The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

62nd International Conference of Machine Design Departments Michal Petrů, 2024

Founders of American Industrial Design Carroll Gantz, 2014-07-17 As the Great Depression started in 1929, several dozen creative individuals from a variety of artistic fields, including theatre, advertising, graphics, fashion and furniture design, pioneered a new profession. Responding to unprecedented public and industry demand for new styles, these artists entered the industrial world during what was called the Machine Age, to introduce modern design to the external appearance and form of mass-produced, functional, mechanical consumer products formerly not considered art. The popular designs by these machine designers increased sales and profits dramatically for manufacturers, which helped the economy to recover; established a new profession, industrial design; and within a decade, changed American products from mechanical

monstrosities into sleek, modern forms expressive of the future. This book is about those industrial designers and how they founded, developed, educated and organized today's profession of more than 50,000 practitioners.

Human Dimension and Interior Space Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Multidisciplinary Aspects of Design Francesca Zanella, Giampiero Bosoni, Elisabetta Di Stefano, Gioia Laura

Iannilli,Giovanni Matteucci,Rita Messori,Raffaella Trocchianesi,2023-12-30 This open access book gathers the contributions from the Design! OPEN International Conference, held in Parma, Italy in May 2022. The conference explored the multidisciplinary aspects of design starting from its dimensions: objects (design as focused on the object, on its functional and symbolic dimension, and at the same time on the object as a tool for representing cultures), processes (the designer's self-reflective moment which is focused on the analysis and on the definition of processes in various contexts, spanning innovation, social engagement, reflection on emergencies or forecasting), experiences (design as a theoretical and practical strategy aimed at facilitating experiential interactions among people, people and objects or environments), and narratives (making history, representing through different media, archiving, narrating, and exhibiting design). The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists.

Antitrust and Upstream Platform Power Plays A. K. von Moltke,2023-12-14 Large digital platforms have been in the doghouse of antitrust decision-makers worldwide in recent years. Antitrust regulators agree, urgent intervention is needed. Interestingly, it is the plight of victimized suppliers—of merchants, app developers, publishers, platform labourers, and the like, who are upstream in the value chain—that has topped the policy agenda, prompting scrutiny of an almost unprecedented intensity. Amid such anxieties, *Antitrust and Upstream Platform Power Plays* asks a somewhat provocative question: Are upstream platform power plays really 'competition problems', and ones for antitrust, at that? The apparently obvious answer—'yes'—is deceptively simple for a number of reasons. Firstly, it contradicts contemporary antitrust's single-minded focus on consumers, which has all but erased supplier exploitation in the brick-and-mortar economy from the policy's radar. Secondly, the wider antitrust community remains bitterly divided when it comes to judging platform practices. In addition, if any consensus could be had, it would almost certainly confirm the longstanding tenet that antitrust cannot be about supplier welfare, as such. These paradoxes call for a policy introspection—precisely what this book provides. The analysis offered in *Antitrust and Upstream Platform Power Plays* is altogether normative, theoretical, and practical. Normative because it engages in a supplier-mindful soul-searching exercise, which advances our understanding of antitrust's foundations; theoretical as it sheds multidisciplinary insights on upstream effects in the platform economy and develops new frameworks for rationalizing them; and practical since it takes a deep dive into the complex antitrust machinery whilst staying attuned to other available levers of public action. Answering a compelling question with an equally compelling answer, this work will appeal to scholars and policymakers worldwide with a particular interest in platform regulation, antitrust, and powerful digital platforms.

