Then There Were None Martha Noyes,2003 Then There Were None, by award-winning Honolulu writer and artist Martha H. Noyes, is a personal and emotional account, in words and pictures, of the effect of Western contact on the Hawaiian population. Drawing from a variety of sources, Noyes chronicles the effects, from the arrival of Capt. Cook to the present, of disease, written language, the missionaries, landownership, the overthrow of the monarchy, and the suppression of hula and Hawaiian language, concluding with a look at present-day activism. Photographs vividly contrast tourist images with scenes from the real Hawaii and highlight the contrast between a culture rooted in cosmology and the material culture of those who made Hawaii their own. -- Amazon.com viewed August 4, 2020.

And when a second nun is killed, Bea and the other members of the League of Literary Ladies—Chandra, Kate, and Luella—start to wonder about eerie parallels with the Agatha Christie mystery classic, *And Then There Were None*. Since Bea has the trust of the sisters, the local chief of police asks her and the other Literary Ladies to interview each of them. Expecting a confession may be asking for a miracle, but Bea hopes she can at least find the killer before another nun gets crossed off the guest list...

And Then There Were None Paul R. Krausman, 2017-04-01 Once plentiful in the mountains of southern Arizona, by the 1990s desert bighorn sheep were wiped out in the Pusch Ridge Wilderness of the Santa Catalina Mountains as a result of habitat loss and alteration. This book uses their history and population decline as a case study in human alteration of wildlife habitat. When human encroachment had driven the herd to extinction, wildlife managers launched a major and controversial effort to reestablish this population. For more than forty years Paul R. Krausman directed studies of the Pusch Wilderness population of these iconic animals, located in the mountainous outskirts of Tucson. The story he tells here reveals the complex relationships between politics and biology in wildlife conservation. His account of the evolution of wildlife conservation practices includes discussions of techniques and of human attitudes toward predators, fire, and their management.
