*War Photographs Taken on the Battlefields of the Civil War* Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

**Peter Reinhart's Artisan Breads Every Day** Peter Reinhart,2009-10-27 The renowned baking instructor distills professional techniques down to the basics, delivering artisan bread recipes that anyone with flour and a fridge can bake with ease. Reinhart begins with the simplest French bread, then moves on to familiar classics such as ciabatta, pizza dough, and soft sandwich loaves, and concludes with fresh specialty items like pretzels, crackers, croissants, and bagels. Each recipe is broken into Do Ahead and On Baking Day sections, making every step—from preparation through pulling pans from the oven—a breeze, whether you bought your loaf pan yesterday or decades ago. These doughs are engineered to work flawlessly for busy home bakers: most require only a straightforward mixing and overnight fermentation. The result is reliably superior flavor and texture on par with loaves from world-class artisan bakeries, all with little hands-on time. America's favorite baking instructor and innovator Peter Reinhart offers time-saving techniques accompanied by full-color, step-by-step photos throughout so that in no time you'll be producing fresh batches of Sourdough Baguettes, 50% and 100% Whole Wheat Sandwich Loaves, Soft and Crusty Cheese Bread, English Muffins, Cinnamon Buns, Panettone, Hoagie Rolls, Chocolate Cinnamon Babka, Fruit-Filled Thumbprint Rolls, Danish, and Best-Ever Biscuits. Best of all, these high-caliber doughs improve with a longer stay in the fridge, so you can mix once, then portion, proof, and bake whenever you feel like enjoying a piping hot treat.

**Drugs and Foods from Little-Known Plants** Siri von Reis Altschul,2013-10 The medicinal properties of plants have been of interest to society for centuries and continue to be a subject of modern research. Yet too often research has been predicated upon poorly identified plant material and secondary sources of information. Much of what we know about the use of plants as drugs, poisons, foods, and as instruments of magical or religious practice derives from lore inherited from the clay tablets and papyri of the ancients and from compilations of early Greek, Arabic, and Indian physicians. Meanwhile, information pertaining to plant parts used even now in the daily life of peoples far removed from the influence of modern medical and health practices has been largely overlooked. With the encroachment of civilized cultures on primitive societies, unique traditions—often unwritten—are being destroyed. In many instances, the very plants involved are disappearing. Not infrequently, the only record, where one exists at all, of these vanishing pools of knowledge is that of the botanical field worker. For no matter what chemical or biological investigations may follow, the botanist can affix to an actual specimen, as

he collects it in the field, the local terms applied to the plant and a description of native medicinal or other uses. Dr. Altschul has compiled field notes of health and medical interest on over 5,000 species of plants, culled from some 2,500,000 specimens of higher plants collected by field botanists from all over the world and deposited in the combined collections of the Arnold Arboretum and Gray Herbarium of Harvard University. The resulting catalogue represents a unique approach to supplying new investigational leads to researchers seeking biologically active plant principles. Dr. Altschul's meticulous sheet-by-sheet examination of the Harvard collections provides the pharmacognosist, pharmacologist, and others in the medical and health sciences with an extensive firsthand survey of the domestic medicines of many cultures. These previously unpublished botanists' notes are here made available in a comprehensive publication that should become an important resource for every investigation into the area of medicinal phytochemistry. Indexes to families and genera are provided, as well as a medical index referring to diseases and to therapeutic properties for researchers intent on locating plants with special medicinal capacities. The author is a Research Fellow at the Botanical Museum of Harvard University.
