The Crafted World of Wharton Esherick Sarah Archer, Colin Fanning, Ann Glasscock, Holly Gore, Emily Zilber, 2024-10-01 Widely celebrated as the father of the Studio Furniture Movement, Wharton Esherick is one of the most important furniture designers of the twentieth century. Presenting his preserved hillside house and studio, this book showcases seven decades of innovative woodwork and sculpture, embodying his influence on American art and design. Wharton Esherick (1887-1970) stands as a pivotal figure in 20th-century American art, craft, and design. Now known as the Wharton Esherick Museum, the artist's self-proclaimed "autobiography in three dimensions" on Valley Forge Mountain, constructed between 1926 and 1966, served as his creative epicenter and a vibrant community hub. To introduce Esherick's visionary work to a broader public, this book draws on the museum's collection of almost 3,000 objects, many never before seen outside his home and studio, following Esherick's evolution from paintings and woodcut illustrations to his revolutionary fusion of furniture and organic sculpture. Through fully contextualizing iconic works in Esherick's own space, this book immerses readers in his creative world while capturing his unparalleled artistic contributions to the realms of furniture, architecture, prints, drawings, and sculpture.

The Image of the Middle Ages in Romantic and Victorian Literature Kevin L. Morris, 2019-06-26 Originally published in 1984, *The Image of the Middle Ages in Romantic and Victorian Literature* looks at the impact of medievalism in the 18th and 19th centuries and the importance of post-Enlightenment literary religious medievalism. The book suggests that religious medievalism was not a superficial cultural phenomenon and that the romantic spirit with which it was chronologically connected, was intimately associated with the metaphysical. The book suggests that this belief gave birth to the metaphysical yearning and cultural expression of the eighteenth and nineteenth century. The book seeks to clarify the post-Enlightenment relationship between aesthetic culture and 'aesthetic' religion, romanticism, medievalism and religious trends.

This theoretically informed research explores what the development and transformation of air travel has meant for societies and individuals. Brings together a number of interdisciplinary approaches towards the aeroplane and its relation to society Presents an original theory that our societies are aerial societies, or 'aerealities', and shows how we are both enabled and threatened by aerial mobility Features a series of detailed international case studies which map the history of aviation over the past century - from the promises of early flight, to World War II bombing campaigns, and to the rise of international terrorism today Demonstrates the transformational capacity of air transport to shape societies, bodies and individual identities Offers startling historical evidence and bold new ideas about how the social and material spaces of the aeroplane are considered in the modern era

An Image of God Sharon M. Leon,2013-06-05 During the first half of the twentieth century, supporters of the eugenics movement offered an image of a racially transformed America by curtailing the reproduction of “unfit” members of society. Through institutionalization, compulsory sterilization, the restriction of immigration and marriages, and other methods, eugenicists promised to improve the population—a policy agenda that was embraced by many leading intellectuals and public figures. But Catholic activists and thinkers across the United States opposed many of these measures, asserting that “every man, even a lunatic, is an image of God, not a mere animal. In *An Image of God*, Sharon Leon examines the efforts of American Catholics to thwart eugenic policies, illuminating the ways in which Catholic thought transformed the public conversation about individual rights, the role of the state, and the intersections of race, community, and family. Through an examination of the broader questions raised in this debate, Leon casts new light on major issues that remain central in American political life today: the institution of marriage, the role of government, and the separation of church and state. This is essential reading in the history of religion, science, politics, and human rights.

The Lure of the Image Daniel Morgan, 2021-08-17 The Lure of the Image shows how a close study of camera movement challenges key assumptions underlying a wide range of debates within cinema and media studies. Highlighting the shifting intersection of point of view and camera position, Daniel Morgan draws on a range of theoretical arguments and detailed analyses across cinemas to reimagine the relation between spectator and camera—and between camera and film world. With sustained accounts of how the camera moves in films by Fritz Lang, Guru Dutt, Max Ophuls, and Terrence Malick and in contemporary digital technologies, The Lure of the Image exposes the persistent fantasy that we move with the camera within the world of the film and examines the ways that filmmakers have exploited this fantasy. In so doing, Morgan provides a more flexible account of camera movement, one that enables a fuller understanding of the political and ethical stakes entailed by this key component of cinematic style.
