Word, Image and Experience Giselle de Nie,2023-07-07 Focusing on the works of bishop Gregory of Tours (539-594) and the poet-hagiographer Venantius Fortunatus (540-c.604), in later life bishop of Poitiers, Dr de Nie gives in these innovative studies a new understanding of the miracle stories around which much of their writing revolves, but whose bizarre dynamics appear to defy sense, which has often resulted in their dismissal as useless to the historian. These authors' perceptions of miracles - and their renderings of the human self-awareness through which miracles are perceived and happen - are analysed as attempts, mostly rooted in models from the Bible, to adjust the early Christian tradition so as to make sense of, and protect themselves in, the highly insecure environment of 6th-century Frankish Gaul. Drawing on modern anthropological and psychological studies, notably in the area of spiritual healing practices, as well as on philosophical and theological

reflections about verbal and mental imagery, she demonstrates how these can be used to throw fresh light on late antique society and its spirituality, exploring views of mind, affectivity, body, sensory phenomena, symbols, and the perception of women as well as of the qualities of images, verbal language and texts. The volume includes five essays not previously published in English.

Computational Techniques for Dental Image Analysis Kamalanand, K.,Thayumanavan, B.,Jawahar, P. Mannar,2018-10-30 With the technology innovations dentistry has witnessed in all its branches over the past three decades, the need for more precise diagnostic tools and advanced imaging methods has become mandatory across the industry. Recent advancements to imaging systems are playing an important role in efficient diagnoses, treatments, and surgeries. Computational Techniques for Dental Image Analysis provides innovative insights into computerized methods for automated analysis. The research presented within this publication explores pattern recognition, oral pathologies, and diagnostic processing. It is designed for dentists, professionals, medical educators, medical imaging technicians, researchers, oral surgeons, and students, and covers topics centered on easier assessment of complex cranio-facial tissues and the accurate diagnosis of various lesions at early stages.

The Nation's Image Jane Fulcher,2002-08-08 Professor Fulcher argues that French grand opera was a subtly used tool of the state.

Images and Ideas in Modern French Piano Music Siglind Bruhn,1997 In our visually-oriented society, music appears to stand apart from other arts. Yet just as a poet can write a poem whose focus is a painting, so musicians have composed scores based on poems, paintings, and other non-musical art forms. In instrumental music such reinterpretations are especially intriguing as the verbal or visual stimulus does not appear in performance but is rendered in musical form. In this study, Siglind Bruhn investigates how three French composers of the twentieth century, Claude Debussy, Maurice Ravel, and Olivier Messiaen, express extra-musical subtexts in their piano works. She shows how the relation between the subtexts and the musical works can be broadly categorized in terms of pictoriality and interiority. In all cases, Bruhn analyzes each musical piece and each source text in its entirety and in depth, drawing on her broad background in both literary and musical interpretation of the twentieth century. For pianists who seek to better understand an individual work, for scholars in the growing field of musical hermeneutics, and for lovers of music in general, this volume explores and makes explicit connections between music and other arts.

Republic of Images Alan Williams,1992-03 Chronicling one of the most popular national cinemas, this book traces the evolution of French filmmaking from 1895 - the year of the debut of the Cinematographe in Paris - to the present day. Williams offers a synthesis of history, biography, aesthetics and film theory.

Computer Analysis of Images and Patterns Mario Vento,Gennaro Percannella,2019-08-23 The two volume set LNCS

11678 and 11679 constitutes the refereed proceedings of the 18th International Conference on Computer Analysis of Images and Patterns, CAIP 2019, held in Salerno, Italy, in September 2019. The 106 papers presented were carefully reviewed and selected from 176 submissions.