Proceedings of the 2023 2nd International Conference on Social Sciences and Humanities and Arts (SSHA 2023) Mohd Fauzi bin Sedon, Intakhab Alam Khan, Mehmet CÜNEYT BİRKÖK, KinSun Chan, 2023-06-29 This is an open access book. With the progress of social civilization, social science and its research are becoming more and more important. Theoretically and practically, the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings. At present, social science research and its results can hardly meet the needs of social development, especially the unscientific evaluation of social science results, which has aroused great concern from all walks of life, and has produced dirt and questions on social science, thus affecting the proper development of social science. Max Weber once said that the most important function of social science in modern times is to keep people clear-headed and to resist the delusions of prophetic legislators. Humanities and arts are the process of perceiving, realizing, thinking, manipulating, and expressing objective or subjective objects through capturing and excavating, feeling and analyzing, integrating and applying, or displaying the stage results in the form obtained through feeling (seeing, hearing, smelling, touching). The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions. And by reacting to today's increasingly intricate problems and situations through systematic and professional discussions, they will further contribute to the improvement of institutions and the development of society. By thinking about issues and looking at problems and the world from different perspectives by putting the two together, it may be possible to have more comprehensive, appropriate, and better responses; for example, the development of laws requires a deeper understanding of the environment in which they are implemented; international trade requires a certain understanding of the customs of different countries; and the development of tax and economic policies requires a certain understanding of the population, consumer demand, etc.

Shifting Images of the Hasmoneans Vered Noam, 2018-02-22 The shifting image of the Hasmoneans in the eyes of their contemporaries and later generations is a compelling issue in the history of the Maccabean revolt and the Hasmonean commonwealth. Based on a series of six Jewish folktales from the Second Temple period that describe the Hasmonean dynasty and its history from its legendary founders, through achievement of full sovereignty, to downfall, this volume examines the Hasmoneans through the lens of reception history. On the one hand, these brief, colorful legends are embedded in the narrative of the historian of the age, Flavius Josephus; on the other hand, they are scattered throughout the extensive halakhic-exegetical compositions known as rabbinic literature, redacted and compiled centuries later. Each set of parallel stories is examined for the motivation underlying its creation, its original message, language, and the historical context. This analysis is followed by exploration of the nature of the relationship between the Josephan and the rabbinic versions, in an attempt to reconstruct the adaptation of the putative original traditions in the two corpora, and to decipher the disparities, different emphases, reworking, and unique orientations typical of each. These adaptations reflect the reception of the pristine tales and thus disclose the shifting images of the Hasmoneans in later generations and within distinct contexts. The compilation and characterization of these sources which were preserved by means of two such different conduits of transmission brings us closer to reconstruction of a lost literary continent, a hidden Jewish Atlantis of early pseudo-historical legends and facilitates examination of the relationship between the substantially different libraries and worlds of Josephus and rabbinic literature.

New Labour's Pasts James E. Cronin, 2016-09-17 Where other books are either highly partisan dismissals or appreciations of the Third Way, or dull sociological accounts, this book gets behind the clichés in order to show just what is left of Labour party ideology and what the future may hold. New Labour has changed the face of Britain. Culture, class, education, health, the arts, leisure, the economy have all seen seismic shifts since the 1997 election that raised Blair to power. The Labour that rules has distanced itself from the failed Labour of the 70s and 80s, but the core remains. Labour remains gripped by its own past - unable and unwilling to shed its ties to the old Labour party, but determined to avoid the mistakes of which lead to four electoral defeats between 1979 and 1992. Cronin covers the full history of the party from its post war triumph through decades of shambolic leadership against ruthless and organised opposition to the resurgent New

Labour of the 90s that finally took Britain into the new millennium.

Discursive Self in Microblogging Daria Dayter,2016-03-10 This volume examines the language of microblogs drawing on the example of a group of eleven users who are united by their interest in ballet as a physical activity and an art form. The book reports on a three and a half year study which complemented a 20,000 word corpus of tweets with semi-structured interviews and participant observation. It deals with two main questions: how users exploit the linguistic resources at their disposal to build a certain identity, and how the community boundaries are performed discursively. The focus is on the speech acts of self-praise and complaint, and on the storytelling practices of microbloggers. The comprehensive treatment of the speech act theory and the social psychological approaches to self-disclosure provides a stepping stone to the analysis of identity work, for which the users draw on two distinctive interpretive repertoires - affiliative and self-promoting.
