*Image and Identity* Dauvit Broun,2001-01-01 This volume looks at the way that perceptions of Scottish identity have changed through the centuries, from early medieval to modern times. 'The idea of Scotland as a single country, corresponding to the realm of the king of Scots, and of the Scots as all the kingdom's inhabitants, may only have taken root during the 13th century.' - Dauvit Broun 'The 18th century is marked by a period of often competing Scottish identities, and the emergence of the British state as a complicating factor in the equation.' - R. J. Finlay 'Scottish identity has never been a fixed, immutable idea, whether held in the head or in the gut . . . some of the most enduring myths of Scotland's Protestant identity were, like Ireland's Catholic identity, creations of the 19th century: they included Jenny Geddes as a Protestant Dame Scotia, throwing a stool into the works of an Anglican-style church, and the Magdalen Chapel in Edinburgh, the home of a staunchly Catholic graft guild throughout much of the 1560s becoming the workshop of the Reformation in John Knox's time.' - Michael Lynch

**Genealogy, Archive, Image** Jayasinhji Jhala, 2018-07-19 'Genealogy, Archive, Image' addresses the ways in which history and tradition are 'reinvented' through text, memory and painting. It examines the making of dynastic history in the kingdom of Jhalavad, situated in Gujarat, western India, over the longue durée, from the eleventh to twentieth centuries. The essays critique a collection of contemporary miniature paintings, which chart the dynastic history of Jhalavad's rulers and the textual and ethnographic archive upon which they are based. A multidisciplinary work, it crosses the boundaries of history,

anthropology, folklore and mythology, gender, musicology, literary studies, and visual, film and digital media. The essays draw upon a variety of voices, spanning various religious and ethnic communities, including Hindus, Muslims, Jains, Parsees and Siddhi Africans, and caste identities, such as that of the bard, ballad singer, king, priest, court chronicler, soldier, mason and drummer.

**Images of Familial Intimacy in Eastern and Western Art**, 2014-02-20 Images of Familial Intimacy in Eastern and Western Art offers a comparative art and socio-historical analysis of selected images of familial intimacy in Asia and Europe from the pre-modern era to the present day based on an examination of the value systems and expectations existing at the time in the regions in which the works were created. A wide variety of images are discussed ranging from family portraits and depictions of the home in seventeenth-century Dutch genre paintings, ukiyoe prints and fusuma sliding wall panels of the Edo period, to familial images made after the Korean War of 1950-53, providing the reader with a rare insight into the evolution East and West of the cultural norms and customs impacting on the family and personal space.

**Images and Objects in Ritual Practices in Medieval and Early Modern Northern and Central Europe** Krista Kodres, Anu Mänd, 2014-07-18 This multidisciplinary collection of essays explores the functions, meanings and use of images and objects in various late Medieval and Early Modern social practices, which were linked by their ritual character. The book approaches 'ritual' as an action which is discussed under the general umbrella term "performative practice", and is characterised by a synthesis between the repetitive and the extraordinary that carries an intense symbolic meaning and is emotionally charged. Images, spaces and rituals were closely interconnected in both the religious and the secular spheres, and played a relevant role in the symbolic communication of the time. The essays in this volume are devoted to a complex study of these phenomena in Northern and Central Europe, including regions which, due to linguistic or cultural barriers, have thus far received comparatively little attention in Anglo-American scholarship, including Scandinavia, Poland and the Baltic states.

**Speech, Print and Decorum in Britain, 1600--1750** Elspeth Jajdelska, 2016-03-10 Filling an important gap in the history of print and reading, Elspeth Jajdelska offers a new account of the changing relationship between speech, rank and writing from 1600 to 1750. Jajdelska draws on anthropological findings to shed light on the different ways that speech was understood to relate to writing across the period, bringing together status and speech, literary and verbal decorum, readership, the material text and performance. Jajdelska's ambitious array of sources includes letters, diaries, paratexts and genres from cookery books to philosophical discourses. She looks at authors ranging from John Donne to Jonathan Swift, alongside the writings of anonymous merchants, apothecaries and romance authors. Jajdelska argues that Renaissance readers were likely to approach written and printed documents less as utterances in their own right and more as representations of past speech or as scripts for future speech. In the latter part of the seventeenth century, however, some readers were treating books as proxies for the author's speech, rather than as representations of it. These adjustments in the way speech and print were understood had implications for changes in decorum as the inhibitions placed on lower-ranking authors in the Renaissance gave way to increasingly open social networks at the start of the eighteenth century. As a result,

