Youbin Chen,2024

Advances in Fashion and Design Research Ana Cristina Broega,Joana Cunha,Hélder Carvalho,Bernardo Providência,2022-10-19 This book offers a multidisciplinary perspective on research and developments at the interface between industrial design, textile engineering and fashion. It covers advances in fashion and product design, and in textile production alike, reporting on smart and sustainable industrial procedures and 3D printing, issues in marketing and communication, and topics concerning social responsibility, sustainability, emotions, creativity and education. It highlights research that is expected to foster the development of design and fashion on a global and interdisciplinary scale. Gathering the proceedings of the 5th International Fashion and Design Congress, CIMODE 2022, held on July 4-7, 2022, in Guimarães, Portugal, this book offers extensive information and a source of inspiration to both researchers and professionals in the field of fashion, design, engineering, communication as well as education.

Graphic Design School David Dabner,Sandra Stewart,Abbie Vickress,2017-02-06 The essential introduction to graphic design for the digital era Graphic Design School provides a comprehensive introduction to visual design for modern media. From the fundamentals of design to advanced techniques and problem solving, this book is packed with practical advice and tutorials for a broad range of applications in any media. This updated sixth edition features a wealth of new guidance that

reflects the evolution of the field, including extensive discussion of digital design and resourcing. New discussion tackles User Experience and User Interface Design, plus the latest tools, requirements, and resources for designing for the web, mobile apps, social media, and more. Updated assignments reflect the latest graphic design processes and guide students through the transition from simple solutions to starter portfolio pieces, while full-color illustrations, case studies, and designer biographies bring real-world perspective to this complex, multi-faceted skill. As media continues to evolve, graphic designers must possess a core set of competencies that translate across all applications. This book teaches the critical concepts and essential skills that build the framework for successful, innovative design. Master the principles, elements, and tools of design Delve into typography, color, and layout for print and screen Understand coding requirements and information architecture Design for apps, social media, mobile devices, and more Graphic design has never been a static field, and the continual honing of skills and techniques is an essential part of the job. Innovation comes from change, and today's design landscape is evolving at an ever-increasing pace—expanding diversity in media, audience, topic, technique, tools, and more offer unprecedented opportunity to make your mark. Graphic Design School equips you with a rock-solid foundation to support whatever your talent builds.

Shifting Images of the Hasmoneans Vered Noam, 2018-02-22 The shifting image of the Hasmoneans in the eyes of their contemporaries and later generations is a compelling issue in the history of the Maccabean revolt and the Hasmonean commonwealth. Based on a series of six Jewish folktales from the Second Temple period that describe the Hasmonean dynasty and its history from its legendary founders, through achievement of full sovereignty, to downfall, this volume examines the Hasmoneans through the lens of reception history. On the one hand, these brief, colorful legends are embedded in the narrative of the historian of the age, Flavius Josephus; on the other hand, they are scattered throughout the extensive halakhic-exegetical compositions known as rabbinic literature, redacted and compiled centuries later. Each set of parallel stories is examined for the motivation underlying its creation, its original message, language, and the historical context. This analysis is followed by exploration of the nature of the relationship between the Josephan and the rabbinic versions, in an attempt to reconstruct the adaptation of the putative original traditions in the two corpora, and to decipher the disparities, different emphases, reworking, and unique orientations typical of each. These adaptations reflect the reception of the pristine tales and thus disclose the shifting images of the Hasmoneans in later generations and within distinct contexts. The compilation and characterization of these sources which were preserved by means of two such different conduits of transmission brings us closer to reconstruction of a lost literary continent, a hidden Jewish Atlantis of early pseudo-historical legends and facilitates examination of the relationship between the substantially different libraries and worlds of Josephus and rabbinic literature.

Advances on Mechanics, Design Engineering and Manufacturing III Lionel Roucoules, Manuel Paredes, Benoit Eynard, Paz

Morer Camo, Caterina Rizzi, 2021-04-21 This open access book gathers contributions presented at the International Joint Conference on Mechanics, Design Engineering and Advanced Manufacturing (JCM 2020), held as a web conference on June 2-4, 2020. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and process design; innovative design; and computer-aided design. Further topics covered include virtual simulation and reverse engineering; additive manufacturing; product manufacturing; engineering methods in medicine and education; representation techniques; and nautical, aeronautics and aerospace design and modeling. The book is organized into four main parts, reflecting the focus and primary themes of the conference. The contributions presented here not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work; they are also intended to stimulate new research directions, advanced applications of the methods discussed and future interdisciplinary collaborations.

