**Creativity, Inc. (The Expanded Edition)** Ed Catmull,Amy Wallace,2023-09-28 The co-founder and longtime president of Pixar updates and expands his 2014 New York Times bestseller on creative leadership, reflecting on the management principles that built Pixar's singularly successful culture, and on all he learned during the past nine years that allowed Pixar to retain its creative culture while continuing to evolve. "Might be the most thoughtful management book ever."—Fast

Company For nearly thirty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, Finding Nemo, The Incredibles, Up, and WALL-E, which have gone on to set box-office records and garner eighteen Academy Awards. The joyous storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student, and then forged a partnership with George Lucas that led, indirectly, to his founding Pixar with Steve Jobs and John Lasseter in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie's success—and in the twenty-five movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on philosophies that protect the creative process and defy convention, such as:

- Give a good idea to a mediocre team and they will screw it up. But give a mediocre idea to a great team and they will either fix it or come up with something better.
- It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them.
- The cost of preventing errors is often far greater than the cost of fixing them.
- A company's communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody.

Creativity, Inc. has been significantly expanded to illuminate the continuing development of the unique culture at Pixar. It features a new introduction, two entirely new chapters, four new chapter postscripts, and changes and updates throughout. Pursuing excellence isn't a one-off assignment but an ongoing, day-in, day-out, full-time job. And Creativity, Inc. explores how it is done.

*Renoir* Scala Publishers, Ltd., 2006-06 Renoir masterfully created Luncheon of the Boating Party's enchanting mood by capturing a contemporary moment - 19th-century leisure on the Seine - and the universal appeal of celebration. He also combined several of the traditional categories of painting: still life, landscape, portraiture and genre. The result is a timeless work that captures the atmosphere of an idyllic place, where friends share the pleasures of food, wine and conversation. Scala's new 4-fold format is ideal for displaying this exquisite painting. It showcases archival photographs that identify the revellers, and x-rays of the painting, which reveal little-known compositional changes, as well as details and images that fold out to bring this late 19th-century icon to life. 38 colour & 19 b/w illustrations

Brain-Inspired Computing Katrin Amunts, Lucio Grandinetti, Thomas Lippert, Nicolai Petkov, 2021-07-20 This open access book constitutes revised selected papers from the 4th International Workshop on Brain-Inspired Computing, BrainComp 2019, held in Cetraro, Italy, in July 2019. The 11 papers presented in this volume were carefully reviewed and selected for inclusion in this book. The Photographic Experience, 1839-1914: Images and Attitudes , The Photographic Experience deals with episodes and issues relating to the spread and practice of photography from its beginnings to World War I. Bridget and Heinz Henisch concern themselves with the reception accorded to the new art by professionals, amateurs, and the general public. They examine reactions to the new invention in the press, literature, poetry, music, and fashion; the response of intellectuals and painters; and the beliefs held by prominent photographers concerning the nature of the medium and its mission. With a wide array of images - many never before published - they illustrate the photograph's use as a record of public and private moments in life.

**Activating the Inanimate: Visual Vocabularies of Performance Practice** Celia Morgan, Filipa Malva, 2019-01-04  
This volume was first published by Inter-Disciplinary Press in 2013. The dynamic exchange of perspectives that constituted the 2nd Global Conference of Performance: Visual Aspects of Performance Practice demonstrated that the foundational concept of the project is a vibrant platform for sharing and extending ideas within all aspects of scenographic practice in performance. This volume is a compilation of papers that formed the basic structure of that conference. The first four chapters present a developing schema of visual languages within theatre. From Beckett, Ibsen, Svoboda to Wilson, they navigate the symbolic and visual prioritizing of postdramatic scenographic forms. Part 2 reconsiders the predetermined divisions that deflate experiential encounters with the inanimate. Dance, puppetry and slapstick provide examples of interaction between performers and their environment. Part 3 addresses various renderings of design processes, exploring the role of drawing, fabric and body in creating a narrative. Part 4 negotiates the sensitive interface between public and performance while looking at the Burning Man Festival, flash mobs and opera media casting. The final chapters represent a global collective of process strategies that confront the production and methodologies of meaning. They engage with cultural presumptions and subjectivities in post Cultural Revolution China, Spanish flamenco, American Indian (post)colonial resistances and the traditions of Australian Aboriginal artists.

