History of the Decline and Fall of the Roman Empire Vol 1 Edward Gibbon,2013-01-18 Gibbon offers an explanation for why the Roman Empire fell, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to tackle the subject. Most of his ideas are directly taken from what few relevant records were available: those of the Roman moralists of the 4th and 5th centuries.

Investigating Iwo Breanne Robertson,2019 Investigating Iwo encourages us to explore the connection between American visual culture and World War II, particularly how the image inspired Marines, servicemembers, and civilians to carry on with the war and to remember those who made the ultimate sacrifice to ensure victory over the Axis Powers. Chapters shed light on the processes through which history becomes memory and gains meaning over time. The contributors ask only that we be willing to take a closer look, to remain open to new perspectives that can deepen our understanding of familiar topics related to the flag raising, including Rosenthal's famous picture, that continue to mean so much to us today--

A Memory of Ice Elizabeth Truswell,2019-08-01 In the southern summer of 1972/73, the Glomar Challenger was the first vessel of the international Deep Sea Drilling Project to venture into the seas surrounding Antarctica, confronting severe weather and ever-present icebergs. A Memory of Ice presents the science and the excitement of that voyage in a manner readable for non-scientists. Woven into the modern story is the history of early explorers, scientists and navigators who had gone before into the Southern Ocean. The departure of the Glomar Challenger from Fremantle took place 100 years after the HMS Challenger weighed anchor from Portsmouth, England, at the start of its four-year voyage, sampling and dredging the world's oceans. Sailing south, the Glomar Challenger crossed the path of James Cook's HMS Resolution, then on its circumnavigation of Antarctica in search of the Great South Land. Encounters with Lieutenant Charles Wilkes of the US Exploring Expedition and Douglas Mawson of the Australasian Antarctic Expedition followed. In the Ross Sea, the voyages of the HMS Erebus and HMS Terror under James Clark Ross, with the young Joseph Hooker as botanist, were ever present. The story of the Glomar Challenger's iconic voyage is largely told through the diaries of the author, then a young scientist experiencing science at sea for the first time. It weaves together the physical history of Antarctica with how we have come to our current knowledge of the polar continent. This is an attractive, lavishly illustrated and curiosity-satisfying read for the general public as well as for scholars of science.

Twitter and Tear Gas Zeynep Tufekci,2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

Missamore, Desirae Negrón, Marcus Plumlee, Emily Grace Sarver-Wolf, Lesley Sneed, Cassie Walters, Lucy Weakley, 2011 In the Fall of 2010 I gave an assignment in my Appalachian Literature class at Berea College, telling my students to write their own version of Where I'm From poem based on the writing prompt and poem by George Ella Lyon, one of the preeminent Appalachian poets. I was so impressed by the results of the assignment that I felt the poems needed to be preserved in a bound document. Thus, this little book. These students completely captured the complexities of this region and their poems contain all the joys and sorrows of living in Appalachia. I am proud that they were my students and I am very proud that together we produced this record of contemporary Appalachian Life -- Silas House

The Hundred Secret Senses Amy Tan, 2010-12-28 The wisest and most captivating novel (Boston Globe) from the author of the bestselling *The Joy Luck Club* and *The Backyard Bird Chronicles* Set in San Francisco and in a remote village of Southwestern China, Amy Tan's *The Hundred Secret Senses* is a tale of American assumptions shaken by Chinese ghosts and broadened with hope. Essay on the Geography of Plants Alexander von Humboldt, Aimé Bonpland, 2010-07-15 The legacy of Alexander von Humboldt (1769–1859) looms large over the natural sciences. His 1799–1804 research expedition to Central and South America with botanist Aimé Bonpland set the course for the great scientific surveys of the nineteenth century, and inspired

such essayists and artists as Emerson, Goethe, Thoreau, Poe, and Church. The chronicles of the expedition were published in Paris after Humboldt's return, and first among them was the 1807 "Essay on the Geography of Plants." Among the most cited writings in natural history, after the works of Darwin and Wallace, this work appears here for the first time in a complete English-language translation. Covering far more than its title implies, it represents the first articulation of an integrative "science of the earth," encompassing most of today's environmental sciences. Ecologist Stephen T. Jackson introduces the treatise and explains its enduring significance two centuries after its publication.