Concept and Design Developments in School Improvement Research Arnoud Oude Groote Beverborg, Tobias Feldhoff, Katharina Maag Merki, Falk Radisch, 2021 This open access book discusses challenges in school improvement research and different methodological approaches that have the potential to foster school improvement research. Research on school improvement and accountability analysis places high demands on a study's design and method. The potential of combining the depth of case studies with the breath of quantitative measures and analyses in a mixed-methods design seems very promising. Consequently, the focus of the book lies on innovative methodological approaches. The book chapters address design, measurement, and analysis developments as well as theoretical and conceptual developments. The relevance of the research presented in the chapters for educational accountability is discussed in the book's discussion chapter. More specifically, authors present one specific innovative methodological approach and clarify that approach with a concrete example in the context of school improvement, based on empirical data when possible. In this way, this book helps researchers designing complex useful studies.

Design Ethnography Francis Müller, 2020-12-14 This open access book describes methods for research on and research through design. It posits that ethnography is an appropriate method for design research because it constantly orients itself, like design projects, towards social realities. In research processes, designers acquire project-specific knowledge, which happens mostly intuitively in practice. When this knowledge becomes the subject of reflection and explication, it strengthens the discipline of design and makes it more open to interdisciplinary dialogue. Through the use of the ethnographic method in design, this book shows how design researchers can question the certainties of the everyday world, deconstruct reality into singular aesthetic and semantic phenomena, and reconfigure them into new contexts of signification. It shows that design ethnography is a process in which the epistemic and creative elements flow into one another in iterative loops. The goal of design ethnography is not to colonize the discipline of design with a positivist and objectivist scientific ethos, but rather to

reinforce and reflect upon the explorative and searching methods that are inherent to it. This innovative book is of interest to design researchers and professionals, including graphic artists, ethnographers, visual anthropologists and others involved with creative arts/media.

Computer-Aided Architectural Design. INTERCONNECTIONS: Co-computing Beyond Boundaries Michela Turrin, Charalampos Andriotis, Azarakhsh Rafiee, 2023-07-04 This book includes the refereed Selected Papers of the 20th International Conference on Computer-Aided Architectural Design. INTERCONNECTIONS: Co-computing Beyond Boundaries, CAAD Futures 2023, held in Delft, The Netherlands, in July 5-7, 2023. The 43 full papers included in this book were carefully reviewed and selected from 144 submissions. They were organized in topical sections as follows: algorithmic architectural design; AI-powered architectural ideation; performance-based design, urban models and analysis; urban design; digital design, materials and fabrication; spatial information, data and semantics; building data analysis, visualisation, interaction; and building massing and layouts.

Multidisciplinary Aspects of Design Francesca Zanella, Giampiero Bosoni, Elisabetta Di Stefano, Gioia Laura Iannilli, Giovanni Matteucci, Rita Messori, Raffaella Trocchianesi, 2023-12-30 This open access book gathers the contributions from the Design! OPEN International Conference, held in Parma, Italy in May 2022. The conference explored the multidisciplinary aspects of design starting from its dimensions: objects (design as focused on the object, on its functional and symbolic dimension, and at the same time on the object as a tool for representing cultures), processes (the designer's self-reflective moment which is focused on the analysis and on the definition of processes in various contexts, spanning innovation, social engagement, reflection on emergencies or forecasting), experiences (design as a theoretical and practical strategy aimed at facilitating experiential interactions among people, people and objects or environments), and narratives (making history, representing through different media, archiving, narrating, and exhibiting design). The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists.

Proceedings of the 2023 4th International Conference on Big Data and Informatization Education (ICBDIE 2023) Peng Qi, Zhikui Chen, 2023-10-27 This is an open access book. Big data is a large-scale and complex data set based on modern information technology. It has the characteristics of scale and diversity, and its information processing and storage capabilities have been significantly improved. The application of big data technology is to fully mine and analyze data, build cooperation and interaction between teachers and students, encourage students to communicate and interact with teachers, and give full play to the education and teaching effect of big data. In order to improve teaching quality and efficiency as

much as possible, all kinds of teaching in the new era must have strong flexibility and foresight, so as to adapt to the development of modern society. So big data will give greater flexibility to educational activities. Therefore, big data will give greater flexibility to educational activities, and more and more scholars provide new ideas for the above research directions. To sum up, we will hold an international academic conference on big data and information education. The 2023 4th International Conference on Big Data and Informatization Education (ICBDIE2023) was held on April 7-9, 2023 in Zhangjiajie, China. ICBDIE2023 is to bring together innovative academics and industrial experts in the field of Big Data and Informatization Education to a common forum. The primary goal of the conference is to promote research and developmental activities in Big Data and Informatization Education and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in international conference on Big Data and Informatization Education and related areas.

