**A Pair of Miracles** Karla Akins, 2017 A parent's gripping journey of awareness, acceptance, and appreciation of her two boys dealing with significant challenges brought on by autism. --Stephen Mark Shore, EdD When Karla Akins hoped that her autistic sons could learn to read and function independently, doctors warned her that those expectations would never be met. She set out to prove that, despite those warnings, all things are possible through God. Laced with humor and compassion, *A Pair of Miracles* is the heartwarming story of her journey rearing adopted twin sons, each diagnosed with autism and fetal alcohol disorder. This is more than a moving biography from a mom on the front lines, however. It is a powerful tool, full of practical help for parents, educators, and church members working with children who have intellectual disabilities, speech impairments, and other limitations on the autism spectrum. It is also a challenge to the church to welcome and celebrate all the members of their congregation, no matter their abilities. Thanks to Karla's determination, faith, and unconditional love--and contrary to the doctors' predictions--her adult twins are now able to function independently in many ways. They help their dad install pools, do carpentry work, and serve in the church as ushers, sound engineers, and children's ministry workers. For parents seeking hope, answers, and peace, Karla leads the way to all three down a path she's already been.

**Colour** Alexandra Loske,2019 Discover the story of colour through the significant scientific discoveries and key artist's works over 400 years. From Isaac Newton's investigations through to Olafur Eliasson's experiential creations, this stunning book documents the fascinating story of colour with an extraordinary collection of original colour material that includes charts, wheels, artists' palettes, swatches and schemes. In 1704, the scientist Isaac Newton published *Opticks*, the result of many years of researching light and colour. By splitting white light, Newton identified the visible range of colours, or the rainbow spectrum. In *Opticks*, he built a colour system around his findings, and he visualised this system in a circular shape, making it one of the first printed colour wheels. The influence of Newton and his followers, combined with the invention of many new pigments as well as watercolours in moist cake form, had made painting with colour an exciting occupation not just for serious artists but also for a much wider audience. The colour revolution had begun. Contents Introduction 1. Unravelling the Rainbow: The Eighteenth-Century Colour Revolution 2. Romantic Ideas & New Technologies: The Early Nineteenth Century 3. Industrialism to Impressionism: The Later Nineteenth Century 4. Colour for Colour's Sake: Colour into the Future: Glossary Bibliography Index
