*COST Action TU0905 Mid-term Conference on Structural Glass* Jan Belis, Christian Louter, Danijel Mociob, 2013-04-05

The application of glass as a structural material may seem surprising initially, yet pioneering glass structures were first built two decades ago already. Ever since, Structural Glass has been developing at a very high pace thanks to very intensive scientific and industrial research and new technological developments. Right at the heart of these rapidly evolving developments, the European COST Action TU0905 'Structural Glass - Novel Design Methods and Next Generation Products' is active. With its main goals of unifying, harmonizing and boosting the ongoing developments in structural glass research, COST Action TU0905 frequently organizes international expert meetings and Training Schools, and supports scientific research missions. This proceedings volume of the COST Action TU0905 Mid-term Conference on Structural Glass offers a great insight into the latest developments in Structural Glass by means of more than 60 peer-reviewed papers by nearly 140 authors. Contributions cover all major topics in the field, ranging from in-depth material investigations to full glass structures and facades. As such, it represents an appealing work on this very young and dynamic field, and is intended for a global readership of researchers and practitioners, including structural and civil engineers, architects, material scientists, building consultants, contractors, material suppliers and product manufacturers, as well as other professionals involved in the design and realization of structural glass projects. The COST Action TU0905 Mid-Term Conference was held as a unique event, strongly embedded in COST Action TU0905 'Structural Glass - Novel Design Methods and Next Generation Products'. As such, it reflects the Action's strong position as probably the largest Structural Glass research network worldwide, and disseminates the ultimate COST philosophy: true cooperation in Science and Technology.

Part 2 reviews the author's multisummer project of reaching the highest ground for each of the 414 counties in America's west. It's a memorable accomplishment replete with many unexpected challenges. The required perseverance and will to achieve beyond the norm is his parting message to the reader. Part 3 reviews Alaska and Hawaii county high-pointing, followed by four appendices and a 330-entry glossary of terms. With 400 pages and 236 illustrations, *A Tale of Twelve Summers* is both comprehensive and visually attractive.
