The Encyclopedia of Middle East Wars [5 volumes] Spencer C. Tucker, 2010-10-08 This in-depth study of U.S. involvement in the modern Middle East carefully weighs the interplay of domestic, cultural, religious, diplomatic, international, and military events in one of the world's most troubled regions. The monumental, five-volume *The Encyclopedia of Middle East Wars: The United States in the Persian Gulf, Afghanistan, and Iraq Conflicts* is a must-have resource for anyone seeking to comprehend U.S. actions in this volatile region. Under the expert editorship of Spencer C. Tucker, the encyclopedia traces 20th- and 21st-century U.S. involvement in the Middle East and south-central Asia, concentrating on the last three decades. Beginning with the 1980-1988 Iran-Iraq War, it covers the 1979-1989 Soviet occupation of Afghanistan, the 1991 Persian Gulf War, allied punitive actions against Iraq during the 1990s, the Afghanistan War, the Iraq War, and the Global War on Terror. Many smaller military actions against Iran, Iraq, Libya, Afghanistan, and other regimes that have been involved in international terrorism are also included. Diplomacy, religion as it pertains to Middle East conflict, and social/cultural developments are other key subjects of analysis, as is the interplay of politics with military policy in the United States and other nations involved in the region.

Julia Margaret Cameron Julian Cox, Colin Ford, 2003-03-20 According to one of Julia Margaret Cameron's great-nieces, "we never knew what Aunt Julia was going to do next, nor did anyone else." This is an accurate summation of the life of the British photographer (1815-1879), who took up the camera at age forty-eight and made more than twelve hundred images during a fourteen-year career. Living at the height of the Victorian era, Cameron was anything but conventional,

experimenting with the relatively new medium of photography, promoting her own art through exhibition and sale, and pursuing the eminent personalities of her age—Alfred Tennyson, Charles Darwin, Thomas Carlyle, and others—as subjects for her lens. For the first time, all known images by Cameron, one of the most important nineteenth-century artists in any medium, are gathered together in a catalogue raisonné. In addition to a complete catalogue of Cameron's photographs, there is information on her life and times, initial experiments, artistic aspirations, techniques, small-format images, albums, commercial strategies, sitters, and sources of inspiration. Also provided are a selected bibliography of publications on Cameron, a list of exhibitions of her work held both in her time as well as our own, and a summary of important collections where her pictures can be found.

Accurate Visual Metrology from Single and Multiple Uncalibrated Images Antonio Criminisi, 2012-09-10 Accurate Visual Metrology from Single and Multiple Uncalibrated Images presents novel techniques for constructing three-dimensional models from bi-dimensional images using virtual reality tools. Antonio Criminisi develops the mathematical theory of computing world measurements from single images, and builds up a hierarchy of novel, flexible techniques to make measurements and reconstruct three-dimensional scenes from uncalibrated images, paying particular attention to the accuracy of the reconstruction. This book includes examples of interesting viable applications (eg. Forensic Science, History of Art, Virtual Reality, Architectural and indoor measurements), presented in a simple way, accompanied by pictures, diagrams and plenty of worked examples to help the reader understand and implement the algorithms.

Religions of the World [6 volumes] J. Gordon Melton, Martin Baumann, 2010-09-21 This masterful six-volume encyclopedia provides comprehensive, global coverage of religion, emphasizing larger religious communities without neglecting the world's smaller religious outposts. Religions of the World, Second Edition: A Comprehensive Encyclopedia of Beliefs and Practices is an extraordinary work, bringing together the scholarship of some 225 experts from around the globe. The encyclopedia's six volumes offer entries on every country of the world, with particular emphasis on the larger nations, as well as Indonesia and the Latin American countries that are traditionally given little attention in English-language reference works. Entries include profiles on religion in the world's smallest countries (the Vatican and San Marino), profiles on religion in recently established or disputed countries (Kosovo and Nagorno-Karabakh), as well as profiles on religion in some of the world's most remote places (Antarctica and Easter Island). Religions of the World is unique in that it is based in religion on the ground, tracing the development of each of the 16 major world religious traditions through its institutional expressions in the modern world, its major geographical sites, and its major celebrations. Unlike other works, the encyclopedia also covers the world of religious unbelief as expressed in atheism, humanism, and other traditions.

The Illuminated World Chronicle Nina Rowe,2020-11-24 A look into an enchanting, underexplored genre of illustrated manuscripts that reveals new insights into urban life in the Middle Ages In this innovative study, Nina Rowe examines a curious genre of illustrated book that gained popularity among the newly emergent middle class of late medieval cities. These illuminated World Chronicles, produced in the Bavarian and Austrian regions from around 1330 to 1430, were the popular histories of their day, telling tales from the Bible, ancient mythology, and the lives of emperors in animated, vernacular verse, enhanced by dynamic images. Rowe's appraisal of these understudied books presents a rich world of storytelling modes, offering unprecedented insight into the non-noble social strata in a transformative epoch. Through a multidisciplinary approach, Rowe also shows how illuminated World Chronicles challenge the commonly held view of the Middle Ages as socially stagnant and homogeneously pious. Beautifully illustrated and backed by abundant and accessible analyses of social, economic, and political conditions, this book highlights the engaging character of secular literature during the late medieval era and the relationship of illustrated books to a socially diverse and vibrant urban sphere.
