**Connected Learning: Origins, Opportunities, and Perspectives of Contemporary Educational Design** Henning Schoenenberger,2024-01-16 This book offers a unique, machine-generated overview of the current state of research in Connected Learning, Networked Learning, Digital Badges, Micro-Credentials, and Lifelong Learning. Connected Learning seeks to understand the context of learning and the motivation of learners in order to design a more contemporary and effective learning experience. Central to this is the understanding that Connected Learning is collaborative and takes

place in peer-to-peer networks, that it is based on participation, problem orientation and application, and that the more personalised the learning, the more interested learners are. This volume condenses and synthesizes research from a large variety of English-language articles into a concise yet comprehensive overview. Readers will benefit from the selection and synthesis of articles that allow them to get a quick understanding of the research area, while also being able to click through to the original sources to dive deeper into any particular topic. This volume is a key source of information and insight for those interested in the current research, as well as serving as an inspiring starting point for their own research.

What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities.
