The Icon Project Leslie Sklair, 2017 The Icon Project argues that the transnational capitalist class mobilizes two forms of iconic architecture--unique icons recognized as works of art, notably designed by global architects (such as Frank Gehry and Zaha Hadid); and typical icons copying elements of unique icons--to promote the same ideological message: the culture-ideology of consumerism.

Major Infrastructure Projects Edward Ochieng, Andrew Price, David Moore, 2017-09-16 In this unique and comprehensive textbook, the authors examine the challenges faced all around the world with regard to major infrastructure project management, and they champion a fresh approach that takes into account the interdependencies between economic, social, political, technological and legislative environments. Managing, developing and investing in crucial infrastructure is essential to keep up with the challenges of a fast-paced and globalised world, but affecting and overseeing change requires a deep understanding of complex interlocking systems. To this end the book is neatly divided into three key parts: project appraisal, maximising integrated supply chains, and implementing value-enhancing practices. This is the ideal companion for courses on any aspect of civil engineering and construction project management including modules in infrastructure planning, infrastructure management, construction management and business management. The book will also appeal to practitioners involved in the management of capital and infrastructure projects.

Romania International Monetary Fund. European Dept., 2015-03-27 This Selected Issues paper discusses benefits of boosting quality public infrastructure spending in Romania. Since the financial crisis, fiscal and current account deficits have been tackled, but the infrastructure deficit has widened. Quality public investment in infrastructure can boost domestic demand and potential GDP growth, particularly in low growth environments. The IMF staff simulations employing the European Union's production function methodology show significant growth benefits from higher quality infrastructure spending. As a result of higher investment, real GDP would increase by about 1 percent initially with the impact peaking in 2025.

The Geographical Sciences During 1986—2015 Shuying Leng, Xizhang Gao, Tao Pei, Guoyou Zhang, Liangfu Chen, Xi Chen, Canfei He, Daming He, Xiaoyan Li, Chunye Lin, Hongyan Liu, Weidong Liu, Yihe Lü, Shilong Piao, Qiuhong Tang, Fulu Tao, Lide Tian, Xiaohua Tong, Cunde Xiao, Desheng Xue, Linsheng Yang, Linwang Yuan, Yuanming Zheng, Huiyi Zhu, Liping

Zhu,2016-07-28 In four chapters and an introduction, this book systematically helps readers understand the development of the Geographical Sciences both in China and in the world during the past 30 years. Through data analysis of methodologies including CiteSpace, TDA, qualitative analysis, questionnaires, data mining and mathematical statistics, the book explains the evolution of research topics and their driving factors in the Geographical Sciences and its four branches, namely Physical Geography, Human Geography, Geographical Information Science and Environmental Geography. It also identifies the role of the Geographical Sciences in the analysis of strategic issues such as global change and terrestrial ecosystems, terrestrial water cycle and water resources, land change, global cryosphere evolution and land surface processes on the Tibetan Plateau, economic globalization and local responses, regional sustainable development, remote sensing modelling and parameter inversion, spatial analysis and simulation, and tempo-spatial processes and modelling of environmental pollutants. It then discusses research development and inadequacy of Chinese Geographical Sciences in the above-mentioned topics, as well as in the fields including Geomorphology and Quaternary environmental change, Ecohydrology, ecosystem services, the urbanization process and mechanism, medical and health geography, international rivers and transboundary environment and resources, detection and attribution of changes in land surface sensitive components, and uncertainty of spatial information and spatial analysis. It shows that the NSFC has driven the development in all these topics and fields. In addition, the book summarises trends of the Geographical Sciences in China and the research level in major countries of the world through an overview of geographical education in colleges and universities, the analysis of publications, citations and author networks of SCI/SSCI and CSCD indexed articles, and the description of Sino-USA, Sino-UK and Sino-German cooperation. This book serves as an important reference to anyone interested in geographical sciences and related fields.

