Teyler's Foundation in Haarlem and Its 'Book and Art Room' of 1779 Ellinoor S. Bergvelt, Debora J. Meijers, 2020-12-15 Teyler's Foundation in Haarlem and its 'Book and Art Room' of 1779, edited by Ellinoor Bergvelt and Debora Meijers, examines for the first time this institution in the context of scientific, museological, political, artistic, religious and philosophical developments. The key moment was the decision in 1779 to give a free interpretation to the testament of its founder, the Mennonite entrepreneur Pieter Teyler van der Hulst (1702-1778): stimulated by the naturalist Martinus van Marum, the Foundation's board decided to build an impressive museum room and to establish a natural science collection. The institution thus entered an era in which older scientific and collecting traditions engaged with new developments towards a research institution and a public museum of natural history, physics and art. Contributors: Ellinoor S. Bergvelt, Terry van Druten, Arnold Heumakers, Eric Jorink, Paul Knolle, Debora Meijers, Wijnand Mijnhardt, Bert Sliggers, Koenraad Vos, and Holger Zaunstöck.

Savannah 1779 Scott Martin, Bernard F. Harris Jr., 2017-08-24 In 1778 Great Britain launched a second invasion of the southern colonies as part of the "southern strategy" for victory in the American Revolutionary War. A force of 3,000 British soldiers, Hessians and Loyalists was dispatched from New York City to capture Savannah, capital of the State of Georgia. The city fell in December 1778, and became a base for British operations in the southern colonies. Desperate to regain one of the most important southern cities, Continental troops under General Benjamin Lincoln joined forces with a French naval expedition under the Admiral Charles-Henri d'Estaing in an all-out assault on the British fortified positions protecting

Savannah. This fully illustrated study examines the costly French and Patriot attempts to retake Savannah. Replete with stunning artwork and specially commissioned maps, this is the complete story of one of the bloodiest campaigns of the American Revolutionary War.

Washington's War, 1779 Benjamin L. Huggins, 2018 While attacking the British and their allies at Stony Point, Paulus Hook, and upstate New York, George Washington prepared a bold plan to end the war in New York City Despite great limits of money and manpower, George Washington sought to wage an aggressive war in 1779. He launched the Sullivan-Clinton campaign against Britain's Iroquois allies in upstate New York, and in response to British attacks up the Hudson River and against coastal Connecticut, he authorized raids on British outposts at Stony Point and Paulus Hook. But given power by Congress to plan and execute operations with the French on a continental scale, Washington planned his boldest campaign. When it appeared that the French would bring a fleet and an army to America, and supported by intelligence from his famed Culper spy network, the American commander proposed a joint Franco-American attack on the bastion of British power in North America--New York City--to capture its garrison. Such a blow, he hoped, would end the war in 1779. Based on extensive primary source material, *Washington's War 1779*, by historian Benjamin Lee Huggins, describes Washington's highly detailed plans and extensive preparations for his potentially decisive Franco-American campaign to defeat the British at New York in the fall of 1779. With an emphasis on Washington's generalship in that year--from strategic and operational planning to logistics to diplomacy--and how it had evolved since the early years of the war, the book also details the other offensive operations in 1779, including the attacks in upstate New York, Stony Point, and Paulus Hook. Although the American and French defeat at Savannah, Georgia, prevented Washington from carrying out his New York offensive, Washington gained valuable experience in planning for joint operations that would help him win at Yorktown two years later.

The Mobile Image from Watteau to Boucher David Pullins,2024-08-13 This book provides a new way of thinking about eighteenth-century French art and visual culture by prioritizing production over reception. Abandoning the ideologically driven discourse that distinguished fine from decorative art between the 1690s and 1770s, *The Mobile Image* reveals how the two have been inextricably bound from the earliest stages of artistic instruction through the daily life of painters' workshops. In this study, author David Pullins defines artisanal and artistic means of learning, seeing, and making through a system of "mobile images": motifs that were effectively engineered for mobility and designed never to be definitive, always awaiting replication and circulation. He examines the careers of Antoine Watteau, Jean-Baptiste Oudry, and François Boucher, situating them against a much broader cast of actors—such as printmakers, publishers, anonymous studio assistants, and architects, among others—to place eighteenth-century painting within a wider context of media and making.

Stays and Body Image in London Lynn Sorge-English,2015-10-06 This book fills a significant gap in the literature on eighteenth-century social and cultural history. Starting with their production and trade, Sorge-English looks at the intricacies of the staymaker's craft, the role of gender in the design and manufacture of stays and the changing shape of stays over time.

Thomas Jefferson's Image of New England Arthur Scherr,2016-10-03 Writers often depict Thomas Jefferson as a narrow-minded defender of states' rights and Virginia's interests, despite his authorship of the Declaration of Independence and vigorous defense of the young republic's sovereignty. Some historians claim he was particularly hostile to the New England states, whose Federalist electorate he regarded as enemies of his Democratic-Republican Party. This study of Jefferson's lifelong relationship with New England reveals him to be a consistent nationalist and friend of the region, from his first visit to Boston in 1784 to his recruiting of Massachusetts scholars to teach at the University of Virginia. His nationalist point of view is most evident where some historians claim to see it least: in his opinions of the people and politics of New England. He admired New Englanders' Revolutionary patriotism, especially that of his friend John Adams, and considered their direct democracy and town-meeting traditions a model for the rest of the Union.

