In Math Work Stations you'll find ideas to help children develop conceptual understanding and skills, use math vocabulary as they talk about their mathematical thinking, and connect big ideas to meaningful independent exploration and practice. This book details how to set up, manage, and keep math stations going throughout the year. There's even a chapter devoted solely to organizing and using math manipulatives. Each chapter includes: key concepts based on NCTM and state math standards; math vocabulary resources and literature links; suggested materials to include at each station for the corresponding math content strand; ideas for modeling, troubleshooting, differentiating, and assessment; and reflection questions for professional development. The New Teaching Elementary Science Selma Wassermann,J. W. George Ivany,1996-01-01 This book is designed for teachers-to-be and practicing teachers who want to teach science with confidence and for those who are fearful of trying. It

presents an inquiry-oriented method (instead of a smorgasbord of approaches) that capitalizes on children's natural curiosity by emphasizing scientific exploration. The book removes the fear of teaching science by encouraging teachers to be scientific inquirers themselves, learning side-by-side with their students. The text features a theoretical model of inquiry-based teaching, Play-Debrief-Replay, that incorporates elements of investigative play with critical thinking skills. In the longest chapter, 60 fully developed, field-tested investigative science activities are included to promote experiential learning and concept development. Anxieties about teaching science are addressed head-on and dealt with sensitively and thoughtfully.