Global education monitoring report, 2019 UNESCO,2018-12-03 The Report examines the education impact of migration and displacement across all population movements: within and across borders, voluntary and forced, for employment and education. It also reviews progress on education in the 2030 Agenda for Sustainable Development. In view of increasing diversity, the report analyses how education can build inclusive societies and help people move beyond tolerance and learn to live together.

Innovations in Digital Economy Dmitrii Rodionov,Tatiana Kudryavtseva,Angi Skhvediani,Mohammed Ali Berawi,2022-08-12 This book constitutes the revised selected papers of the Third International Conference on Innovations in Digital Economy, SPBU IDE 2021, held in St. Petersburg, Russia, in October 2021. The 23 papers presented were thoroughly reviewed and selected for publication from 153 submissions. The papers are organized according the following topical sections: economic efficiency and social consequences of digital innovations implementation; regional innovation systems and clusters as drivers of the economic growth during the Fourth Industrial Revolution; industrial, service and agricultural digitalization; response of an educational system and labor market to the digital-driven changes in the economic system;

digital transformation trends in the government and financial sector.

Project Management Methodologies, Governance and Success Robert Joslin,2019-04-30 Project management methodologies, practices, and guidelines are the only explicit information that project managers have and, when properly maintained, should reflect the most current knowledge and guidance to achieve repeatable successful project outcomes. Despite more than 50 years of research in the field of project management, project success r

Socioeconomic Evaluation of Megaprojects Markku Lehtonen,Pierre-Benoît Joly,Luis Aparicio,2016-11-22 The governance and evaluation of ‘megaprojects’ – that is, large-scale, complex, high-stakes infrastructure projects usually commissioned by governments and delivered through partnerships between public and private organisations – is receiving increased attention. However, megaproject evaluation has hitherto largely adopted a linear-rationalist perspective to explain the frequent failure of such projects to meet the ‘iron triangle’ of performance criteria: delivering on time, within budget, and according to specifications. This approach recommends greater control and accountability to remedy megaproject ‘pathologies’. Drawing on empirical examples mainly from the transport sector and radioactive waste disposal, this book offers new perspectives to megaproject evaluation. Comprising contributions from leading experts in project evaluation and appraisal, this collection opens up new avenues by suggesting two ways of improving megaproject evaluation: 1) approaches that go beyond the dominant linearrationalist notion of policy processes, and emphasise instead the objective of opening up appraisal processes in order to enhance learning and reflexivity; and 2) approaches that extend evaluative criteria beyond the ‘iron triangle’, to cover the various socioeconomic impacts and preconditions for project success. This volume will be of great relevance to scholars and practitioners with an interest in megaprojects, energy and climate policy, radioactive waste management, urban design, and project planning and management.

China’s Belt and Road Initiatives Wei Liu,2018-05-09 This book presents the series of lectures on the Belt and Road Initiatives from the Guang Ming Forum organized by Guang Ming Daily. Co-authored by Ge Jianxiong, Hu Angang, Lin Yifu, Qiao Liang and nine other respected scholars and experts, it provides a comprehensive analysis of the Belt and Road Initiatives and its significance in terms of economics and economic geography, yielding an insightful interpretation of the strategy. It also offers multiple perspectives, including national political, historical, military, diplomatic, cultural, technological and legal.

UNESCO science report UNESCO,2015-11-09 There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in

