IBM z/OS Container Extensions (zCX) Use Cases Lydia Parziale, Marco Egli, Maike Havemann, Subhajit Maitra, Eric Marins, Edward McCarthy, IBM Redbooks, 2021-07-12 Is it time for you to modernize your IBM® z/OS® applications to allow for access to an entire system of open source and Linux on IBM Z® workloads? Is co-location of these workloads on the z/OS platform with no porting requirements of value to you? Your open source or Linux on IBM Z software can benefit from being co-located and managed inside a z/OS environment; leveraging z/OS quality of service for optimized business continuity. Your software can be integrated with and can help complement existing z/OS workloads and environments. If your software can communicate with z/OS and external components by using TCP/IP, now is the time to examine how IBM z/OS Container Extensions (IBM zCX) makes it possible to integrate Linux on Z applications with z/OS. This IBM Redbooks® publication is a follow-on to Getting started with z/OS Container Extensions and Docker, SG24-8457, which provides some interesting use cases for zCX. We start with a brief overview of IBM zCX. In Part 1, Integration on page 9, we demonstrate use cases that integrate with zCX. In Part 2, DevOps in zCX on page 165, we describe how organizations can benefit from running a DevOps flow in zCX and we describe the set up of necessary components. Finally, in Part 3, Monitoring and managing zCX systems on page 229, we discuss IBM Service Management Unite Automation, a free-of-charge customizable dashboard interface and an important discussion of creating the suitable container restart policy.

The Evolution of Galaxies and Their Environment David J. Hollenbach,Harley A. Thronson,J. Michael Shull,1993

Exploring the Evidence Linda Clark,2014 Of necessity, historians of the late Middle Ages have to rely on an eclectic mix of sources, ranging from the few remaining medieval buildings, monuments, illuminated manuscripts and miscellaneous artefacts, to a substantial but often uncatalogued body of documentary material, much of it born of the medieval administrator's penchant for record keeping. Exploring this evidence requires skills in lateral thinking and interpretation - qualities which are manifested in this volume. Employing the copious legal records kept by the English Crown, one essay reveals the thinking behind exceptions to pardons sold by successive kings, while another, using clerical taxation returns, adds colour to contemporary criticism of friars for betraying their vows of poverty. Case studies of the registers of two hospitals, one in London the other in Canterbury, lead to insights into the relations of their administrators with civic and spiritual authorities. A textual dissection of the epilogues in William Caxton's early printed works focuses on the universal desire for commemoration. Other essays about royal livery collars and the English coinage are nourished by material remains, and where contemporary records fail to survive, as in the listing of burials in parish churches, notes kept by sixteenth-century heralds and antiquaries provide clues for novel identifications. The book-ends are exemplars of the historian's craft: the one, taking as its starting point the will of Ralph, Lord Cromwell, explores in forensic detail how his executors coped with their enormous task in a time of civil war; the other, by examining research into the economy of fifteenth-century England undertaken since the 1880s, provides an over-view which scholars of the period will find invaluable. Contributors: Martin Allen, Christopher Dyer, David Harry, Susanne Jenks, Maureen Jurkowski, Simon Payling, Euan Roger, Christian Steer, Sheila Sweetinburgh, Matthew Ward.

Reproducing Images and Texts / La reproduction des images et des textes ,2021-12-13 How has reproduction transformed works of art and literature, their dissemination and their reception? And how does it continue to do so? In what ways have our definitions and practices of reproduction changed over the last centuries thanks to new printing, photographic and digital techniques? These questions are timely. From the medieval copy to contemporary digital culture, including the rise of the printing press and engraving techniques in the Renaissance and the Ancien Régime, myriad modes of reproduction informed both our access to texts and images and our ways of reading, seeing, understanding, discovering and questioning the world. Dans quelle mesure la reproduction transforme-t-elle les œuvres, leur diffusion et leur réception ? De quelles manières les conceptions et les usages de la reproduction ont-ils subi des transformations majeures au cours des derniers siècles avec la diffusion des pratiques d'impression, de la photographie et des techniques numériques ? Ces questions sont d'une actualité incontournable. De la copie médiévale à la culture numérique contemporaine, en passant par l'essor de l'imprimerie et les techniques de gravure à la Renaissance et sous l'Ancien Régime, les différents modes de reproduction informent non seulement nos accès aux textes et aux images, mais aussi nos manières de lire, de voir, de comprendre, découvrir et d'interroger le monde.