Foreign Images and Experiences of Japan William McOmie,2021-10-25 The first in a three-volume series, Volume 1 begins with the earliest written reports from China in the first century AD and ends with a survey of Dutch reports from 1841, which marks the point when 'Japan had been amply described in all major respects', and at a time when it began to be perceived as a less remote and more important country in Western eyes 'yet still emphatically closed to all foreign trade

except that of the Dutch and the Chinese'. Furthermore, in little more than a decade later the number and variety of accounts were to increase greatly following the American, Russian and British expeditions of 1853/54 – accounts which are to form a key element of Volume 2. The Contents are divided into two parts: chronological and thematic. Part I is devoted to a discussion and analysis of the dominant views and images of Japan found in each historical era. It also provides brief biographical data about those European and American travellers to Japan whose reports are quoted in Part II, including some sixty eyewitness accounts, along with concise summaries and commentaries. Compared to previous surveys, a significant aspect of this volume is the greater amount of biographical information regarding the leading European visitors to Japan that is provided, together with a concise analysis and evaluation of their original accounts by both contemporary and more recent critics. As a further innovation, excerpts from the reports of Russian visitors to Japan, including Adam Laxman and V.M.Golvnin are quoted for the first time alongside those of West European and American accounts. The volume is supported by a significant Glossary and Bibliography, as well as Subject and Name/Place Indexes.

The Image of Elizabeth I in Early Modern Spain Eduardo Olid Guerrero, Esther Fernández, 2019-03-01 Queen Elizabeth I was an iconic figure in England during her reign, with many contemporary English portraits and literary works extolling her virtue and political acumen. In Spain, however, her image was markedly different. While few Spanish fictional or historical writings focus primarily on Elizabeth, numerous works either allude to her or incorporate her as a character. *The Image of Elizabeth I in Early Modern Spain* explores the fictionalized, historical, and visual representations of Elizabeth I and their impact on the Spanish collective imagination. Drawing on works by Miguel de Cervantes, Lope de Vega, Pedro de Ribadeneira, Luis de Góngora, Cristóbal de Virués, Antonio Coello, and Calderón de la Barca, among others, the contributors to this volume limn contradictory assessments of Elizabeth's physical appearance, private life, personality, and reign. In doing so they articulate the various and sometimes conflicting ways in which the Tudor monarch became both the primary figure in English propaganda efforts against Spain and a central part of the Spanish political agenda. This edited volume revives and questions the image of Elizabeth I in early modern Spain as a means of exploring how the queen's persona, as mediated by its Spanish reception, has shaped the ways in which we understand Anglo-Spanish relations during a critical era for both kingdoms.

Architecture-Aware Optimization Strategies in Real-time Image Processing Chao Li, Souleymane Balla-Arabe, Fan Yang, 2017-11-29 In the field of image processing, many applications require real-time execution, particularly those in the domains of medicine, robotics and transmission, to name but a few. Recent technological developments have allowed for the integration of more complex algorithms with large data volume into embedded systems, in turn producing a series of new sophisticated electronic architectures at affordable prices. This book performs an in-depth survey on this topic. It is primarily written for those who are familiar with the basics of image processing and want to implement the target processing design

using different electronic platforms for computing acceleration. The authors present techniques and approaches, step by step, through illustrative examples. This book is also suitable for electronics/embedded systems engineers who want to consider image processing applications as sufficient imaging algorithm details are given to facilitate their understanding.

Music Cultures in Sounds, Words and Images. Antonio Baldassarre, Tatjana Marković, 2018-03-19 Music cultures in sounds, words and images, edited by Antonio Baldassarre and Tatjana Markovic, is dedicated to the 60th birthday of the Croatian-American musicologist Zdravko Blažekovic (b. 1956, Zagreb). After his studies of musicology and first working experiences in Zagreb, Blažekovic moved to New York City, where he is since 1996 the executive editor of the RILM - Répertoire International de Littérature Musicale, and since 1998 director of the RCMI - Research Center for Music Iconography as well as editor of one of the leading journals for music iconography, *Music in Art*, in the framework of the Barry S. Brook Center for Music Reserach and Documentation at the Graduate Center of the City University of New York. In view of Blažekovic's very broad multidisciplinary interests, including historical musicology, music iconography, organology, archeology, lexicography and databases, this book contains 38 studies in six languages (English, German, Italian, Serbian, Croatian, Chinese) organized in six chapters: Sounds of nations, Words on musics, Performance of musical cultures, Images on musics, Organology, and Classifying data on music.

