*Creativity, Inc. (The Expanded Edition)* Ed Catmull, Amy Wallace, 2023-09-28 The co-founder and longtime president of Pixar updates and expands his 2014 New York Times bestseller on creative leadership, reflecting on the management principles that built Pixar's singularly successful culture, and on all he learned during the past nine years that allowed Pixar to retain its creative culture while continuing to evolve. "Might be the most thoughtful management book ever."—Fast Company For nearly thirty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, Finding Nemo, The Incredibles, Up, and WALL-E, which have gone on to set box-office records and garner eighteen Academy Awards. The joyous storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student, and then forged a partnership with George Lucas that led, indirectly, to his founding Pixar with Steve Jobs and John Lasseter in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie's success—and in the twenty-five movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on philosophies that protect the creative process and defy convention, such as:

- Give a good idea to a mediocre team and they will screw it up. But give a mediocre idea to a great team and they will

either fix it or come up with something better. • It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them. • The cost of preventing errors is often far greater than the cost of fixing them. • A company's communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody. Creativity, Inc. has been significantly expanded to illuminate the continuing development of the unique culture at Pixar. It features a new introduction, two entirely new chapters, four new chapter postscripts, and changes and updates throughout. Pursuing excellence isn't a one-off assignment but an ongoing, day-in, day-out, full-time job. And Creativity, Inc. explores how it is done.

**Mathematical Surprises** Mordechai Ben-Ari,2022-09-07 This is open access book provides plenty of pleasant mathematical surprises. There are many fascinating results that do not appear in textbooks although they are accessible with a good knowledge of secondary-school mathematics. This book presents a selection of these topics including the mathematical formalization of origami, construction with straightedge and compass (and other instruments), the five- and six-color theorems, a taste of Ramsey theory and little-known theorems proved by induction. Among the most surprising theorems are the Mohr-Mascheroni theorem that a compass alone can perform all the classical constructions with straightedge and compass, and Steiner's theorem that a straightedge alone is sufficient provided that a single circle is given. The highlight of the book is a detailed presentation of Gauss's purely algebraic proof that a regular heptadecagon (a regular polygon with seventeen sides) can be constructed with straightedge and compass. Although the mathematics used in the book is elementary (Euclidean and analytic geometry, algebra, trigonometry), students in secondary schools and colleges, teachers, and other interested readers will relish the opportunity to confront the challenge of understanding these surprising theorems.

*Proceedings of the 4th International Conference on Language, Art and Cultural Exchange (ICLACE 2023)* Bootheina Majoul, Guiyun Guan, Nick Groom, 2023-08-28 This is an open access book. The 4th International Conference on Language, Art and Cultural Exchange (ICLACE 2023) will be held on May 19-21, 2023 in Hangzhou, China. Culture includes language, which is a special cultural phenomenon. For culture, most scholars agree that it mainly includes two aspects: material culture and spiritual culture. Specific examples to show cultural phenomena will be of great benefit to our understanding. Some examples of material culture are listed here: Indian women wear saris, Japanese like to eat sashimi, and Chinese like to shake hands when meeting each other. These are various manifestations of material culture in different nations. Language is the mode of transmission of culture. Language is one of the most important ways of thinking and cultural exchange of human beings, which is actually the manifestation of the formation and transmission of culture. Because of thinking, human beings gradually create culture in the continuous social practice, and then spread their national culture to each other in the continuous language exchange. Since ancient times, art and culture have been going hand in hand and complementing each other. On the one hand, art is an important connotation and component of culture, and the progress of art is the driving force of cultural development. On the other hand, culture is the source and content of art, and the prosperity of culture is the key to improve the level of art. On the other hand, culture is the source and content of art, and the prosperity of culture is the key to improving the level of art. Therefore, whether it is culture or art, it is not only a symbol of an era, a representation of people's life style, but also a guide to the direction of social development. The relationship between language, art and cultural communication is a hot topic for many scholars to study at present. Therefore, an academic conference is set up for authors to discuss related research issues and exchange new ideas, hoping that scholars can burst out more excellent and valuable ideas in this conference. ICLACE 2023 is to bring together innovative academics and industrial experts in the field of Literature, Art and Cultural Exchange research to a common forum. The primary goal of the conference is to provide a platform for scientists, scholars, and engineers from all over the world to present ongoing research activities, fostering the research and business relations and promoting scientific information interchange and cooperation between all the participants.

**No Truth Without Beauty** Leena El-Ali, 2021-12-01 In this comprehensive open access book, written for readers from any or no religious background, Leena El-Ali does something remarkable. Never before has anyone taken on every last claim relating to Islam and women and countered it not just with Qur'anic evidence to the contrary, but with easy-to-use tools

available to all. How can a woman's testimony be worth half of a man's? How can men divorce their wives unilaterally by uttering three words? And what's with the obsession with virgins in Paradise? Find the chapter on any of the seventeen topics in this book, and you will quickly learn a) where the myth came from and b) how to bust it. The methodology pursued is simple. First, the Qur'an is given priority over all other literary or "scriptural" sources. Second, the meaning of its verses in the original Arabic is highlighted, in contrast to English translations and/or widespread misunderstanding or misinterpretation.