Proceedings of the International Conference of Innovation in Media and Visual Design (IMDES 2023) Yusup Sigit Martyastiadi, Lalitya Talitha Pinasthika, Aditya Satyagraha, 2023-12-03 This is an open access book. The existence of digital virtuality in the midst of an information society has become an integral component of the human existential condition. New spaces for exploring the engagement of design and its impact on humans in digital virtuality continue to grow exponentially. Innovation in Media and Visual Design (IMDES 2023) welcomes thoughts and works of academics, researchers and practitioners related to virtuality, design, technology, mass media and people from various perspectives, disciplines and fields of knowledge.

Service Design Capabilities Nicola Morelli, Amalia de Götzen, Luca Simeone, 2020-08-27 This open access book discusses service design capabilities in innovation processes, and provides a framework that guides design students, practitioners and researchers towards a better understanding of operational aspects of service design processes. More specifically, it revisits service designers' capabilities in light of the new roles that have opened up in innovation processes on different scales. After years of being inadequately defined, the professional profile of service designers is now taking shape. Today private and public institutions recognize service designers as essential contributors to their innovation and development processes. What are the capabilities that characterize a service designer? These essential capabilities are what service designers should acquire in their education and can sell when looking for a job.

Proceedings of the 2022 2nd International Conference on Computer Technology and Media Convergence Design (CTMCD 2022) Kannimuthu Subramanian, Jian Ouyang, Wei Wei, 2023-02-10 This is an open access book. With the rapid development of society and the continuous progress of computer science and technology, when entering the

information age, design has also been integrated into the new media age in time. The application of computer technology in design has broken the limitations of traditional design, achieved a huge breakthrough in the field of design, provided more innovative forms of expression for design, and also achieved subversive changes in design methods. We need to note that design comes from life, and then it is a matter of applying tools and crafting techniques to realize it. For designers, maintaining innovation is still the first and foremost in creation. How to use technology to enable design without relying on technology is still a dilemma. Therefore, it is necessary to create a space for the researchers, practitioners, and enthusiasts in the field of computing and design to gather and discuss this current issue. The International Conference on Computer Technology and Media Convergence Design aims to accommodate this need, as well as to: 1. Advance the academic field by exploring cutting-edge research and applications. 2. Open up new horizons, broaden the horizons of computer technology research and design, 3. Create academic forums to provide opportunities for academic resource sharing and research exchanges. 2022 2nd International Conference on Computer Technology and Media Convergence Design (CTMCD 2022) will be held in Dali, China during May 13-15, 2022. CTMCD2022 invites the researchers, practitioners, and enthusiasts in the field of computing and design to participate and share knowledge. We also accept papers on computer technology and media convergence design.

The Making of a Postsecular Society Massimo Rosati, 2016-03-03 Drawing on the thought of Durkheim, this volume focuses on societal changes at the symbolic level to develop a new conceptualisation of the emergence of postsecular societies. Neo-Durkheimian categories are applied to the case of Turkey, which in recent years has shifted from a strong Republican and Kemalist view of secularism to a more Anglo-Saxon perspective. Turkish society thus constitutes an interesting case that blurs modernist distinctions between the secular and the religious and which could be described as 'postsecular'. Presenting three symbolic case studies - the enduring image of the founder of the Republic Atatürk, the contested site of Ayasofia, and the remembering and commemoration of the murdered journalist Hrant Dink - *The Making of a Postsecular Society* analyses the cultural relationship that the modern Republic has always had with Europe, considering the possible implications of the Turkish model of secularism for a specifically European self-understanding of modernity. Based on a rigorous construction of theoretical categories and on a close scrutiny of the common challenges confronting Europe and its Turkish neighbour long considered 'other' with regard to the accommodation of religious difference, this book sheds light on the possibilities for Europe to find new ways of arranging the relationship between the secular and the religious. As such, it will appeal to scholars of social theory, the sociology of religion, secularisation and religious difference, and social change.

Improving Inclusive Education through Universal Design for Learning Alvyra Galkiene, Ona Monkeviciene, 2021-09-10 This open access international scientific study provides an analysis of how the educational strategy

of Universal Design for Learning can stimulate the process of inclusive education in different educational-cultural contexts and different areas of the educational system. The findings of the research deepen the conception of inclusive education and present an analysis of factors that are significant for developing the educational system as well as providing evidence-based recommendations for educational practice. The research for this work was done in four European countries with various historical-cultural contexts: Lithuania and Poland underwent a transformation of the educational systems at the turning point in their political system, shifting from a strictly centralized Soviet policy to a liberal and democratic education system; Austria has experienced changes in social stratification and a need for cultural harmonisation arising from active national migration processes, whereas Finland has been gradually developing a socio-democratic model of national welfare. The analysis of the educational processes in the four countries has been performed using a qualitative action research method. The researchers, in cooperation with the teachers from the selected schools in their country, have implemented the strategy of Universal Design for Learning and assessed its transformation indicators in terms of the quality of inclusive education components.
