The Spy Who Would Be Tsar Kevin Coogan,2021-09-16 Michal Goleniewski was one of the Cold War's most important spies but has been overlooked in the vast literature on the intelligence battles between the Western Powers and the Soviet Bloc. Renowned investigative journalist Kevin Coogan reveals Goleniewski's extraordinary story for the first time in this biography. Goleniewski rose to be a senior officer in the Polish intelligence service, a position which gave him access to both Polish and Russian secrets. Disillusioned with the Soviet Bloc, he made contact with the CIA, sending them letters containing significant intelligence. He then decided to defect and fled to America in 1961 via an elaborate escape plan in Berlin. His revelations led to the exposure of several important Soviet spies in the West including the Portland spy ring in the UK, the MI6 traitor George Blake, and a spy high up in the West German intelligence service. Despite these hugely important contributions to the Cold War, Goleniewski would later be abandoned by the CIA after he made the outrageous claim that he was actually Tsarevich Alexei Nikolaevich of Russia – the last remaining member of the Romanov Russian royal family and therefore entitled to the lost treasures of the Tsar. Goleniewski's increasingly fantastical claims led to him becoming embroiled in a bizarre demi-monde of Russian exiles, anti-communist fanatics, right-wing extremists and chivalric orders with deep historical roots in America's racist and antisemitic underground. This fascinating and revelatory biography will be of interest to students and researchers of the Cold War, intelligence history and right-wing extremism as well as general readers with an interest in these intriguing subjects.

**Electronic Access Control** Thomas L. Norman,2011-09-26 Electronic Access Control introduces the fundamentals of electronic access control through clear, well-illustrated explanations. This book consolidates this information, covering a comprehensive yet easy-to-read list of subjects that every Access Control System Designer, Installer, Maintenance Tech or Project Manager needs to know in order to develop quality and profitable Alarm/Access Control System installations. Within these pages, Thomas L. Norman – a master at electronic security and risk management consulting and author of the industry reference manual for the design of Integrated Security Systems – describes the full range of EAC devices (credentials, readers, locks, sensors, wiring, and computers), showing how they work, and how they are installed. - A comprehensive introduction to all aspects of electronic access control - Provides information in short bursts with ample illustrations - Each chapter begins with outline of chapter contents and ends with a quiz - May be used for self-study, or as a professional reference guide

**Practical Lock Picking** Deviant Ollam,2010-07-27 For the first time, Deviant Ollam, one of the security industry's best-known lockpicking teachers, has assembled an instructional manual geared specifically toward penetration testers. Deviant's material is presented with rich, detailed diagrams and is offered in easy-to-follow lessons which allow even beginners to acquire the knowledge very quickly. No Tech Hacking Johnny Long,2011-04-18 Johnny Long's last book sold 12,000 units worldwide. Kevin Mitnick's last book sold 40,000 units in North America.As the cliché goes, information is power. In this age of technology, an increasing majority of the world's information is stored electronically. It makes sense then that we rely on high-tech electronic protection systems to guard that information. As professional hackers, Johnny Long and Kevin Mitnick get paid to uncover weaknesses in those systems and exploit them. Whether breaking into buildings or slipping past industrial-grade firewalls, their goal has always been the same: extract the information using any means necessary. After hundreds of jobs, they have discovered the secrets to bypassing every conceivable high-tech security system. This book reveals those secrets; as the title suggests, it has nothing to do with high technology.• Dumpster DivingBe a good sport and don't read the two D words written in big bold letters above, and act surprised when I tell you hackers can accomplish this without relying on a single bit of technology (punny). • TailgatingHackers and ninja both like wearing black, and they do share the ability to slip inside a building and blend with the shadows.• Shoulder SurfingIf you like having a screen on your laptop so you can see what you're working on, don't read this chapter.• Physical SecurityLocks are serious business and lock technicians are true engineers, most backed with years of hands-on experience. But what happens when you take the age-old respected profession of the locksmith and sprinkle it with hacker ingenuity?• Social Engineering with Jack WilesJack has trained hundreds of federal agents, corporate attorneys, CEOs and internal auditors on computer crime and security-related topics. His unforgettable presentations are filled with three decades of personal war stories from the trenches of Information Security and Physical Security. • Google HackingA hacker doesn't even need his own computer to do the necessary research. If he can make it to a public library, Kinko's or Internet cafe, he can use Google to process all that data into something useful.• P2P HackingLet's assume a guy has no budget, no commercial hacking software, no support from organized crime and no fancy gear. With all those restrictions, is this guy still a threat to you? Have a look at this chapter and judge for yourself.• People WatchingSkilled people watchers can learn a whole lot in just a few quick glances. In this chapter we'll take a look at a few examples of the types of things that draws a no-tech hacker's eye.• KiosksWhat happens when a kiosk is more than a kiosk? What happens when the kiosk holds airline passenger information? What if the kiosk holds confidential patient information? What if the

kiosk holds cash?• Vehicle SurveillanceMost people don't realize that some of the most thrilling vehicular espionage happens when the cars aren't moving at all!

others need to have this critical information presented in this book in order to deal effectively with their missions and be able to assess vulnerability through a solid theoretical understanding of the subjects covered. Information in this book has been gathered from many sources, including locksmiths, manufacturers, instructors from recognized specialized entry schools, vendors, lock suppliers, designers, engineers, inventors, forensic examiners, and others. The subject of this book is very complicated, diverse, and global. There is a great deal of history and technology incorporated within the modern lock, container, and security system. The focus of this text is to put all of this information into an understandable and useable format. For an online tour visit www.security.org.

**Brothers of the Cloth** George Hand, IV,2021-04-15 Master Sergeant (Ret.) George E. Chik Hand IV, better known as geo to the public. geo served for 10 years with the 1st Special Forces Operational Detachment-Delta, colloquially known as Delta Force. As the U.S. Army's premier counterterrorism, hostage rescue, and direct action Special Missions Unit (SMU), Delta Force has been at the tip of the spear of the American military ever since the Iranian hostage crisis in 1979. To serve there, a man has to climb physical and mental mountains; to remain there, a man has to show remarkable consistency and professionalism. Before his assignment to Delta, geo served in the 7th and 1st Special Forces Groups as a Green Beret.A rare wordsmith, geo is a master of the English language. But, it takes more than that to create a compelling memoir, especially one so heavily focused on others. Indeed, it takes empathy and emotional intellect. By empathizing with his subjects, geo puts you right next to them. You can see them breaching a door; you can smell their sweat after an operation; you can hear the radio chatter and the Little Bird helicopters whooping above; you can sense the joke that's about to crack and send everyone rolling; you can feel the pain of loss and the emptiness that death carves. That's why readers of all ages and walks of life rally around his stories.
