Encyclopedia of Geography Barney Warf, 2010-09-21 Simply stated, geography studies the locations of things and the explanations that underlie spatial distributions. Profound forces at work throughout the world have made geographical knowledge increasingly important for understanding numerous human dilemmas and our capacities to address them. With more than 1,200 entries, the Encyclopedia of Geography reflects how the growth of geography has propelled a demand for intermediaries between the abstract language of academia and the ordinary language of everyday life. The six volumes of this encyclopedia encapsulate a diverse array of topics to offer a comprehensive and useful summary of the state of the discipline in the early 21st century. Key Features Gives a concise historical sketch of geography's long, rich, and fascinating history, including human geography, physical geography, and GIS Provides succinct summaries of trends such as globalization, environmental destruction, new geospatial technologies, and cyberspace Decomposes geography into the six broad subject areas: physical geography; human geography; nature and society; methods, models, and GIS; history of geography; and geographer biographies, geographic organizations, and important social movements Provides hundreds of color illustrations and images that lend depth and realism to the text Includes a special map section Key Themes Physical Geography Human Geography Nature and Society Methods, Models, and GIS People, Organizations, and Movements History of Geography This encyclopedia strategically reflects the enormous diversity of the discipline, the multiple meanings of space itself, and the diverse views of geographers. It brings together the diversity of geographical knowledge, making it an invaluable resource for any academic library.

**The IGM/Galaxy Connection** Jessica L. Rosenberg, Mary E. Putman, 2012-12-06 This volume contains the proceedings of the meeting entitled, The IGM/Galaxy Connection: The Distribution of Baryons at  $z = 0$ . The meeting was held August 8 -10 at the National Center for Atmospheric Research (NCAR) located in Boulder, Colorado on the foothills of the Rocky Mountains (see conference photo). We organized this meeting because we felt it was time to address the link between galaxies and the intergalactic medium at low redshift. In this vein, we posed several questions to the conference participants: Where are the baryons in the local universe and in what phase do they reside? What signatures of galaxy evolution have been imprinted on the IGM? What percentage of intergalactic gas is left from the galaxy formation process? What does the distribution of baryons at  $z = 0$  tell us about the early universe? The conference was an overwhelming success with lots of friendly

interaction and discussion among the participants. At lunch we were treated to splendid views from the NCAR terrace and discussions ranging from the importance of the LSR, GSR, and LGSR velocity frames to how long the desserts would last with 90 astronomers and the hot Boulder sun. From an inventory of the baryons, to the associations between galaxies and Ly $\alpha$  absorbers, to the mechanisms by which galaxies obtain and lose gas, the conference covered many topics. The results of these endeavors are contained in these pages and eloquently summarized by Chris Impey.

**Cycles of Conquest** Edward H. Spicer,2015-09-19 After more than fifty years, *Cycles of Conquest* is still one of the best syntheses of more than four centuries of conquest, colonization, and resistance ever published. It explores how ten major Native groups in northern Mexico and what is now the United States responded to political incorporation, linguistic hegemony, community reorganization, religious conversion, and economic integration. Thomas E. Sheridan writes in the new foreword commissioned for this special edition that the book is “monumental in scope and magisterial in presentation.” *Cycles of Conquest* remains a seminal work, deeply influencing how we have come to view the greater Southwest and its peoples.

*Postcolonising the Medieval Image* Eva Frojmovic,Catherine E. Karkov,2017-03-16 Postcolonial theories have transformed literary, historical and cultural studies over the past three decades. Yet the study of medieval art and visualities has, in general, remained Eurocentric in its canon and conservative in its approaches. 'Postcolonising', as the eleven essays in this volume show, entails active intervention into the field of medieval art history and visual studies through a theoretical reframing of research. This approach poses and elicits new research questions, and tests how concepts current in postcolonial studies - such as diaspora and migration, under-represented artistic cultures, accented art making, displacement, intercultural versus transcultural, hybridity, presence/absence - can help medievalists to reinvigorate the study of art and visuality. Postcolonial concepts are deployed in order to redraft the canon of medieval art, thereby seeking to build bridges between medievalist and modernist communities of scholars. Among the varied topics explored in the volume are the appropriation of Roman iconography by early medieval Scandinavian metalworkers, multilingualism and materiality in Anglo-Saxon culture, the circulation and display of Islamic secular ceramics on Pisan churches, cultural negotiation by Jewish minorities in Central Europe and the Iberian peninsula, Holy Land maps and medieval imaginative geography, and the uses of Thomas Becket in the colonial imaginary of the Plantagenet court.

