Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Multidisciplinary Aspects of Design Francesca Zanella, Giampiero Bosoni, Elisabetta Di Stefano, Gioia Laura Iannilli, Giovanni Matteucci, Rita Messori, Raffaella Trocchianesi, 2023-12-30 This open access book gathers the contributions from the Design! OPEN International Conference, held in Parma, Italy in May 2022. The conference explored the multidisciplinary aspects of design starting from its dimensions: objects (design as focused on the object, on its functional and symbolic dimension, and at the same time on the object as a tool for representing cultures), processes (the designer's self-reflective moment which is focused on the analysis and on the definition of processes in various contexts, spanning innovation, social engagement, reflection on emergencies or forecasting), experiences (design as a theoretical and practical strategy aimed at facilitating experiential interactions among people, people and objects or environments), and narratives (making history, representing through different media, archiving, narrating, and exhibiting design). The contributions, which

were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists.

Mohd Fauzi bin Sedon M. Dom, Peter Thomas Zabielskis, Xudong Liu, Xiao Liu, 2023-03-02 This is an open access book. Culture is the spiritual activity and product of human society relative to economy and politics. The traditional concept of human beings believes that culture is a social phenomenon, a product created by human beings for a long time, and at the same time a historical phenomenon, which is the accumulation of human society and history. The technical, economical and cultural nature of art design determines that only with high social and economic development can art and culture flourish. Art design is the product of the combination of art and technology. Art design is also a kind of productivity, which promotes the development of social economy. As a driving factor for social and economic development, design art will also better serve the social economy with its own more perfect operating system. The 2nd International Conference on Culture, Design and Social Development (CSDS 2022) was held in Nanjing from December 2 to 4, 2022. The purpose of the conference is to provide an international platform for experts, scholars, engineers and technicians, and technical R&D personnel engaged in related fields such as culture, design and social development, to share scientific research results, broaden research ideas, collide with new ideas, and strengthen academic research, and to explore the key challenges and research directions faced by the development of this field, and promote the industrialization cooperation of academic achievements. Experts, scholars, business people and other relevant personnel from universities and research institutions at home and abroad are cordially invited to attend and exchange.

The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Technology, Design and the Arts - Opportunities and Challenges Rae Earnshaw, Susan Liggett, Peter Excell, Daniel Thalmann, 2020-06-22 This open access book details the relationship between the artist and their created works, using tools such as information technology, computer environments, and interactive devices, for a range of information sources and application domains. This has produced new kinds of created works which can be viewed, explored, and interacted with, either as an installation or via a virtual environment such as the Internet. These processes generate new dimensions of understanding and experience for both the artist and the public's relationships with the works that are produced. This has raised a variety of interdisciplinary opportunities and issues, and these are examined. The symbiotic relationship between artistic works and the cultural context in which they are produced is reviewed. Technology can provide continuity by making traditional methods and techniques more efficient and effective. It can also provide discontinuity by opening up new perspectives and paradigms. This can generate new ideas, and produce a greater understanding of artistic processes and how they are implemented in practice. Tools have been used from the earliest times to create and modify artistic works. For example, naturally occurring pigments have been used for cave paintings. What has been created provides insight into the cultural context and social environment at the time of creation. There is an interplay between the goal of the creator, the selection and use of appropriate tools, and the materials and representations chosen. Technology, Design and the Arts - Opportunities and Challenges is relevant for artists and technologists and those engaged in interdisciplinary research and development at the boundaries between these disciplines.

Founders of American Industrial Design Carroll Gantz,2014-07-15 As the Great Depression started in 1929, several dozen creative individuals from a variety of artistic fields, including theatre, advertising, graphics, fashion and furniture design, pioneered a new profession. Responding to unprecedented public and industry demand for new styles, these artists entered the industrial world during what was called the Machine Age, to introduce modern design to the external appearance and form of mass-produced, functional, mechanical consumer products formerly not considered art. The popular designs by these machine designers increased sales and profits dramatically for manufacturers, which helped the economy to recover; established a new profession, industrial design; and within a decade, changed American products from mechanical monstrosities into sleek, modern forms expressive of the future. This book is about those industrial designers and how they founded, developed, educated and organized today's profession of more than 50,000 practitioners.