Images of the Economy of Nature, 1650-1930 Antonello La Vergata, 2023-10-05 The book discusses ideas concerning the order and balance of nature (or economy of nature) from the late 17th century to the early 20th century. The perspective taken is broad, *longue durée* and interdisciplinary, and reveals the interplay of scientific, philosophical, moral and social ideas. The story begins with natural theology (dating roughly to the onset of the so-called Newtonian Revolution) and ends with the First World War. The cut-off date has been chosen for the following reasons: the war changed the state of things, affecting man's way of looking at, and relating to, nature both directly and indirectly; indeed, it put an end to most applications of Darwinism to society and history, including interpretations of war as a form of the struggle for existence. The author presents an overview of the different images of nature that were involved in these debates, especially in the late 19th century, when a large part of the scientific community paid lip service to 'Darwinism', while practically each expert felt free to interpret it in his own distinct way. The book also touches on the so-called 'social Darwinism', which was neither a real theory, nor a common body of ideas, and its various views of society and nature's economy. Part of this book deals with the persistence of moralizing images of nature in the work of many authors. One of the main features of the book is its wealth of (detailed) quotations. In this way the author gives the reader the opportunity to see the original statements on which the author bases his discussion. The author privileges the analysis of different positions over a historiography offering a merely linear narrative based on general implications of ideas and theories. To revisit the concept of the so-called Darwinian Revolution, we need to examine the various perspectives of scientists and others, their language and, so to speak, the lenses

they used when reading facts and theories. The book ends with some general reflections on Darwin and Darwinisms (the plural is important) as a case study on the relationship between intellectual history, the history of science and contextual history. Written by a historian, this book really gives new, multidisciplinary perspectives on the Darwinian Revolution.

Friars, Nobles and Burghers - Sermons, Images and Prints Jaroslav Miller, László Kontler, 2010-04-10 The essays in this volume reflect the broader interpretation of culture as a system of shared meanings, values, attitudes and symbolic forms in any sphere of human life. Although thematically diverse, all these studies adhere to the concept of what is sometimes termed the new cultural history or socio-cultural history. The work opens with a cluster of methodological and historiographical reflections. Topics covered by the thematic sections include confessional and religious life in early modern Europe, symbolism and representation, strife and accommodation among different denominations compelled to live in a common space, order and hierarchy, cracks in the machinery of authority and the threat of disintegration as well as the history of alphabetization, literacy and reading and writing practices. This book pays tribute to István György Tóth (1956-2005), Head of the Department of Early-Modern History at the Institute of History of the Hungarian Academy of Sciences, and Professor of History at Central European University (both in Budapest), until his premature death in 2005.

La famille dans le Proche-Orient ancien: réalités, symbolismes et images Lionel Marti, 2014-07-08 In July, 2009, the International Association for Assyriology met in Paris, France, for 5 days to deliver and listen to papers on the theme "La famille dans le Proche-Orient." This volume, the proceedings of the conference, contains 53 of the papers read at the 55th annual Rencontre, including primarily papers directly connected with the theme and some on areas of related interest. The papers covered every period of Mesopotamian history, from the third millennium through the end of the first millennium B.C.E. The photo on the back cover shows only a representative portion of the attendees, who were warmly hosted by faculty and students from the Collège de France.

The True Image Daniel W. Patterson, 2012-10-08 A thousand unique gravestones cluster around old Presbyterian churches in the piedmont of the two Carolinas and in central Pennsylvania. Most are the vulnerable legacy of three generations of the Bigham family, Scotch Irish stonecutters whose workshop near Charlotte created the earliest surviving art of British settlers in the region. In *The True Image*, Daniel Patterson documents the craftsmanship of this group and the current appearance of the stones. In two hundred of his photographs, he records these stones for future generations and compares their iconography and inscriptions with those of other early monuments in the United States, Northern Ireland, and Scotland. Combining his reading of the stones with historical records, previous scholarship, and rich oral lore, Patterson throws new light on the complex culture and experience of the Scotch Irish in America. In so doing, he explores the bright

and the dark sides of how they coped with challenges such as backwoods conditions, religious upheavals, war, political conflicts, slavery, and land speculation. He shows that headstones, resting quietly in old graveyards, can reveal fresh insights into the character and history of an influential immigrant group.

The Common Cause Robert G. Parkinson,2016-05-18 When the Revolutionary War began, the odds of a united, continental effort to resist the British seemed nearly impossible. Few on either side of the Atlantic expected thirteen colonies to stick together in a war against their cultural cousins. In this pathbreaking book, Robert Parkinson argues that to unify the patriot side, political and communications leaders linked British tyranny to colonial prejudices, stereotypes, and fears about insurrectionary slaves and violent Indians. Manipulating newspaper networks, Washington, Jefferson, Adams, Franklin, and their fellow agitators broadcast stories of British agents inciting African Americans and Indians to take up arms against the American rebellion. Using rhetoric like “domestic insurrectionists” and “merciless savages,” the founding fathers rallied the people around a common enemy and made racial prejudice a cornerstone of the new Republic. In a fresh reading of the founding moment, Parkinson demonstrates the dual projection of the “common cause.” Patriots through both an ideological appeal to popular rights and a wartime movement against a host of British-recruited slaves and Indians forged a racialized, exclusionary model of American citizenship.