**Crafting Civilian Control of the Military in Venezuela** Harold A. Trinkunas,2011-01-20 Unlike most other emerging South American democracies, Venezuela has not succumbed to a successful military coup d'etat during four decades of democratic rule. What drives armed forces to follow the orders of elected leaders? And how do emerging democracies gain that control over their military establishments? Harold Trinkunas answers these questions in an examination of Venezuela's transition to democracy following military rule and its attempts to institutionalize civilian control of the military over the past sixty years, a period that included three regime changes. Trinkunas first focuses on the strategic choices democratizers make about the military and how these affect the internal civil-military balance of power in a new regime. He then analyzes a regime's capacity to institutionalize civilian control, looking specifically at Venezuela's failures and successes in this arena during three periods of intense change: the October revolution (1945-48), the Pact of Punto Fijo period (1958-98), and the Fifth Republic under President Hugo Chavez (1998 to the present). Placing Venezuela in comparative perspective with Argentina, Chile, and Spain, Trinkunas identifies the bureaucratic mechanisms democracies need in order to sustain civilian authority over the armed forces.

**Big Data in Bioeconomy** Caj Södergård,Tomas Mildorf,Ephrem Habyarimana,Arne J. Berre,Jose A. Fernandes,Christian Zinke-Wehlmann,2021-08-13 This edited open access book presents the comprehensive outcome of The European DataBio Project, which examined new data-driven methods to shape a bioeconomy. These methods are used to develop new and sustainable ways to use forest, farm and fishery resources. As a European initiative, the goal is to use these new findings to support decision-makers and producers - meaning farmers, land and forest owners and fishermen. With their 27 pilot projects from 17 countries, the authors examine important sectors and highlight examples where modern data-driven methods were used to increase sustainability. How can farmers, foresters or fishermen use these insights in their daily lives? The authors answer this and other questions for our readers. The first four parts of this book give an overview of the big data technologies relevant for optimal raw material gathering. The next three parts put these technologies into perspective, by showing useable applications from farming, forestry and fishery. The final part of this book gives a summary and a view on the future. With its broad outlook and variety of topics, this book is an enrichment for students and scientists in bioeconomy, biodiversity and renewable resources.

**Knowledge Discovery in Big Data from Astronomy and Earth Observation** Petr Skoda,Fathalrahman Adam,2020-04-09 Knowledge Discovery in Big Data from Astronomy and Earth Observation: Astrogeoinformatics bridges the gap between astronomy and geoscience in the context of applications, techniques and key principles of big data. Machine learning and parallel computing are increasingly becoming cross-disciplinary as the phenomena of Big Data is becoming common place. This book provides insight into the common workflows and data science tools used for big data in astronomy

and geoscience. After establishing similarity in data gathering, pre-processing and handling, the data science aspects are illustrated in the context of both fields. Software, hardware and algorithms of big data are addressed. Finally, the book offers insight into the emerging science which combines data and expertise from both fields in studying the effect of cosmos on the earth and its inhabitants.

*Mathematical Surprises* Mordechai Ben-Ari, 2022-09-07 This is an open access book that provides plenty of pleasant mathematical surprises. There are many fascinating results that do not appear in textbooks although they are accessible with a good knowledge of secondary-school mathematics. This book presents a selection of these topics including the mathematical formalization of origami, construction with straightedge and compass (and other instruments), the five- and six-color theorems, a taste of Ramsey theory and little-known theorems proved by induction. Among the most surprising theorems are the Mohr-Mascheroni theorem that a compass alone can perform all the classical constructions with straightedge and compass, and Steiner's theorem that a straightedge alone is sufficient provided that a single circle is given. The highlight of the book is a detailed presentation of Gauss's purely algebraic proof that a regular heptadecagon (a regular polygon with seventeen sides) can be constructed with straightedge and compass. Although the mathematics used in the book is elementary (Euclidean and analytic geometry, algebra, trigonometry), students in secondary schools and colleges, teachers, and other interested readers will relish the opportunity to confront the challenge of understanding these surprising theorems. Supplementary material to the book can be found at <https://github.com/motib/surprises>.