Mobile Communication and Online Falsehoods in Asia Carol Soon,2023-06-11 This book focuses on developments and trends pertaining to online falsehoods and mobile instant messaging services (MIMS), the impact of online falsehoods transmitted via MIMS, and practice and intervention. As the reliance on mobile devices for news seeking and information sharing continues to grow, the spread of online falsehoods on MIMS is a problem that confounds academics, practitioners, and policymakers. Recent developments in countries such as Brazil and India demonstrate how MIMS facilitate the spread of online falsehoods. Given that a number of non-academic and non-governmental institutions in the region are doing important work in countering the influence of online falsehoods, this book also includes contributions by practitioners who design initiatives and programmes in this area. The book is a timely contribution in addressing the distinct issues of online falsehoods in a large, technophilic region such as Asia, grappling with problems of online falsehoods on so many fronts, including ideological extremism, political opportunism, cyberscams, political activism, digitalised learning, geopolitical tensions, and more. Relevant to researchers and policymakers, this book provides a timely and critical analysis of both research and practice conducted in the Asian context by scholars hailing from a range of disciplines such media studies, political communication, cultural studies, and cognitive science.

Creativity in Art, Design and Technology Susan Liggett,Rae Earnshaw,Jill Townsley,2023-03-31 This is an open access book. Creativity is a difficult concept, how can it best be defined, understood, applied, and practiced? This book provides important answers to these questions. Technology can enable artists to be more creative. Scientific and artistic thinking give us two complementary tools to understand the complexity of the world, with science reducing subjective experience to essential principles and art intensifying and expanding our experiences. These examples also show how artists can push the boundaries of technology into exciting new realms that have not been explored before. The impact that art and art practice can have on culture, society, and social responsibility is explored in detail through examples and case studies. In

addition, the book presents how artists are creating and reflecting cultural and societal resonance in their work. Can other disciplines help artists to be more creative? All are part of an interrelated wider society and enables artists to develop artwork fit for highly interfaced and conceptually broad contemporary contexts. This is illustrated with examples which show exciting and challenging results. Creativity in Art, Design and Technology is relevant for artists, designers, scientists and technologists. All can benefit in a major way from a greater understanding of creativity, and the ways in which mutual interaction and collaboration enables all areas to develop. The potential for the future is immense and this book signposts the way forward.

Talk to Me Paola Antonelli, 2011 Published in conjunction with an exhibition at The Museum of Modern Art, *Talk to Me* thrives on an important late 20th-century cultural development in design: a shift from the centrality of function to that of meaning. From this new perspective, objects contain information that goes well beyond their immediate use or appearance, providing access to complex systems and networks and acting as gateways and interpreters. Whether openly and actively, or in subtle, subliminal ways, things talk to us, and designers write the initial script that lets us develop and improvise the dialogue. *Talk to Me* focuses on objects that involve direct interaction, such as interfaces, information systems, communication devices, and projects that establish a practical, emotional or even sensual connection between their users and entities such as cities, companies, governmental institutions, as well as other people. The featured objects range in date from the early 1980s - beginning with the first Graphic User Interface, developed by Xerox Parc in 1981 - with particular attention given to projects from the last five years and to several ones currently in development. Included are a diverse array of examples, from computer and machine interfaces to websites, video games, devices and tools, and installations. Organized thematically, *Talk to Me* features essays by Paola Antonelli, Jamer Hunt, Alexandra Midel, Kevin Slavin, and Koi Vinh. By introducing design practices that are becoming increasingly crucial to our world, the book presents a highly distilled sample of today's best design production that uses technology in creative and unexpected ways, showing how rich and deep design's influence will be on our future.

Formal Methods Klaus Havelund, Jan Peleska, Bill Roscoe, Erik de Vink, 2018-07-11 This book constitutes the refereed proceedings of the 22nd International Symposium on Formal Methods, FM 2018, held in Oxford, UK, in July 2018. The 44 full papers presented together with 2 invited papers were carefully reviewed and selected from 110 submissions. They present formal methods for developing and evaluating systems. Examples include autonomous systems, robots, and cyber-physical systems in general. The papers cover a broad range of topics in the following areas: interdisciplinary formal methods; formal methods in practice; tools for formal methods; role of formal methods in software systems engineering; and theoretical foundations.
