The Texture of Images Livia Cárdenas, 2020-11-16 This study is the first fundamental analysis and synopsis of the printed relic-book genre. Printed relic books represent, both by image and text, precious reliquaries, which were presented to the faithful audience during special liturgical feasts, the display of relics. This study brings into focus the specific aesthetics of these relic books and explores the immense influence that patrons had on figuration as well as on the forms of these books. The analysis focuses on the interaction of image and text as manifestation of authenticity. This book then contributes to clarifying the complex medial role of printing with movable type in its early period and offers a novel interpretation of the cultural significance of artefacts in the Renaissance. This book is a translation of *Die Textur des Bildes: Das Heiltumsbuch im Kontext religiöser Medialität des Spätmittelalters* (De Gruyter, 2013)

Medical Image Computing and Computer-Assisted Intervention - MICCAI 2002 Takeyoshi Dohi, Ron Kikins, 2003-06-30 The fifth international Conference in Medical Image Computing and Computer Assisted Intervention (MICCAI 2002) was held in Tokyo from September 25th to 28th, 2002. This was the first time that the conference was held in Asia since its foundation in 1998. The objective of the conference is to offer clinicians and scientists the opportunity to collaboratively create and explore the new medical field. Specifically, MICCAI offers a forum for the discussion of the state of art in computer-assisted interventions, medical robotics, and image processing among experts from multi-disciplinary professions, including but not limited to clinical doctors, computer scientists, and mechanical and biomedical engineers. The expectations of society are very high; the advancement of medicine will depend on computer and device technology in coming decades, as they did in the last decades. We received 321 manuscripts, of which 41 were chosen for oral presentation and 143 for poster presentation. Each paper has been included in these proceedings in eight-page full paper format, without any differentiation between oral and poster papers. Adherence to this full paper format, along with the increased number of

manuscripts, surpassing all our expectations, has led us to issue two proceedings volumes for the first time in MICCAI's history. Keeping to a single volume by assigning fewer pages to each paper was certainly an option for us considering our budget constraints. However, we decided to increase the volume to offer authors maximum opportunity to argue the state of art in their work and to initiate constructive discussions among the MICCAI audience.

Handbook of Image Engineering Yu-Jin Zhang,2021-01-04 Image techniques have been developed and implemented for various purposes, and image engineering (IE) is a rapidly evolving, integrated discipline comprising the study of all the different branches of image techniques, and encompassing mathematics, physics, biology, physiology, psychology, electrical engineering, computer science and automation. Advances in the field are also closely related to the development of telecommunications, biomedical engineering, remote sensing, surveying and mapping, as well as document processing and industrial applications. IE involves three related and partially overlapping groups of image techniques: image processing (IP) (in its narrow sense), image analysis (IA) and image understanding (IU), and the integration of these three groups makes the discipline of image engineering an important part of the modern information era. This is the first handbook on image engineering, and provides a well-structured, comprehensive overview of this new discipline. It also offers detailed information on the various image techniques. It is a valuable reference resource for R&D professional and undergraduate students involved in image-related activities.

The Early Modern Global South in Print Sandra Young,2016-03-23 Early modern geographers and compilers of travel narratives drew on a lexicon derived from cartography's seemingly unchanging coordinates to explain human diversity. Sandra Young's inquiry into the partisan knowledge practices of early modernity brings to light the emergence of the early modern global south. Young proposes a new set of terms with which to understand the racialized imaginary inscribed in the

scholarly texts that presented the peoples of the south as objects of an inquiring gaze from the north. Through maps, images and even textual formatting, equivalences were established between 'new' worlds, many of them long known to European explorers, she argues, in terms that made explicit the divide between 'north' and 'south.' This book takes seriously the role of form in shaping meaning and its ideological consequences. Young examines, in turn, the representational methodologies, or 'artes,' deployed in mapping the 'whole' world: illustrating, creating charts for navigation, noting down observations, collecting and cataloguing curiosities, reporting events, formatting materials, and editing and translating old sources. By tracking these methodologies in the lines of beauty and evidence on the page, we can see how early modern producers of knowledge were able to attribute alterity to the 'southern climes' of an increasingly complex world, while securing their own place within it.

"In His Image and Likeness" Kristin Zapalac, 2019-05-15 In this ground-breaking book, Kristin Zapalac brings together the methods of social, intellectual, and art history to achieve a new understanding of how the Protestant Reformation altered the terms of political discourse in a German free imperial city. In Zapalac's view, visual and verbal images, many of them having their origins in conceptions of the sacred, were more central to sixteenth-century political thought within the city walls than was the rationalized language of law. Drawing on a wealth of sources including bookbindings, sermons, wills, frescoes, decrees, and woodcuts, she traces the impact of religious change on the languages of judgment and authority used in the city of Regensburg, and thereby sheds light on the nature of political thought in early modern Germany.

Weekly Compilation of Presidential Documents,

On Telling Images of China Shane McCausland, Yin Hwang, 2013-11-01 The essays in this volume address a diverse range of issues in China's narrative art and visual culture mainly from the Ming dynasty (1368-1644) to the present. These studies attend to the complex ways in which images circulate in pictorial media and across boundaries between 'high art' and popular culture—images in paintings, prints, stone engravings and posters, as well as in film and video art. In addition, the authors examine the roles of ancient exemplary stories and textual narratives, as well as their reiteration in the visual arts in early modern and modern social and political contexts. The volume is divided into three sections: Representing Paradigms,

Interpreting Literary Themes and Narratives, and the Medium and Modernity. While the essays in each section deal with concerns in the field of China's art history, an editors' introduction serves to position the topic of narrative art and to introduce definitions and genre issues which run through the book. As a whole, the volume invites reflection on the intrinsic nature of narratives and their pictorial lives, and presents new research which challenges established views and paradigms.

Images of the Byzantine World Angeliki Lymberopoulou, 2011 The focus of this volume is the identification of 'visions', 'messages', and 'meanings' in various facets of Byzantine culture and the possible differences perceived by their original audience and modern scholars. It addresses how far interpretations should go, whether there is a tendency to read too much into too little, or whether not enough attention is paid to apparent detail that may have been important in historical context. The essays span a wide chronological era, so present a means of assessing the relative degrees of continuity and change in Byzantine visions, messages and meanings over time.
