropriate tools, and the materials and representations chosen. Technology, Design and the Arts - Opportunities and Challenges is relevant for artists and technologists and those engaged in interdisciplinary research and development at the boundaries between these disciplines.

Breaking Broken English Michelle Hartman, 2019-03-26 Black-Arab political and cultural solidarity has had a long and rich history in the United States. That alliance is once again exerting a powerful influence on American society as Black American and Arab American activists and cultural workers are joining forces in formations like the Movement for Black Lives and Black for Palestine to address social justice issues. In *Breaking Broken English*, Hartman explores the historical and current manifestations of this relationship through language and literature, with a specific focus on Arab American literary works that use the English language creatively to put into practice many of the theories and ideas advanced by Black American thinkers. *Breaking Broken English* shows how language is the location where literary and poetic beauty meet the political in creative work. Hartman draws out thematic connections between Arabs/Arab Americans and Black Americans around politics and culture and also highlights the many artistic ways these links are built. She shows how political and cultural ideas of solidarity are written in creative texts and emphasizes their potential to mobilize social justice activists in the United States and abroad in the ongoing struggle for the liberation of Palestine.

The Top Books of the Year Inspiration Gallery Link Party 31 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse.