Images of Islam, 1453-1600 Charlotte Colding Smith,2015-10-06 Using evidence from contemporary printed images, Smith examines the attitudes of Christian Europe to the Ottoman Empire and to Islam. She also considers the relationship between text and image, placing it in the cultural context of the Reformation and beyond.

*Early Images of the Americas* Jerry M. Williams,Robert E. Lewis,2022-08-30 Contributions from anthropology, history, political science, literature, the natural sciences, religion, and philosophy provide a comprehensive overview of the diverse influences America had on Europe. Topics covered include the impact of early botanical and geographic studies on Europe and on the scientific revolution, the structure of indigenous and colonial cultures, and the ideology and ethics of conquest and enslavement. Together, these essays constitute a reevaluation of the images held by the first colonists via new ways of understanding some of the main figures, processes, and events of that era.

*"In His Image and Likeness"* Kristin Zapalac,2019-05-15 In this ground-breaking book, Kristin Zapalac brings together the methods of social, intellectual, and art history to achieve a new understanding of how the Protestant Reformation altered the terms of political discourse in a German free imperial city. In Zapalac's view, visual and verbal images, many of them having their origins in conceptions of the sacred, were more central to sixteenth-century political thought within the city walls than was the rationalized language of law. Drawing on a wealth of sources including bookbindings, sermons, wills, frescoes, decrees, and woodcuts, she traces the impact of religious change on the languages of judgment and authority used in the city of Regensburg, and thereby sheds light on the nature of political thought in early modern Germany.

**On Telling Images of China** Shane McCausland,Yin Hwang,2013-11-01 The essays in this volume address a diverse range of issues in China's narrative art and visual culture mainly from the Ming dynasty (1368-1644) to the present. These studies attend to the complex ways in which images circulate in pictorial media and across boundaries between 'high art' and popular culture—images in paintings, prints, stone engravings and posters, as well as in film and video art. In addition, the authors examine the roles of ancient exemplary stories and textual narratives, as well as their reiteration in the visual arts in early modern and modern social and political contexts. The volume is divided into three sections: Representing Paradigms, Interpreting Literary Themes and Narratives, and the Medium and Modernity. While the essays in each section deal with concerns in the field of China's art history, an editors' introduction serves to position the topic of narrative art and to introduce definitions and genre issues which run through the book. As a whole, the volume invites reflection on the intrinsic nature of narratives and their pictorial lives, and presents new research which challenges established views and paradigms.

*King's Sister - Queen of Dissent: Marguerite of Navarre (1492-1549) and her Evangelical Network (set 2 volumes)* Jonathan Reid,2009-06-24 This study reconstructs for the first time Marguerite of Navarre's leadership of a broad circle of nobles, prelates, humanist authors, and commoners, who sought to advance the reform of the French church along evangelical (Protestant) lines. Hitherto misunderstood in scholarship, they are revealed to have pursued, despite persecution,

a consistent reform program from the Meaux experiment to the end of Francis I's reign through a variety of means: fostering local church reform, publishing a large corpus of religious literature, high-profile public preaching, and attempting to shape the direction of royal policy. Their distinctive doctrines, relations with major reformers – including their erstwhile colleague Calvin – involvement in major Reformation events, and the impact of their unsuccessful attempt are all explored.

**Image Encounters** Lisa Trever, 2022-02-08 Moche murals of northern Peru represent one of the great, yet still largely unknown, artistic traditions of the ancient Americas. Created in an era without written scripts, these murals are key to understandings of Moche history, society, and culture. In this first comprehensive study on the subject, Lisa Trever develops an interdisciplinary methodology of “archaeo art history” to examine how ancient histories of art can be written without texts, boldly inverting the typical relationship of art to archaeology. Trever argues that early coastal artistic traditions cannot be reduced uncritically to interpretations based in much later Inca histories of the Andean highlands. Instead, the author seeks the origins of Moche mural art, and its emphasis on figuration, in the deep past of the Pacific coast of South America. *Image Encounters* shows how formal transformations in Moche mural art, before and after the seventh century, were part of broader changes to the work that images were made to perform at Huacas de Moche, El Brujo, Pañamarca, and elsewhere in an increasingly complex social and political world. In doing so, this book reveals alternative evidentiary foundations for histories of art and visual experience.
