The Foundation Operating clandestine and worldwide, the Foundation operates beyond jurisdiction, empowered and entrusted by every major national government with the task of containing anomalous objects, entities, and phenomena. These anomalies pose a significant threat to global security by threatening either physical or psychological harm. The Foundation operates to maintain normalcy, so that the worldwide civilian population can live and go on with their daily lives without fear, mistrust, or doubt in their personal beliefs, and to maintain human independence from extraterrestrial, extradimensional, and other extranormal influence. Our mission is three-fold: Secure The Foundation secures anomalies with the goal of preventing them from falling into the hands of civilian or rival agencies, through extensive observation and surveillance and by acting to intercept such anomalies at the earliest opportunity. Contain The Foundation contains anomalies with the goal of preventing their influence or effects from spreading, by either relocating, concealing, or dismantling such anomalies or by suppressing or preventing public dissemination of knowledge thereof. Protect The Foundation protects humanity from the effects of such anomalies as well as the anomalies themselves until such time that they are either fully understood or new theories of science can be devised based on their properties and behavior. ————— About the ebook This ebook is an offline edition of the second series of fictional documentation from the SCP Foundation Wiki. Image and Logic Peter Galison,1997-10 Engages with the impact of modern technology on experimental physicists. This study reveals how the increasing scale and complexity of apparatus has distanced physicists from the very science which drew them into experimenting, and has fragmented microphysics into different technical traditions.

The History of Television, 1942 to 2000 Albert Abramson, 2007-09-29 Albert Abramson published (with McFarland) in 1987 a landmark volume titled *The History of Television, 1880-1941* (massive...research--Library Journal; voluminous documentation--Choice; many striking old photos--The TV Collector). At last he has produced the follow-up volume; the reader may be assured there is no other book in any language that is remotely comparable to it. Together, these two volumes provide the definitive technical history of the medium. Upon the development in the mid-1940s of new cameras and picture tubes that made commercial television possible worldwide, the medium rose rapidly to prominence. Perhaps even more important was the invention of the video tape recorder in 1956, allowing editing, re-shooting and rebroadcasting. This second volume, 1942 to 2000 covers these significant developments and much more. Chapters are devoted to television during World War II and the postwar era, the development of color television, Ampex Corporation's contributions, television in Europe, the change from helical to high band technology, solid state cameras, the television coverage of Apollo II, the rise of electronic journalism, television entering the studios, the introduction of the camcorder, the demise of RCA at the hands of GE, the domination of Sony and Matsushita, and the future of television in e-cinema and the 1080 P24 format. The book is heavily illustrated (as is the first volume).

Genealogy, Archive, Image Jayasinhji Jhala, 2018-07-19 'Genealogy, Archive, Image' addresses the ways in which history and tradition are 'reinvented' through text, memory and painting. It examines the making of dynastic history in the kingdom of Jhalavad, situated in Gujarat, western India, over the *longue durée*, from the eleventh to twentieth centuries. The essays critique a collection of contemporary miniature paintings, which chart the dynastic history of Jhalavad's rulers and the textual and ethnographic archive upon which they are based. A multidisciplinary work, it crosses the boundaries of history, anthropology, folklore and mythology, gender, musicology, literary studies, and visual, film and digital media. The essays draw upon a variety of voices, spanning various religious and ethnic communities, including Hindus, Muslims, Jains, Parsees and Siddhi Africans, and caste identities, such as that of the bard, ballad singer, king, priest, court chronicler, soldier, mason and drummer.

Images of the U.S. around the World Yahya R. Kamalipour, 1999-01-01 Examines how peoples of other nations perceive the U.S., how media of other nations portray the U.S., and how exported media products impact the U.S. image around the world.

Mediated Images of the South Alison Slade, Dedria Givens-Carroll, Amber J. Narro, 2012 *Mediated Images of the South: The Portrayal of Dixie in Popular Culture*, edited by Alison F. Slade, Dedria Givens-Carroll and Amber J. Narro, is an anthology that explores the impact of the image of the Southerner within mass communication and popular culture. The contributors offer a contemporary analysis of the Southerner in the media. In most cases, previous literature situates these media images in the past, most notably through historic analyses of the Southerner during the Civil Rights movement. *Mediated Images of the South* breaks out of the box of the 1960s and 1970s by including the most recent and contemporary cultural examples of the Southerner. This book represents a long overdue analysis of those images, from both the past and the present. In addition, the discussions are not limited to one genre of media, but provide the reader with an opportunity to see how far-reaching the myth of the Southerner and the Southern image is in American society. While there is a long list of successful southern politicians, historical figures, businessmen and women, actors and actresses, sports figures and other national and world leaders, Slade, Givens-Carroll, and Narro find that there is still work to be done to present southerners as capable and educated.

Images of the Art Museum Eva-Maria Troelenberg, Melania Savino, 2017-02-06 In recent years, the emerging field of museum studies has seen rapid expansion in the critical study of museums and scholars started to question the institution and its functions. To contribute differentiated viewpoints to the currently evolving meta-discourse on the museum, this volume aims to investigate how the institution of the museum has been visualized and translated into different kinds of images and how these images have affected our perception of these institutions. In this interdisciplinary collection, scholars from a variety of academic backgrounds, including art history, heritage, museums studies and architectural history, explore a broad range of case studies stretching across the globe. The volume opens up debate about the epistemological and historiographical significance of a variety of different images and representations of the Art Museum, including the transformation or adaptation of the image of the art museum across periods and cultures. In this context, this volume aims to develop a new theoretical framework while proposing new methodological tools and resources for the analysis of museological representations on a global scale.

The Image of Mesopotamian Divine Healers Irene Sibbing-Plantholt, 2022-04-04 This volume exposes one of the world's oldest medical marketplaces and the emergence of medical professionalization within it. Through an unprecedented analysis of the Mesopotamian healing goddesses as well as asûs, a diverse group of "healers", Irene Sibbing-Plantholt demonstrates that from the Middle Babylonian period onwards, the goddess Gula was employed as a divine legitimization model for scholarly, professional asûs. With this work, Sibbing-Plantholt provides a unique insight in processes of medical competition and legitimization in ancient Mesopotamia, which speak to similar processes in other societies.

Image and Reality of the Israel-Palestine Conflict Norman G. Finkelstein, 2016-03-15 This acclaimed study surveys the dominant popular and scholarly images of the Israel-Palestine conflict. Finkelstein opens with a theoretical discussion of Zionism, locating it as a romantic form of nationalism that assumed the bankruptcy of liberal democracy. He goes on to look at the demographic origins of the Palestinians, with particular reference to the work of Joan Peters, and develops critiques of the influential studies of both Benny Morris and Anita Shapira. Reviewing the diplomatic history with Aban Eban's oeuvre as his foil, Finkelstein closes by demonstrating that the casting of Israel as the innocent victim of Arab aggression in the June 1967 and October 1973 wars is not supported by the documentary record. This new edition critically reexamines dominant popular and scholarly images in the light of the current failures of the peace process.
