An Introduction to Design and Culture Penny Sparke,2019-08-28 An Introduction to Design and Culture provides a comprehensive guide to the changing relationships between design and culture from 1900 to the present day with an emphasis on five main themes: Design and consumption Design and technology The design profession Design theory Design and identities. This fourth edition extends the traditional definition of design as covering product design, furniture design, interior design, fashion design and graphic design to embrace its more recent manifestations, which include service design, user-interface design, co-design, and sustainable design, among others. It also discusses the relationship between design and the new media and the effect of globalisation on design. Taking a broadly chronological approach, Professor Sparke employs historical methods to show how these themes developed through the twentieth century and into the twenty-first century and

played a role within modernism, postmodernism and beyond. Over a hundred illustrations are used throughout to demonstrate the breadth of design and examples - among them design in Modern China, the work of Apple Computers Ltd., and design thinking - are used to elaborate key ideas. The new edition remains essential reading for undergraduate and postgraduate students of design studies, cultural studies and visual arts.

*A Separate Sphere* Cynthia Amnéus, 2003 Dressmaking, considered a natural extension of women's proper work in the home, was a common and lucrative employment for women in the nineteenth and early twentieth centuries. It afforded creative expression, prestige in the community, and even the possibility of financial independence. Yet as entrepreneurs, dressmakers faced unique business pressures, and with the advent of department stores and widespread mass production of women's clothing, most were forced out of business. Coinciding with the exhibition Cynthia Amneus organized for the Cincinnati Art Museum, this work examines the nineteenth-century ideology of women's separate sphere, the early feminist movement, women in the workplace, and dressmakers as artisans and professionals. More than 140 stunning custom-made garments, historical photographs, and dressmakers' labels document the superb artistic and technical skill of the women who produced fashionable dress in Cincinnati from 1877 to 1922. Bracketing Amneus's incisive study are essays by Anne Bissonnette on the eccentric tea gown, Marla Miller on the pitfalls of researching women's cultural work, and Shirley Teresa Wajda on the dressmakers' wealthy clientele. In all, *A Separate Sphere* offers a careful look into the lives of women struggling with ideological boundaries. Chronicling choices made by and imposed on both working-class women and their affluent counterparts, it reveals how these women managed to enhance their prescribed sphere for themselves and for the community at large. Anne Bissonnette is costume curator at Kent State University Museum. Her most recent exhibition is *The Hours of the Woman of Leisure*. Marla Miller teaches history at the University of Massachusetts, Amherst. Her book on craftswomen in rural New England, 1740-1820, is forthcoming from the University of Massachusetts Press. Shirley Teresa Wajda teaches history and American studies at Kent State University. Her book *Social Currency: Commercial Portrait Photography and the Fashioning of an American Middle Class, 1839-1889* is forthcoming from Temple University Press.

*Literature and Material Culture from Balzac to Proust* Janell Watson,2000-01-13 This book addresses the issues of collecting, consuming, classifying and describing the curiosities, antiques and objets d'art that proliferated in French literary texts during the last decades of the nineteenth century. After Balzac made such issues significant in canonical literature, the Goncourt brothers, Huysmans, Mallarmé and Maupassant celebrated their golden age. Flaubert and Zola scorned them. Rachilde and Lorrain perverted them. Proust commemorated their last moments of glory. Focusing on the bibelot (the modern French term for knick-knack, curiosity or other collectible), Janell Watson shows how the sudden prominence given to curiosities and collecting in nineteenth-century literature signals a massive change in attitudes to the world of goods, which in turn restructured the literary text according to the practical logic of daily life, calling into question established scholarly notions of order. Her study makes an important contribution to the literary history of material culture.

*Industrial Design and Artistic Expression* Barbara Pasa,2020-03-09 The complex nature of industrial design, which combines functional and aesthetic elements, allows different modes of protection: cumulative, separate or partially overlapping regimes are applicable according to different legal systems. The legal framework is rapidly changing, especially in Europe where the principle of cumulation of a special sui generis regime for protecting industrial design with copyright rules has been established. In the last decade, national courts of some Member States conferred to the “cumulative regime” a peculiar meaning, other courts enforced design rights in line with the interpretation given by the Court of Justice of the EU. The copyright/design interface is presented here to a wider, non-specialist audience, taking as a starting point the notion of industrial design derived from design studies, on the border between art and science.

Watson,2008-04-30 This popular text effectively explains and justifies the use of the sociological imagination to understand the nature of institutions of work, occupations, organizations, management and employment, and how they are changing in the twenty-first century.
