Data Algorithms Mahmoud Parsian,2015-07-13 If you are ready to dive into the MapReduce framework for processing large datasets, this practical book takes you step by step through the algorithms and tools you need to build distributed MapReduce applications with Apache Hadoop or Apache Spark. Each chapter provides a recipe for solving a massive computational problem, such as building a recommendation system. You’ll learn how to implement the appropriate MapReduce solution with code that you can use in your projects. Dr. Mahmoud Parsian covers basic design patterns,

optimization techniques, and data mining and machine learning solutions for problems in bioinformatics, genomics, statistics, and social network analysis. This book also includes an overview of MapReduce, Hadoop, and Spark. Topics include: Market basket analysis for a large set of transactions Data mining algorithms (K-means, KNN, and Naive Bayes) Using huge genomic data to sequence DNA and RNA Naive Bayes theorem and Markov chains for data and market prediction Recommendation algorithms and pairwise document similarity Linear regression, Cox regression, and Pearson correlation Allelic frequency and mining DNA Social network analysis (recommendation systems, counting triangles, sentiment analysis)

*Beyond the Blur* Shriharsh P. Tendulkar,2014-06-04 Adaptive optics (AO) corrects distortions created by atmospheric turbulence and delivers diffraction-limited images on ground-based telescopes. The vastly improved spatial resolution and sensitivity has been utilized for studying everything from the magnetic fields of sunspots upto the internal dynamics of high-redshift galaxies. This thesis about AO science from small and large telescopes is divided into two parts: Robo-AO and magnetar kinematics. In the first part, I discuss the construction and performance of the world's first fully autonomous visible light AO system, Robo-AO, at the Palomar 60-inch telescope. Robo-AO operates extremely efficiently with an overhead

**Blood Safety** Hua Shan,Roger Y. Dodd,2018-09-26 This book offers a concise yet comprehensive overview on critical issues in monitoring and responding to new microbial threats to blood safety. It provides information on the current concerns and mechanisms for monitoring potential new infectious threats to blood safety, evaluates the response to these new threats, and explores the complex issues related to blood safety, including health economics, the relationship between levels of public health threats (actual danger) versus public concerns (perceived danger), and the challenges in coordinating international collaborative efforts. The text also includes several case studies that illustrate the existing systems used for monitoring and responding to new threats to blood safety. Written by experts in the field, *Blood Safety: A Guide to Monitoring and Responding to Potential New Threats* is a valuable resource for health care professionals who are responsible for the medical management of blood services.

**Retail Market Study 2014** Marc-Christian Riebe,2014-02-01 The Retail Market Study 2014 of The Location Group is the one and only study of its kind with 150 of the most notable international cities of the fashion and retail world and 3'000 store openings on 1,500 pages. **Climate Change [3 volumes]** Bruce E. Johansen,2017-09-15 This three-volume set presents entries and primary sources that will impress on readers that what we do—or don't do—today regarding climate change will dramatically influence what life on this planet will be like for untold numbers of generations. How are the behaviors of birds, butterflies, and other migratory animals connected to climate change? What does the term thermal inertia mean, and what does this geophysical effect have on predicting what the planet's future will be like? What is the context for the effects we are seeing

on various forms of animal life, from migrating birds to polar bears to mosquitoes that transmit Zika and other diseases? *Climate Change: An Encyclopedia of Science, Society, and Solutions* combines entries describing Earth's variable climatic history, references to scientific literature, weather record data, and selected primary documents to present readers with a comprehensive account of global warming's effects worldwide. By examining verifiable, quantitative information such as the frequency and intensity of hurricanes and changes in the hydrological cycle, as well as clear patterns and trends of alternating droughts and deluges and wildfires, melting ice, and rising seas, readers will be able to understand why scientists are so concerned about the future of our climate. Researchers will benefit from detailed explanations of scientific topics such as thermal inertia, feedbacks, and tipping points; and receive invaluable context on the role of energy use in climate change, including automobiles and air travel. Readers will learn about the role of China in the current global climate and in the future; the widespread effects of climate change on agriculture; and how indigenous peoples' lives are being impacted, from drought and the Navajos to hunters' lives in the Arctic. The work concludes with thought-provoking debates regarding potential solutions, from wind power and solar power to geo-engineering.

*What Makes a Social Crisis?* Jeffrey C. Alexander, 2019-10-16 In this book Jeffrey Alexander develops a new sociological theory of social crisis and applies it to a wide range of cases, from the church paedophilia crisis to the #MeToo movement. He argues that crises are triggered not by objective social strains but by the discourse and institutions of the civil sphere. When strains become subject to the utopian aspirations of the civil sphere, there emerges widespread anguish about social justice and the future of democratic life. Once admired institutional elites come to be represented as perpetrators and the civil sphere becomes legally and organizationally intrusive, demanding repairs in the name of civil purification. Resisting such repair, institutional elites foment backlash, and a war of the spheres ensues. This major new work by one of the world's leading social theorists will be of great interest to students and scholars in sociology, politics, and the social sciences generally.