The Spanish Lake Oskar Hermann Khristian Spate,2004-11-01 This work is a history of the Pacific, the ocean that became a theatre of power and conflict shaped by the politics of Europe and the economic background of Spanish America. There could only be a concept of the Pacific once the limits and lineaments of the ocean were set and this was undeniably the work of Europeans. Fifty years after the Conquista, Nueva Espaa and Peru were the bases from which the ocean was turned into virtually a Spanish lake.

First Ladies Betty Caroli,2010-07-15 Betty Boyd Caroli's engrossing and informative First Ladies is both a captivating read and an essential resource for anyone interested in the role of America's First Ladies. This expanded and updated fourth edition includes Laura Bush's tenure, Hillary Clinton's 2008 presidential bid, and an in-depth look at Michelle Obama, one of the most charismatic and appealing First Ladies in recent history. Covering all forty-one women from Martha Washington to Michelle Obama and including the daughters, daughters-in-law, and sisters of presidents who sometimes served as First Ladies, Caroli explores each woman's background, marriage, and accomplishments and failures in office. This remarkably diverse lot included Abigail Adams, whose remember the ladies became a twentieth-century feminist refrain; Jane Pierce, who prayed her husband would lose the election; Helen Taft, who insisted on living in the White House, although her husband would have preferred a judgeship; Eleanor Roosevelt, who epitomized the politically involved First Lady; and Pat Nixon, who perfected what some have called the robot image. They ranged in age from early 20s to late 60s; some received

superb educations for their time, while others had little or no schooling. Including the courageous and adventurous, the emotionally unstable, the ambitious, and the reserved, these women often did not fit the traditional expectations of a presidential helpmate. Here then is an engaging portrait of how each First Lady changed the role and how the role changed in response to American culture. These women left remarkably complete records, and their stories offer us a window through which to view not only this particular sorority of women, but also American women in general. Impressive...Caroli's profiles and observations of American first ladies and their relationship to the media are intelligent and perceptive. --Philadelphia Inquirer

Cycles in US Foreign Policy since the Cold War Thomas H. Henriksen, 2017-01-25 This book describes how American international policy alternates between engagement and disengagement cycles in world affairs. These cycles provide a unique way to understand, assess, and describe fluctuations in America's involvement or non-involvement overseas. In addition to its basic thesis, the book presents a fair-minded account of four presidents' foreign policies in the post-Cold War period: George H.W. Bush, Bill Clinton, George W. Bush, and Barack Obama. It suggests recurring sources of cyclical change, along with implications for the future. An engaged or involved foreign policy entails the use of military power and diplomatic pressure against other powers to secure American ends. A disengaged or noninvolved policy relies on normal economic and political interaction with other states, which seeks to disassociate from entanglements.

50 Years of Ocean Discovery National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Ocean Studies Board, 2000-01-03 This book describes the development of ocean sciences over the past 50 years, highlighting the contributions of the National Science Foundation (NSF) to the field's progress. Many of the individuals who participated in the exciting discoveries in biological oceanography, chemical oceanography, physical oceanography, and marine geology and geophysics describe in the book how the discoveries were made possible by combinations of insightful individuals, new technology, and in some cases, serendipity. In addition to describing the advance of ocean science, the book examines the institutional structures and technology that made the advances possible and presents visions of the field's future. This book is the first-ever documentation of the history of NSF's Division of Ocean Sciences, how the structure of the division evolved to its present form, and the individuals who have been responsible for ocean sciences at NSF as rotators and career staff over the past 50 years.

With this book beginners don't have to guess how to position the knife or where to chip away.