authors from the lower ranks could now publish on topics formerly reserved for the more privileged. While this apparently egalitarian development did not result in imagined communities that transcended class, readers of all ranks did encounter new models of reading and writing and were empowered to engage legitimately in the gentlemanly criticism that had once been the reserve of the cultural elites. **Religions of the World [6 volumes]** J. Gordon Melton, Martin Baumann, 2010-09-21 This masterful six-volume encyclopedia provides comprehensive, global coverage of religion, emphasizing larger religious communities without neglecting the world's smaller religious outposts. *Religions of the World, Second Edition: A Comprehensive Encyclopedia of Beliefs and Practices* is an extraordinary work, bringing together the scholarship of some 225 experts from around the globe. The encyclopedia's six volumes offer entries on every country of the world, with particular emphasis on the larger nations, as well as Indonesia and the Latin American countries that are traditionally given little attention in English-language reference works. Entries include profiles on religion in the world's smallest countries (the Vatican and San Marino), profiles on religion in recently established or disputed countries (Kosovo and Nagorno-Karabakh), as well as profiles on religion in some of the world's most remote places (Antarctica and Easter Island). *Religions of the World* is unique in that it is based in religion on the ground, tracing the development of each of the 16 major world religious traditions through its institutional expressions in the modern world, its major geographical sites, and its major celebrations. Unlike other works, the encyclopedia also covers the world of religious unbelief as expressed in atheism, humanism, and other traditions.

*Handbook of Image Engineering* Yu-Jin Zhang, 2021-01-04 Image techniques have been developed and implemented for various purposes, and image engineering (IE) is a rapidly evolving, integrated discipline comprising the study of all the different branches of image techniques, and encompassing mathematics, physics, biology, physiology, psychology, electrical engineering, computer science and automation. Advances in the field are also closely related to the development of telecommunications, biomedical engineering, remote sensing, surveying and mapping, as well as document processing and industrial applications. IE involves three related and partially overlapping groups of image techniques: image processing (IP) (in its narrow sense), image analysis (IA) and image understanding (IU), and the integration of these three groups makes the discipline of image engineering an important part of the modern information era. This is the first handbook on image engineering, and provides a well-structured, comprehensive overview of this new discipline. It also offers detailed information on the various image techniques. It is a valuable reference resource for R&D professional and undergraduate students involved in image-related activities.

**Britain and the Continent 1660–1727** Christina Strunck, 2021-10-04 This monograph examines the most prestigious political paintings created in Britain during the High Baroque age. It investigates a period characterized by numerous social,

political, and religious crises, in the years between the restoration of the Stuart monarchy (1660) and the death of the first British monarch from the House of Hanover (1727). On the basis of hitherto unpublished documents, the book elucidates the creation and reception of nine major commissions that involved the court, private aristocratic patrons, and/or civic institutions. The ground-breaking new interpretations of these works focus on strategies of conflict resolution, the creation of shared cultural memories, processes of cultural translation, the performative context of the murals and the interaction of painted images and architectural spaces.

*Printed Images in Early Modern Britain* Michael Hunter,2016-12-05 Printed images were ubiquitous in early modern Britain, and they often convey powerful messages which are all the more important for having circulated widely at the time. Yet, by comparison with printed texts, these images have been neglected, particularly by historians to whom they ought to be of the greatest interest. This volume helps remedy this state of affairs. Complementing the online digital library of British Printed Images to 1700 ([www.bpi1700.org.uk](http://www.bpi1700.org.uk)), it offers a series of essays which exemplify the many ways in which such visual material can throw light on the history of the period. Ranging from religion to politics, polemic to satire, natural science to consumer culture, the collection explores how printed images need to be read in terms of the visual syntax understood by contemporaries, their full meaning often only becoming clear when they are located in the context in which they were produced and deployed. The result is not only to illustrate the sheer richness of material of this kind, but also to underline the importance of the messages which it conveys, which often come across more strongly in visual form than through textual commentaries. With contributions from many leading exponents of the cultural history of early modern Britain, including experts on religion, politics, science and art, the book's appeal will be equally wide, demonstrating how every facet of British culture in the period can be illuminated through the study of printed images.

Iceland and Images of the North Sumarlidi Isleifsson,Daniel Chartier,2011-05-20T00:00:00-04:00 With a radically changing world, cultural identity and images have emerged as one of the most challenging issues in the social and cultural sciences. These changes provide an occasion for a thorough reexamination of cultural, historical, political, and economic aspects of society. The INOR (Iceland and Images of the North) group is an interdisciplinary group of Icelandic and non-Icelandic scholars whose recent research on contemporary and historical images of Iceland and the North seeks to analyze the forms these images assume, as well as their function and dynamics. The 21 articles in this book allow readers to seize the variety and complexity of the issues related to images of Iceland.