The 5th INTERNATIONAL CONFERENCE ON ARTS AND DESIGN EDUCATION (ICADE) "Digital Media Literacy and Mastery of Post-pandemic in Arts and Design Education" BACKGROUND The past year has been one of enormous turbulence and upheaval where nobody has been left untouched by the impact of the global pandemic, even a great change has been forced upon artists and educators in their work creation process as well as learning and teaching practice. What and how artists and educators have thought and gone through to keep their field sustained should be disseminated as a mutual learning to enhance our awareness on arts and design sustainability and role during pandemic. ICADE 5 aims to bring together leading academic artists, arts and design researchers and scholars to exchange and share their notion, experiences, and research results on all aspects of Digital Media Literacy and Mastery in Arts and Design education during pandemic and its urgencies after pandemics. It also provides a premier interdisciplinary platform for arts and design researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted which involves digital media literacy or mastery in the fields of Arts and Design education. The 5th International Conference on Arts and Design Education (ICADE) is a conference hosted by Faculty of Arts and Design Education Universitas Pendidikan Indonesia. This conference will be held on September 22nd, 2022 through Zoom Webinar. ICADE has covered a broad range of topic on music, dance, drama, visual arts, visual communication design, arts education, film and television, and multidisciplinary arts fields. This conference scopes

may pertain how artist, designer, or arts and design educators finally adapt and conquer digital media to support their work creation and studies activities during pandemic; attitude changes toward art and design works creation; best practice of art and design creation and studies during pandemic; sorts of digital media which might be left or continuously used after pandemic; what finally the digital media can't ever cover during pandemic even to this moment (post-pandemic); potential disruptive/constructive point of digital media use; as well as other substance where we spot a relation between a digital media with arts and design creation and studies.

*Proceedings of the 2023 2nd International Conference on Social Sciences and Humanities and Arts (SSHA 2023)* Mohd Fauzi bin Sedon,Intakhab Alam Khan,Mehmet CÜNEYT BİRKÖK,KinSun Chan,2023-06-29 This is an open access book. With the progress of social civilization, social science and its research are becoming more and more important. Theoretically and practically, the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings. At present, social science research and its results can hardly meet the needs of social development, especially the unscientific evaluation of social science results, which has aroused great concern from all walks of life, and has produced dirt and questions on social science, thus affecting the proper development of social science. Max Weber once said that the most important function of social science in modern times is to keep people clear-headed and to

resist the delusions of prophetic legislators. Humanities and arts are the process of perceiving, realizing, thinking, manipulating, and expressing objective or subjective objects through capturing and excavating, feeling and analyzing, integrating and applying, or displaying the stage results in the form obtained through feeling (seeing, hearing, smelling, touching). The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions. And by reacting to today's increasingly intricate problems and situations through systematic and professional discussions, they will further contribute to the improvement of institutions and the development of society. By thinking about issues and looking at problems and the world from different perspectives by putting the two together, it may be possible to have more comprehensive, appropriate, and better responses; for example, the development of laws requires a deeper understanding of the environment in which they are implemented; international trade requires a certain understanding of the customs of different countries; and the development of tax and economic policies requires a certain understanding of the population, consumer demand, etc.

**Proceedings of the 2023 2nd International Conference on Educational Innovation and Multimedia Technology (EIMT 2023)** Chew Fong Peng, Adelina Asmawi, Chuanjun Zhao, 2023-07-04 This is an open access book. As a leading role in the global megatrend of scientific innovation, China has been creating a more and more open environment for scientific innovation, increasing the depth and breadth of academic cooperation, and building a community of innovation that benefits all. Such endeavors are making new contributions to the globalization and creating a community of shared future. To adapt to this changing world and China's fast development in the new era, 2023 2nd International Conference on Educational Innovation and Multimedia Technology to be held in March 2023. This conference takes bringing together global wisdom in scientific innovation to promote high-quality development as the theme and focuses on cutting-edge research fields including Educational Innovation and Multimedia Technology. **Proceedings of the 2022 2nd International Conference on Computer Technology and Media Convergence Design (CTMCD 2022)** Kannimuthu Subramanian, Jian Ouyang, Wei Wei, 2023-02-10 This is an open access book. With the rapid development of society and the continuous progress of computer science and technology, when entering the information age, design has also been integrated into the new media age in time. The application of computer technology in design has broken the limitations of traditional design, achieved a huge breakthrough in the field of design, provided more innovative forms of expression for design, and also achieved subversive changes in design methods. We need to note that

design comes from life, and then it is a matter of applying tools and crafting techniques to realize it. For designers, maintaining innovation is still the first and foremost in creation. How to use technology to enable design without relying on technology is still a dilemma. Therefore, it is necessary to create a space for the researchers, practitioners, and enthusiasts in the field of computing and design to gather and discuss this current issue. The International Conference on Computer Technology and Media Convergence Design aims to accommodate this need, as well as to: 1. Advance the academic field by exploring cutting-edge research and applications. 2. Open up new horizons, broaden the horizons of computer technology research and design, 3. Create academic forums to provide opportunities for academic resource sharing and research exchanges. 2022 2nd International Conference on Computer Technology and Media Convergence Design (CTMCD 2022) will be held in Dali, China during May 13-15, 2022. CTMCD2022 invites the researchers, practitioners, and enthusiasts in the field of computing and design to participate and share knowledge. We also accept papers on computer technology and media convergence design.