**A New Leaf** Alyson Martin, Nushin Rashidian, 2015-02-03 Two award-winning journalists offer a “cogent, well-sourced and ambitious analysis of the slow decline of cannabis prohibition in the United States” (Kirkus Reviews). In November 2012, voters in Colorado and Washington passed landmark measures to legalize the production and sale of cannabis for social use—a first in the United States and the world. Once vilified as a “gateway drug,” cannabis is now legal for medical use in

eighteen states and Washington, DC. Yet the federal government refuses to acknowledge these broader societal shifts. 49.5 percent of all drug-related arrests involve the sale, manufacture, or possession of cannabis. In the first book to explore the new landscape of cannabis in the United States, investigative journalists Alyson Martin and Nushin Rashidian demonstrate how recent cultural and legal developments tie into cannabis's complex history and thorny politics. Reporting from nearly every state with a medical cannabis law, Martin and Rashidian interview patients, growers, doctors, entrepreneurs, politicians, activists, and regulators. *A New Leaf* moves from the federal cannabis farm at the University of Mississippi to the headquarters of the ACLU to Oregon's World Famous Cannabis Café. The result is a lucid account of how cannabis legalization is changing the lives of millions of Americans and easing the burden of the "war on drugs" both domestically and internationally.

*Civil Rights and Beyond* Brian D. Behnken, 2016 *Civil Rights and Beyond* examines the dynamic relationships between African American and Latino/a activists in the United States from the 1930s to the present day. Building on recent scholarship, this book pushes the timeframe for the study of interactions between blacks and a variety of Latino/a groups beyond the standard chronology of the civil rights era. As such, the book merges a host of community histories--each with their own distinct historical experiences and activism--to explore group dynamics, differing strategies and activist moments, and the broader quests of these communities for rights and social justice. The collection is framed around the concept of activism, which most fully encompasses the relationships that blacks and Latinos have enjoyed throughout the twentieth century. Wide ranging and pioneering, *Civil Rights and Beyond* explores black and Latino/a activism from California to Florida, Chicago to Bakersfield--and a host of other communities and cities--to demonstrate the complicated nature of African American-Latino/a activism in the twentieth-century United States. Contributors: Brian D. Behnken, Dan Berger, Hannah Gill, Laurie Lahey, Kevin Allen Leonard, Mark Malisa, Gordon Mantler, Alyssa Ribeiro, Oliver A. Rosales, Chanelle Nyree Rose, and Jakobi Williams

*Where Are The Unions?* Doctor Sian Lazar, 2017-03-15 The start of the twenty-first century has been marked by global demands for economic justice. From the pink tide and Arab spring to Occupy and anti-austerity, the last twenty years have witnessed the birth of a new type of mass mobilisation. *Where Are The Unions?* compares, for the first time, the challenges

faced by movements in Latin America, the Arab world and Europe. Workers' strikes and protests were a critical part of these events, yet their role has been significantly underestimated in many of the subsequent narratives. This book focuses on the complex interactions between organised workers, the unemployed, self-employed, youth, students and the state, and critically assesses the concept of the 'precariat'. With contributions from across four continents, this is the most comprehensive look at the global context of mass mobilisation in the twenty-first century.

**Youth, Class and Everyday Struggles** Steven Threadgold, 2017-09-13 The concept of everyday struggles can enliven our understanding of the lives of young people and how social class is made and remade. This book invokes a Bourdieusian spirit to think about the ways young people are pushed and pulled by the normative demands directed at them from an early age, whilst they reflexively understand that allegedly available incentives for making the 'right' choices and working hard - financial and familial security, social status and job satisfaction - are a declining prospect. In *Youth, Class and Everyday Struggles*, the figures of those classed as 'hipsters' and 'bogans' are used to analyse how representation works to form a symbolic and moral economy that produces and polices fuzzy class boundaries. Further to this, the practices of young people around DIY cultures are analysed to illustrate struggles to create a satisfying and meaningful existence while negotiating between study, work and creative passions. By thinking through different modalities of struggles, which revolve around meaning making and identity, creativity and authenticity, Threadgold brings Bourdieu's sociological practice together with theories of affect, emotion, morals and values to broaden our understanding of how young people make choices, adapt, strategise, succeed, fail and make do. *Youth, Class and Everyday Struggles* will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, of fields including: Youth Studies, Class and Inequality, Work and Careers, Subcultures, Media and Creative Industries, Social Theory and Bourdieusian Theory.

