Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Founders of American Industrial Design Carroll Gantz,2014-07-15 As the Great Depression started in 1929, several dozen creative individuals from a variety of artistic fields, including theatre, advertising, graphics, fashion and furniture design, pioneered a new profession. Responding to unprecedented public and industry demand for new styles, these artists entered the industrial world during what was called the Machine Age, to introduce modern design to the external appearance and form of mass-produced, functional, mechanical consumer products formerly not considered art. The popular designs by these machine designers increased sales and profits dramatically for manufacturers, which helped the economy to recover; established a new profession, industrial design; and within a decade, changed American products from mechanical monstrosities into sleek, modern forms expressive of the future. This book is about those industrial designers and how they founded, developed, educated and organized today's profession of more than 50,000 practitioners.

Multidisciplinary Aspects of Design Francesca Zanella,Giampiero Bosoni,Elisabetta Di Stefano,Gioia Laura Iannilli,Giovanni Matteucci,Rita Messori,Raffaella Trocchianesi,2023-12-30 This open access book gathers the contributions from the Design! OPEN International Conference, held in Parma, Italy in May 2022. The conference explored the multidisciplinary aspects of design starting from its dimensions: objects (design as focused on the object, on its functional and symbolic dimension, and at the same time on the object as a tool for representing cultures), processes (the designer's self-reflective moment which is focused on the analysis and on the definition of processes in various contexts, spanning innovation, social engagement, reflection on emergencies or forecasting), experiences (design as a theoretical and practical strategy aimed at facilitating experiential interactions among people, people and objects or environments), and narratives (making history, representing through different media, archiving, narrating, and exhibiting design). The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists.

Prisoners of Conscience Gerard A. Hauser,2012-08-16 Prisoners of Conscience continues the work begun by Gerard A. Hauser in Vernacular Voices: The Rhetoric of Publics and Public Spheres, winner of the National Communication Association's Hochmuth Nichols Award. In his new book, Hauser examines the discourse of political prisoners, specifically the discourse of prisoners of conscience, as a form of rhetoric in which the vernacular is the main source of available appeals and the foundation for political agency. Hauser explores how modes of resistance employed by these prisoners constitute what he deems a thick moral vernacular rhetoric of human rights. Hauser's work considers in part how these prisoners convert universal commitments to human dignity, agency, and voice into the moral vernacular of the society and culture to which their rhetoric is addressed. Hauser grounds his study through a series of case studies, each centered on a different rhetorical mechanism brought to bear in the act of resistance. Through a transnational rhetorical analysis of resistance within political prisons, Hauser brings to bear his skills as a rhetorical theorist and critic to illuminate the rhetorical power of resistance as tied to core questions in contemporary humanistic scholarship and public concern.

Urban Planning Against Poverty Jean-Claude Bolay,2019-11-12 This open access book revisits the theoretical foundations of urban planning and the application of these concepts and methods in the context of Southern countries by examining several case studies from different regions of the world. For instance, the case of Koudougou, a medium-sized city in one of the poorest countries in the world, Burkina Faso, with a population of 115.000 inhabitants, allows us to understand concretely which and how these deficiencies are translated in an African urban context. In contrast, the case of Nueve de Julio, intermediate city of 50.000 dwellers in the pampa Argentina, addresses the new forms of spatial fragmentation and social exclusion linked with agro export and crisis of the international markets. Case studies are also included for cities in Asia and Latin America. Differences and similarities between cases allow us to foresee alternative models of urban planning

better adapted to tackle poverty and find efficient ways for more inclusive cities in developing and emerging countries, interacting several dimensions linked with high rates of urbanization: territorial fragmentation; environmental contamination; social disparities and exclusion, informal economy and habitat, urban governance and democracy.

Flexitranstore Bálint Németh,Lambros Ekonomou,2020-01-14 This open access book comprises 10 high-level papers on research and innovation within the Flexitranstore Project that were presented at the FLEXITRANSTORE special session organized as part of the 21st International Symposium on High Voltage Engineering. FLEXITRANSTORE (An Integrated Platform for Increased FLEXIbility in smart TRANSMission grids with STORAge Entities and large penetration of Renewable Energy Sources) aims to contribute to the development of a pan-European transmission network with high flexibility and high interconnection levels. This will facilitate the transformation of the current energy production mix by hosting an increasing share of renewable energy sources. Novel smart grid technologies, control and storage methods, and new market approaches will be developed, installed, demonstrated, and tested introducing flexibility to the European power system. FLEXITRANSTORE is developing a next-generation Flexible Energy Grid (FEG) that will be integrated into the European Internal Energy Market (IEM) through the valorization of flexibility services. This FEG addresses the capabilities of a power system to maintain continuous service in the face of rapid and large swings in supply or demand. As such, a wholesale market infrastructure and new business models within this integrated FEG must be upgraded for network players, and offer incentives for new ones to join, while at the same time demonstrating new business perspectives for cross-border resource management and energy trading.

Collaborative Curriculum Design for Sustainable Innovation and Teacher Learning Jules Pieters,Joke Voogt,Natalie Pareja Roblin,2019-09-19 This open access book provides insight into what it takes to actively involve teachers in the curriculum design process. It examines different aspects of teacher involvement in collaborative curriculum design, with specific attention to its implications for sustainable curriculum innovation and teacher learning. Divided into six sections, the book starts out by introducing the notion of collaborative curriculum design and discusses its historical and theoretical foundations. It describes various approaches commonly adopted to actively involve teachers in the (co-)design of curriculum materials. Sections two and three provide examples of what key phases in the curriculum design process - such as needs analysis, design and development, and implementation - look like across various collaborative curriculum design projects.

Section four reports on the impact of collaborative curriculum design on student learning, teacher practices, teacher professional growth, and institutional change. Building on the research evidence about the outcomes of collaborative curriculum design, section five focuses on sustainability, scaling-up and curriculum leadership issues, which are key to the continuation and further evolution of curriculum innovations. Future perspectives are addressed in section six with emphasis on the infrastructure of a sustainable curriculum innovation.
