SPIDERS ARE ARACHNIDS Georgina Kucherik,2015-01-01 Introduce your students to the world of arachnids, the most fascinating of nature's small creatures. Information sheets are included for characteristics of spiders, spinning webs, eggs and spiderlings, food, and enemies. Different species of spiders researched in this unit are Trapdoor, Fisher, Wolf, Jumping, Crab, Tarantula and Black Widow. Brainstorm in small groups or with the whole class to create charts on Things We Know About Spiders and Things We'd Like to Find Out About Spiders. As the unit continues and the students learn more, they can add or change any information on the charts. Take a walk around the school yard and neighbourhood to etch and record on an observation chart the types of spiders and webs found. Follow up activities focus on these skills: research, creativity, and word knowledge.

*Math Work Stations* Debbie Diller,2023-10-10 If you've ever questioned how to make math stations work, you'll find this photo-filled, idea-packed resource invaluable. This book extends Debbie Diller's best-selling work on literacy work stations and classroom design to the field of mathematics. In *Math Work Stations* you'll find ideas to help children develop conceptual understanding and skills, use math vocabulary as they talk about their mathematical thinking, and connect big ideas to meaningful independent exploration and practice. *The New Teaching Elementary Science* Selma Wassermann,J. W. George Ivany,1996-01-01 This book is designed for teachers-to-be and practicing teachers who want to teach science with confidence and for those who are fearful of trying. It presents an inquiry-oriented method (instead of a smorgasbord of approaches) that capitalizes on children's natural curiosity by emphasizing scientific exploration. The book removes the fear of teaching science by encouraging teachers to be scientific inquirers themselves, learning side-by-side with their students. The text features a theoretical model of inquiry-based

teaching, Play-Debrief-Replay, that incorporates elements of investigative play with critical thinking skills. In the longest chapter, 60 fully developed, field-tested investigative science activities are included to promote experiential learning and concept development. Anxieties about teaching science are addressed head-on and dealt with sensitively and thoughtfully.
