The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Founders of American Industrial Design Carroll Gantz,2014-07-17 As the Great Depression started in 1929, several dozen creative individuals from a variety of artistic fields, including theatre, advertising, graphics, fashion and furniture design, pioneered a new profession. Responding to unprecedented public and industry demand for new styles, these artists entered the industrial world during what was called the Machine Age, to introduce modern design to the external appearance and form of mass-produced, functional, mechanical consumer products formerly not considered art. The popular designs by these machine designers increased sales and profits dramatically for manufacturers, which helped the economy to recover; established a new profession, industrial design; and within a decade, changed American products from mechanical monstrosities into sleek, modern forms expressive of the future. This book is about those industrial designers and how they founded, developed, educated and organized today's profession of more than 50,000 practitioners.

Shifting Images of the Hasmoneans Vered No'am, 2018 The shifting image of the Hasmoneans in the eyes of their contemporaries and later generations is a compelling issue in the history of the Maccabean revolt and the Hasmonean commonwealth. Based on a series of six Jewish folktales from the Second Temple period that describe the Hasmonean dynasty and its history from its legendary founders, through achievement of full sovereignty, to downfall, this volume examines the Hasmoneans through the lens of reception history. On the one hand, these brief, colorful legends are embedded

in the narrative of the historian of the age, Flavius Josephus; on the other hand, they are scattered throughout the extensive halakhic-exegetical compositions known as rabbinic literature, redacted and compiled centuries later. Each set of parallel stories is examined for the motivation underlying its creation, its original message, language, and the historical context. This analysis is followed by exploration of the nature of the relationship between the Josephan and the rabbinic versions, in an attempt to reconstruct the adaptation of the putative original traditions in the two corpora, and to decipher the disparities, different emphases, reworking, and unique orientations typical of each. These adaptations reflect the reception of the pristine tales and thus disclose the shifting images of the Hasmoneans in later generations and within distinct contexts. The compilation and characterization of these sources which were preserved by means of two such different conduits of transmission brings us closer to reconstruction of a lost literary continent, a hidden Jewish Atlantis of early pseudo-historical legends and facilitates examination of the relationship between the substantially different libraries and worlds of Josephus and rabbinic literature.

The Art of Life in South Africa Daniel Magaziner, 2016-11-09 From 1952 to 1981, South Africa’s apartheid government ran an art school for the training of African art teachers at Indaleni, in what is today KwaZulu-Natal. The Art of Life in South Africa is the story of the students, teachers, art, and politics that circulated through a small school, housed in a remote former mission station. It is the story of a community that made its way through the travails of white supremacist South Africa and demonstrates how the art students and teachers made together became the art of their lives. Daniel Magaziner radically reframes apartheid-era South African history. Against the dominant narrative of apartheid oppression and black resistance, as well as recent scholarship that explores violence, criminality, and the hopeless entanglements of the apartheid state, this book focuses instead on a small group’s efforts to fashion more fulfilling lives for its members and their community through the ironic medium of the apartheid-era school. There is no book like this in South African historiography. Lushly

illustrated and poetically written, it gives us fully formed lives that offer remarkable insights into the now clichéd experience of black life under segregation and apartheid.
