Advances in Fashion and Design Research Ana Cristina Broega,Joana Cunha,Hélder Carvalho,Bernardo Providência,2022-10-19 This book offers a multidisciplinary perspective on research and developments at the interface between industrial design, textile engineering and fashion. It highlights research that is expected to foster the development of design and fashion on a global and interdisciplinary scale. Gathering the proceedings of the 5th International Fashion and Design Congress, CIMODE 2022, held on July 4-7, 2022, in Guimarães, Portugal, this book offers extensive information and a source of inspiration to both researchers and professionals in the field of fashion, design, engineering, communication as well as education.

The Image of the City Kevin Lynch,1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Renoir Scala Publishers, Ltd.,2006-06 Renoir masterfully created Luncheon of the Boating Party's enchanting mood by capturing a contemporary moment - 19th-century leisure on the Seine - and the universal appeal of celebration. He also combined several of the traditional categories of painting: still life, landscape, portraiture and genre. The result is a timeless work that captures the atmosphere of an idyllic place, where friends share the pleasures of food, wine and conversation. Scala's new 4-fold format is ideal for displaying this exquisite painting. It showcases archival photographs that identify the revellers, and x-rays of the painting, which reveal little-known compositional changes, as well as details and images that fold out to bring this late 19th-century icon to life. 38 colour & 19 b/w illustrations

Activating the Inanimate: Visual Vocabularies of Performance Practice Celia Morgan, Filipa Malva, 2019-01-04

This volume was first published by Inter-Disciplinary Press in 2013. The dynamic exchange of perspectives that constituted the 2nd Global Conference of Performance: Visual Aspects of Performance Practice demonstrated that the foundational concept of the project is a vibrant platform for sharing and extending ideas within all aspects of scenographic practice in performance. This volume is a compilation of papers that formed the basic structure of that conference. The first four chapters present a developing schema of visual languages within theatre. From Beckett, Ibsen, Svoboda to Wilson, they navigate the symbolic and visual prioritizing of postdramatic scenographic forms. Part 2 reconsiders the predetermined divisions that deflate experiential encounters with the inanimate. Dance, puppetry and slapstick provide examples of interaction between performers and their environment. Part 3 addresses various renderings of design processes, exploring the role of drawing, fabric and body in creating a narrative. Part 4 negotiates the sensitive interface between public and performance while looking at the Burning Man Festival, flash mobs and opera media casting. The final chapters represent a global collective of process strategies that confront the production and methodologies of meaning. They engage with cultural presumptions and subjectivities in post Cultural Revolution China, Spanish flamenco, American Indian (post)colonial resistances and the traditions of Australian Aboriginal artists.

Mathematical Surprises Mordechai Ben-Ari, 2022-09-07 This is open access book provides plenty of pleasant mathematical surprises. There are many fascinating results that do not appear in textbooks although they are accessible with a good knowledge of secondary-school mathematics. This book presents a selection of these topics including the mathematical formalization of origami, construction with straightedge and compass (and other instruments), the five- and six-color theorems, a taste of Ramsey theory and little-known theorems proved by induction. Among the most surprising theorems are the Mohr-Mascheroni theorem that a compass alone can perform all the classical constructions with straightedge and compass, and Steiner's theorem that a straightedge alone is sufficient provided that a single circle is given. The highlight of the book is a detailed presentation of Gauss's purely algebraic proof that a regular heptadecagon (a regular polygon with seventeen sides) can be constructed with straightedge and compass. Although the mathematics used in the book is elementary (Euclidean and analytic geometry, algebra, trigonometry), students in secondary schools and colleges, teachers, and other interested readers will relish the opportunity to confront the challenge of understanding these surprising

theorems.

Proceedings of the 2nd International Conference on Culture, Design and Social Development (CSDS 2022) Mohd Fauzi bin Sedon M. Dom,Peter Thomas Zabielskis,Xudong Liu,Xiao Liu,2023-03-02 This is an open access book. Culture is the spiritual activity and product of human society relative to economy and politics. The traditional concept of human beings believes that culture is a social phenomenon, a product created by human beings for a long time, and at the same time a historical phenomenon, which is the accumulation of human society and history. The technical, economical and cultural nature of art design determines that only with high social and economic development can art and culture flourish. Art design is the product of the combination of art and technology. Art design is also a kind of productivity, which promotes the development of social economy. As a driving factor for social and economic development, design art will also better serve the social economy with its own more perfect operating system. The Commander-in-Chief Test Jeffrey A. Friedman,2023-12-15 In The Commander-in-Chief Test, Jeffrey A. Friedman offers a fresh explanation for why Americans are often frustrated by the cost and scope of US foreign policy—and how we can fix that for the future. Americans frequently criticize US foreign policy for being overly costly and excessively militaristic. With its rising defense budgets and open-ended forever wars, US foreign policy often appears disconnected from public opinion, reflecting the views of elites and special interests rather than the attitudes of ordinary citizens. The Commander-in-Chief Test argues that this conventional wisdom underestimates the role public opinion plays in shaping foreign policy. Voters may prefer to elect leaders who share their policy views, but they prioritize selecting presidents who seem to have the right personal attributes to be an effective commander in chief. Leaders then use hawkish foreign policies as tools for showing that they are tough enough to defend America's interests on the international stage. This link between leaders' policy positions and their personal images steers US foreign policy in directions that are more hawkish than what voters actually want. Combining polling data with survey experiments and original archival research on cases from the Vietnam War through the occupations of Iraq and Afghanistan, Friedman demonstrates that public opinion plays a surprisingly

extensive—and often problematic—role in shaping US international behavior. With the commander-in-chief test, a perennial point of debate in national elections, Friedman's insights offer important lessons on how the politics of image-making impacts foreign policy and how the public should choose its president.