order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

November Project: The Book Brogan Graham, Bojan Mandaric, Caleb Daniloff, 2016-04-12 November Project: The Book is the story of how two irreverent, way-outside-the-box fitness fanatics are flipping the fitness industry on its head and literally making the world a better place, one city at a time. No facility. No machines. Just two dudes and a tribe of thousands. Welcome to November Project's world takeover. What started 4 years ago as a simple monthlong workout pact between two former Northeastern University oarsmen in Boston has grown into an international fitness phenomenon. November Project espouses free, public, all-weather, outdoor group sweats that turn strangers into friends and connect everyone to the city in which they live. It's been described as everything from flashmob fitness to "the fight club of running clubs" and a cult. But November Project prides itself on defying categories. In November Project: The Book, Brogan Graham (a.k.a. BG) and Bojan Mandaric, in their own spicy, big-hearted words, chronicle, along with tribe member and writer Caleb Daniloff, their fitness movement's genesis, evolution, operations, membership, "secret sauce," and future—and along the way, show you how you can get fit and societally engaged. The book also includes illustrated workouts; the keys to meaningful civic engagement; information on using your city as a gym; advice on starting an NP tribe; tips on growing, sustaining, and invigorating membership through social media; and thoughts on the collective power of community.

World Englishes, Global Classrooms Kirsten Hemmy, Chandrika Balasubramanian, 2022-12-14 This book provides a critical overview of contemporary world issues in Language and Literary Studies. It offers specific ideas as to how to move away from the traditional literary canon, on the one hand, and traditional native-speaker norms in English language teaching, on the other. It delivers a global perspective of both the growth and the challenges in ELT studies around the world. Following the introduction, the first section of the book contains chapters from international scholars on recognizing and

diversifying Englishes in today's language and translation classrooms. Specifically, the chapters focus on issues such as the cultural hegemony of a monolithic English, English and university pedagogy, English as a gatekeeper, and the role of a reconceived English education in promoting cross-cultural understanding. The second section focuses on the interaction of literature and culture, with specific chapters focusing on decolonizing the traditional literary canon, defining a global text, representing cultural interactions in literary texts, and emerging genres in contemporary English literature. Both sections of the book question the existing boundaries in a post-2020 world, specifically in a non-western world. It is an indispensable resource for scholars in cultural studies, linguistics, and literary studies.

Pax Technica Philip N. Howard,2015-01-01 A technology expert describes a possible future, and its repercussions in the area of privacy, social control and political manipulation, of a world where more and more things, like eyeglasses, thermostats and home security systems are reliant on the Internet.

Advances in Urbanism, Smart Cities, and Sustainability Uday Chatterjee,Arindam Biswas,Jenia Mukherjee,Sushobhan Majumdar,2022-04-20 While technology is developing at a fast pace, urban planners and cities are still behind in finding effective ways to use technology to address citizen's needs. Multiple aspects of sustainable urbanism are brought together in this book, along with advanced technologies and their connections to urban planning and management. It integrates urban studies, smart cities, AI, IoT, remote sensing, and GIS. Highlights include land use planning, spatial planning, and ecosystem-based information to improve economic opportunities. Urban planners and engineers will understand the use of AI in disaster management and the use of GIS in finding suitable landfill sites for sustainable waste management. Features Explains the process of urban heritage conservation, including the process of urban renewal and its regeneration and the role of citizens in urban renewal, planning, and management. Includes several case studies highlighting urban environmental problems and challenges in developed and developing countries and the ways for converting urban areas into smart cities. Focuses on urban resources, the supply of energy in smart cities, and their proper management practices. Introduces the role of remote sensing, GIS, and IoT in making a smart city and meeting sustainable goals. Analyzes unique case studies, their challenges and obstacles, and proposes a set of factors to understanding smart city initiatives and projects.

The Report: Kuwait Oxford Business Group,2015-09-28 Kuwait is one of the biggest players in the global energy market, with its proven oil reserves currently the sixth largest in the world. Although revenues from hydrocarbons account for more than 60% of GDP and 95% of exports, the country's low production costs and sizeable fiscal reserves mean it is well positioned to cope with lower oil prices in the short term. This is clear from the government's ongoing commitment to delivering projects outlined in the national development strategy, Kuwait Vision 2035. In the financial services sector, Kuwait continues to perform well, as a series of regulations put in place by the Central Bank of Kuwait in recent years have served to

shore up the sector's recovery from the global economic downturn.

