New York Magazine ,1974-11-11 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Space-Time Perspectives on Early Colonial Moquegua Prudence M. Rice,2013-11-02 In this rich study of the construction and reconstruction of a colonized landscape, Prudence M. Rice takes an implicit political ecology approach in exploring encounters of colonization in Moquegua, a small valley of southern Peru. Building on theories of spatiality, spatialization, and place, she examines how politically mediated human interaction transformed the physical landscape, the people who inhabited it, and the resources and goods produced in this poorly known area. Space-Time Perspectives on Early Colonial Moquegua looks at the encounters between existing populations and newcomers from successive waves of colonization, from indigenous expansion states (Wari, Tiwanaku, and Inka) to the foreign Spaniards, and the way each group “re-spatialized” the landscape according to its own political and economic ends. Viewing these spatializations from political, economic, and religious perspectives, Rice considers both the ideological and material occurrences. Concluding with a special focus on the multiple space-time considerations involved in Spanish-inspired ceramics from the region, Space-Time Perspectives on Early Colonial Moquegua integrates the local and rural with the global and urban in analyzing the events and processes of colonialism. It is a vital contribution to the literature of Andean studies and will appeal to students and scholars of

archaeology, historical archaeology, history, ethnohistory, and globalization.

Russian Archaism Irina Shevelenko,2024-08-15 Russian Archaism considers the aesthetic quest of Russian modernism in relation to the nation-building ideas that spread in the late imperial period. Irina Shevelenko argues that the cultural milieu in Russia, where the modernist movement began as an extension of Western trends at the end of the nineteenth century, soon became captivated by nationalist indoctrination. Members of artistic groups, critics, and theorists advanced new interpretations of the goals of aesthetic experimentation that would allow them to embed the nation-building agenda within the aesthetic one. Shevelenko's book focuses on the period from the formation of the World of Art group (1898) through the Great War and encompasses visual arts, literature, music, and performance. As Shevelenko shows, it was the rejection of the Russian westernized tradition, informed by the revival of populist sensibilities across the educated class, that played a formative role in the development of Russian modernist agendas, particularly after the 1905 revolution. Russian Archaism reveals the modernist artistic enterprise as a crucial source of insight into Russia's political and cultural transformation in the early twentieth century and beyond.
