Reading the Forested Landscape Tom Wessels, 1999 Chronicles the forest in New England from the Ice Age to current challenges

An Illustrated Guide to Eastern Woodland Wildflowers and Trees Melanie Choukas-Bradley, 2004 Surely such a familiar landmark and its flora need no introduction. But leaf through the book (or better yet, get Brown and Choukas-Bradley to take you on a tour) and you realize that while the rest of the world has been looking at Sugarloaf through a telescope, this intrepid pair has been using a magnifying glass.... Their record of these trees and wildflowers] has become one of the most complete guides to local upland flora available, and they hope it will be used not just in other natural areas but in back yards where people want to raise native plants themselves.--Washington Post In between a field guide and a botanical manual, Choukas-Bradley and Brown have created a must-have... to tote into the woods of Sugarloaf Mountain. The authors have included every flowering plant they observed during ten years of extensive hiking and exploration on Sugarloaf. This guide would be useful to any naturalist, serious or casual, venturing into the wilds of the Northeastern United States and adjacent Canada.--E-Streams This book contains an easy-to-use, non-technical botanical key for flowering plants--herbaceous and woody alike.... The author describes each plant and its individual parts, all related species, and details on the plant's growth habit, its natural range and habitat, its bloom time, and where it can be found on Sugarloaf Mt.--Solidago: The Newsletter of the Finger Lakes Native Plant Society A thorough yet user-friendly companion to the authors' popular paperback Sugarloaf: The Mountain's History, Geology, and Natural Lore, this volume is an exquisitely illustrated guide to 350 eastern woodland wildflowers and trees found onsite at Sugarloaf Mountain, Maryland. It includes a botanical key and an illustrated glossary of common and scientific names, and is packed with nearly 400 elaborately and artistically detailed pen-and-ink drawings to make plant identification simple and fun. Melanie Choukas-Bradley is the author of City of Trees: The Complete Field Guide to the Trees of Washington, D.C. and a longtime contributor to the Washington Post. She teaches field botany for the USDA Graduate School. Tina Thieme Brown has worked as a landscape artist and environmentalist for twenty-five years. She teaches art at the U.S. Botanic Garden, is an artist on the Countryside Artisans Studio Tour, and creates art inspired by the Sugarloaf Mountain countryside in her 1790s log cabin studio. Choukas-Bradley and Brown lead Sugarloaf Mountain field trips for the Audubon Naturalist Society of the Central Atlantic States and other organizations. Published in

Forest Forensics: A Field Guide to Reading the Forested Landscape Tom Wessels,2010-09-20 Take some of the mystery out of a walk in the woods with this new field guide from the author of *Reading the Forested Landscape*. Thousands of readers have had their experience of being in a forest changed forever by reading Tom Wessels's *Reading the Forested Landscape*. Was this forest once farmland? Was it logged in the past? Was there ever a major catastrophe like a fire or a wind storm that brought trees down? Now Wessels takes that wonderful ability to discern much of the history of the forest from visual clues and boils it all down to a manageable field guide that you can take out to the woods and use to start playing forest detective yourself. Wessels has created a key—a fascinating series of either/or questions—to guide you through the process of analyzing what you see. You'll feel like a woodland Sherlock Holmes. No walk in the woods will ever be the same.

Forest Trees of Australia Douglas J. Boland,2006 The classic Australian guide - now fully revised and updated with nearly 300 of Australia's most important native trees.

Trees and Woodlands George Peterken,2023-02-16 Features almost 300 colour photographs and brings together more than 60 years of research by a leading voice in British woodland ecology. Trees define woodland. They provide a complex, multi-layered habitat for a great range of wildlife, yet they are wildlife themselves, reacting to their circumstances and each other. Woodlands are important to people, supplying timber, food and fuel, accumulating carbon, and offering places of refuge and refreshment. But they are also under threat: some stand in the way of 'progress' and all are becoming increasingly vulnerable to neglect, disease and climate change. *Trees and Woodlands* brings together decades of research to explore the ecology, nature conservation and wider cultural value of our native trees and shrubs, and the various ways they have combined as woodland. Incorporating personal experiences from 60 years as a forest ecologist, Peterken describes the long history of use and management; how this has influenced woodland wildlife and our art, beliefs and social attitudes. He concludes that most woods should be managed, their timber and small wood being put to good use, but recognises that this is all part of a larger question: the future of ourselves. Containing nearly 300 photographs, and interspersed with box texts describing the history and ecology of representative woods across Britain, this is a commentary on trees, woodlands and our relationship with them from one of our most highly regarded forest ecologists.