Foreign Operation Methods Lawrence S. Welch, Gabriel R.G. Benito, Bent Petersen, 2018 The choice of foreign operation methods, whether they are used singly or in combination, is a critical question for internationalising companies. This thoroughly updated edition of a successful text provides comprehensive coverage of the main tools companies use in seeking to penetrate foreign markets - covering investment, exporting and contractual arrangements such as franchising and management contracts. An important feature of this book is its thorough overview of theoretical and strategic perspectives such as mode packaging, mode switching and mode flexibility and will be invaluable for final year undergraduate and postgraduate students.

Minerals Yearbook Mines Bureau, Geological Survey, Interior Department, 2018-04-19 The region of Europe and Central Eurasia defined in this volume encompasses territory that extends from the Atlantic Coast of Europe to the Pacific Coast of the Russian Federation. It includes the British Isles, Iceland, and Greenland (a self-governing part of the Kingdom of Denmark). Sustainable Neighbourhoods in Australia Raymond Charles Rauscher, Salim Momtaz, 2015-04-21 This book examines the planning and implementation of policies to create sustainable neighborhoods, using as a case study the City of Sydney. The authors ask whether many past planning and development practices were appropriate to the ways that communities then functioned, and what lessons we have learned. The aim is to illustrate the many variations within a city and from neighborhood to neighborhood regarding renewal (rehabilitation), redevelopment (replacement) and new development. Case study examples of nine City of Sydney neighborhoods note the different histories of planning and development in each. Features of the studies include literature searches, field work (with photography), and analysis. The authors propose a set of sustainability principles which incorporate elements of the twenty seven principles of the 1992 Rio Declaration on Environment and Development Part One explores sustainable urban planning, and the importance of planning tools that enable best planning outcomes for communities and investors. Common factors in the nine case study neighborhoods are renewal, redevelopment and development pressures affecting Sydney from the 1970s to 2014. Also discussed are the differing circumstances of planning faced by authorities, developers and communities in each of the study areas. Part Two of the book is focused on the case study areas in City of Sydney East area: Woolloomooloo and Kings Cross. Part Three covers case study areas in Sydney's Inner South area: Chippendale, Redfern and Waterloo District. Part Four surveys the Inner West

suburb of Erskineville. Part Five looks at the City West area, including the Haymarket District and the Pyrmont and Ultimo District. Part Six concentrates on the North West area suburb of Glebe. Part Seven of the book looks at the growth area of South Sydney District, which includes the suburbs of Beaconsfield, Zetland and the new localities of Victoria Park and Green Square. The authors recount lessons learned and outline directions of planning for sustainable neighborhoods. Finally, the authors challenge readers to apply the lessons of these case studies to further advances in sustainable urban planning.

Cloud IoT Jitendra Kumar Verma, Deepak Kumar Saxena, Vicente González-Prida Díaz, Vira Shendryk, 2022-12-30 The Internet of Things (IoT) is one of the most disruptive technologies, enabling ubiquitous and pervasive computing scenarios. IoT is based on intelligent self-configuring nodes (also known as things) interconnected in a dynamic and global collaborative network infrastructure. In contrast, Cloud computing has virtually unlimited capabilities in terms of storage and processing power, speed, and is a more mature technology. Due to intrinsic nature of Cloud computing and IoT, they both complement each other. Recently, we are witnessing an increasing trend in exploiting use of both Cloud and IoT together. Salient Features: • Presents latest developments in Cloud computing • Presents latest developments in Internet of Things • Establishes links between interdisciplinary areas where IoT and Cloud both can play a role for improvement of process • Intends to provide an insight into non-IT related models for improvement of lives • Bridges the gap between obsolete literature and current literature This book is aimed primarily at advanced undergraduates and graduates working with IoT and cloud computing. Researchers, academicians, policy makers, government officials, NGOs, and industry research professionals would also find the book useful.
