How to Build Your Own Home Larry Terhune, 2009-05-13 This book is a how-to manual for anyone wanting to build

their own home. This is the first and possibly the only book you will need to purchase on the topic. Many books deal with how to do the actual construction. But very few deal with the all-important management of the building process. It is not a technical manual, but rather a guide to establishing and managing a home building project. Written by a licensed, professional contractor, this book steps you through the process, including selecting the right plans, obtaining a construction loan, hiring sub-contractors, and managing the entire home building process.
