Transition Point: From Steam to the Singularity Sean A. Culey, 2018-11-06 We live in disruptive times. The world is changing faster than ever before, leaving people dazed, businesses struggling, economies floundering and societies fracturing. But why? Transition Point is the result of over five years of research to establish the answer; a breathtaking tale of freedom, unintended consequences and disruptive technologies that starts 1000 years ago and ends up in the second half of the 21st Century. Starting with an examination into the drivers of technological change and the social, economic and political factors that both enable or suppress it, Transition Point explains why industrialisation happened where and when it did, why progress comes in waves, and why the technologies in the current wave, such as robotics, blockchain and AI, are likely to be the most disruptive of all. It then addresses the million-dollar question: what's next? What impact will this wave have on our businesses, our economies and most importantly, on our society? Culey explores how our current trajectory could result in a new golden age, but also how it is just as likely to result in a digital dictatorship of compliance and constant surveillance. Finally, he explains why we may soon see Homo sapiens' role as the dominant species come to an end. As Klaus Schwab, founder of the World Economic Forum, stated; We stand on the brink of a technological revolution that will fundamentally alter the way we live, work, and relate to one another. In its scale, scope, and complexity, the transformation will be unlike anything humankind has experienced before. Transition Point explains why this is happening, what it means, and why the decisions we make now will prove to be critical.

**Stealing America's Future** William Steiner,2010-04 Stealing America's Future makes a comparison of today's America to late 19th Century Europe using two rare books, The Conventional Lies of our Civilization by Nordau, describing Europe's elitist leadership, and The Soviets at Work by Lenin, outlining the Russian Revolution as it took place. Not a part of the discussion of history, both provide frightening detail about the nuances of the geopolitics of Europe, circa 1900, that relate to today's America. Using heartwarming family stories, humorous anecdotes, incisive criticism, and cold factual analysis, it describes how progressive liberalism, with its attempts at social engineering and excessive permissiveness, has brought social and economic disaster to America. David Letterman relating to Sarah Palin I fear he sees her as more man than he will ever be and more woman than he will ever get. Bill Maher relating to Michelle Obama ...my only conclusion about Maher is that he is just another angry little bully who is fearful of powerful women... Is it time to separate the North American Continent into a federation of smaller component nations better reflecting the economics and ethos of these individual component nations, yet having our common defense as the only connection or do we need to get back to the Constitution our founders gave to us? Raised in a poor farm family in Pawnee County, Nebraska, Dr. Steiner had the ethics of hard work and family values as his primary guide post to succeed. Working his way through college and graduating from the University of Nebraska in 1973, he located his dental practice in an economically impacted area of Omaha, Nebraska where he also worked in a public health clinic, developing insights with regard to what motivates people. He is a pilot and an accomplished martial artist, attaining several black belts. He was featured in a Sun-Up Interview by the Omaha World Herald's, Robert McMorris, and was also featured in an interview by William Rush in the League of Human Dignity paper, where Sensei Steiner outlined his martial arts training strategies for handicapped persons. He was called by Charles Kuralt to panel a discussion of the Gulf Crisis for CBS News before the Gulf War.
