*Organic Gardening for Everyone* CaliKim,2019-12-24 If you want to grow healthy vegetables at home, but have hesitated because it seems too hard and time consuming, *Organic Gardening for Everyone* is your perfect hands-on guide—an “if I can do it, you can do it” case study that addresses your concerns and gets you started. Loaded with practical advice and step-by-step guidance, *Organic Gardening for Everyone* takes a very personal and friendly approach to a subject that can be intimidating. It is a first-class primer on organic vegetable gardening, and an inspirational story about how anyone can balance the rigors of gardening with the demands of a modern, family-oriented lifestyle. In 2012, a California mom decided to start an organic vegetable garden. But she went about it in an unusual way: she crowdsourced it by launching a YouTube channel under the name CaliKim and asking for help. And then she started planting. As questions came up, she turned to her viewers and subscribers and they replied with answers and advice. As she learned, her garden grew successfully—even in the hot, harsh California climate. Her expertise also grew, and now she answers many more questions than she asks and has become a very accomplished home gardener. And CaliKim has a great story to tell: growing healthy organic vegetables for your family is not difficult, even for today’s time-challenged lifestyles. She provides complete step-by-step information on growing the most popular edibles organically, and also gives sound advice on how to take on the challenges of balancing a hectic lifestyle with successful growing—and how to involve the whole family in the process. You'll be rewarded for your effort every time you place a plate of natural, organic vegetables on the family dinner table knowing exactly what they are, what is in them, and where they came from.

Site Planning and Design for the Elderly Diane Y. Carstens,1993-02-15 Design for the elderly is at the forefront of architectural topics today. Yet, while much has been written about the design of indoor spaces, little work has been done on planning outdoor spaces to accommodate the needs of the elderly. *Site Planning and Design for the Elderly* specifically addresses this issue, drawing from a large body of original research, current knowledge, and theory to provide the background knowledge and specific information necessary for informed decision making throughout the site planning and design process. More than just a reference on accessibility standards, this volume offers key insights into the needs and concerns of older people in the built environment and presents guidelines and alternatives for responsive site planning and design. Organized in a clear step-by-step format for easy reference, issues and specific guidelines are provided for each stage of the planning and design process within the context of housing for older people. Moreover, architects, landscape architects,

urban designers, developers and students will find the topics covered applicable to other settings where older people are a part of the user profile, such as downtown renewal, hospital, and park planning projects. Numerous illustrations and case studies highlight major points throughout the text. The first sections of this volume provide valuable background information on housing options available to seniors and outline design implications of the social and physiological changes associated with advancing age. Critical design and management issues are discussed, objectives are outlined, and implementation strategies are developed, including methods for promoting wayfinding, enhancing personalization, and maximizing opportunities for social interaction. The body of this volume provides specific guidelines for each stage of development. Site planning areas addressed include site selection, the layout of housing units (including relationships between facilities offering different levels of care), recreational amenities, and circulation systems. Detailed guidelines for the location, spatial configuration, detailing, and amenities of major site components and recreational facilities are also provided. Entryways, parking, patios, rooftop developments, and gardening centers are among the specific areas covered. A brief outline of the major issues affecting use of each site component is particularly useful for making decisions regarding facility provision and for prioritizing development alternatives. Critical detailing and amenity specifications are pinpointed and thoroughly described. Paving materials, signage, lighting, site furniture, and pedestrian street crossings are among those elements examined. A concise overview in tabular form of the major guidelines presented throughout closes this practical volume. It is possible to design a site that will not only enhance the lives of elderly residents, but will be cost-effective and highly marketable as well. *Site Planning and Design for the Elderly* provides practical solutions to the problems of exterior design for one of the fastest-growing segments of the U.S. population today.