**CLOUD AND INTERNET SECURITY** Binh Nguyen, A while back I wrote two documents called 'Building a Cloud Service' and the 'Convergence Report'. They basically documented my past experiences and detailed some of the issues that a cloud company may face as it is being built and run. Based on what had transpired since, a lot of the concepts mentioned in that particular document are becoming widely adopted and/or are trending towards them. This is a continuation of that particular document and will attempt to analyse the issues that are faced as we move towards the cloud especially with regards to security. Once again, we will use past experience, research, as well as current events trends in order to write this particular report. Personal experience indicates that keeping track of everything and updating large scale documents is difficult and depending on the system you use extremely cumbersome. The other thing readers have to realise is that a lot of the time even if the writer wants to write the most detailed book ever written it's quite simply not possible. Several of my past works (something such as this particular document takes a few weeks to a few months to write depending on how much spare time I have) were written in my spare time and between work and getting an education. If I had done a more complete

job they would have taken years to write and by the time I had completed the work updates in the outer world would have meant that the work would have meant that at least some of the content would have been out of date. Dare I say it, by the time that I have completed this report itself some of the content may have come to fruition as was the case with many of the technologies with the other documents? I very much see this document as a starting point rather than a complete reference for those who are interested in technology security. Note that the information contained in this document is not considered to be correct nor the only way in which to do things. It's a mere guide to how the way things are and how we can improve on them. Like my previous work, it should be considered a work in progress. Also, note that this document has gone through many revisions and drafts may have gone out over time. As such, there will be concepts that may have been picked up and adopted by some organisations while others may have simply broken cover while this document was being drafted and sent out for comment. It also has a more strategic/business slant when compared to the original document which was more technically orientated. No illicit activity (as far as I know and have researched) was conducted during the formulation of this particular document. All information was obtained only from publicly available resources and any information or concepts that are likely to be troubling has been redacted. Any relevant vulnerabilities or flaws that were found were reported to the relevant entities in question (months have passed). Feedback/credit on any ideas that are subsequently put into action based on the content of this document would be appreciated. Any feedback on the content of this document is welcome. Every attempt has been made to ensure that the instructions and information herein are accurate and reliable. Please send corrections, comments, suggestions and questions to the author. Use of a term in this document should not be regarded as affecting the validity of any trademark or service mark. The author would appreciate and consider it courteous if notification of any and all modifications, translations, and printed versions are sent to him. Please note that this is an organic document that will change as we learn more about this new computing paradigm. The latest copy of this document can be found either on the author's website, blog, and/or <http://www.tldp.org/>

**The Human Cost of Welfare** Phil Harvey, Lisa Conyers, 2016-02-25 Why is the welfare system failing to work for so many people? This book examines the problems with the current welfare system and proposes reforms to create a smarter, smaller system that helps people improve their lives through rewarding work. Unlike other books on welfare, this one draws on the stories of more than 100 welfare recipients who are trapped in a system that keeps them underemployed and unemployed. The authors present case studies that show that being a part of a welfare program can actively result in the recipient having to limit their job efforts for fear of losing government assistance. The book examines all major U.S. welfare systems, including Temporary Assistance for Needy Families, SNAP, Medicaid, and others. The authors begin by exploring the nation's basic poverty issues and examining the relationship between work and happiness. Next, they zero in on specific

welfare programs, reporting both on their dollar costs and on the ways that they fail enrollees. The book then concludes with strategies for addressing the shortcomings of the current U.S. welfare system. This book is appropriate for readers interested in public policy, government programs, welfare, and cultural shifts in America. It adds a new perspective to the existing body of welfare scholarship by systematically assessing the impact of welfare on the receivers themselves.

*End-of-Life Care in Cardiovascular Disease* Sarah J. Goodlin, Michael W. Rich, 2014-10-08 End-of-life issues in cardiology are becoming increasingly important in the management of patients in the cardiac unit, but there is frequently a lack of understanding regarding their impact on cardiology practice. The cardiac unit is increasingly becoming the location whereby a number of key clinical decisions relating to end-of-life care are being made, such as the decision to remove medications, the appropriate removal of cardiac devices, the management of do not resuscitate orders and the requirement for other cardiac procedures in light of the management of the terminally ill cardiac patients. Those working in palliative care need input from the cardiovascular team as the cardiologist is frequently still managing these patients until they are moved to the hospice. That this move into a hospice is often delayed until the very last moment, there is considerable onus on the cardiovascular management of these patients to be much broader in scope and take account of some of the more palliative medical decisions needed in this group of patients. This concise reference will detail the practical issues open to cardiovascular physicians and those medical professionals who manage patients reaching the end of their life from a cardiology perspective. It will detail the full management options open to them to ensure that their practice is in line with the requirements of the patient nearing the end of their life whether the cause be cardiovascular in origin or who need appropriate management of secondary cardiovascular symptoms. It will also include the various ethical, cultural and geographical issues that need to be considered when managing these patients.
