Visual proficiency - A perspective on art education Kunibert Bering, Rolf Niehoff, 2015-12-18 Every day, over a million images are uploaded to flickr. This is a striking example of the so-called »flood« of images that emerged with the beginning of the digital age. A generation of adolescents has already been socialised with this flood of images and deals with it on a daily basis, both in their networks and elsewhere. Art education thus faces significant challenges: art is the only school subject that deals with the problems inherent in images as images, making them the focus of pedagogic activity. This volume presents both the foundations for engaging with the phenomenon of the »image« in a competent and historically informed manner as well as the perspectives for art education that arise from these foundations. It is based upon the conviction that providing orientation in a world defined by images does not mean following solely a technocratic, functionalist or even neoliberal »concept of education«. Quite the contrary: »providing an orientation« for how to deal with images in a world that is dominated by them is a crucial part of the holistic development of young people's personalities. The volume's main focus lies upon the new functions taken on both by the image and by art more generally. It takes into account aspects of globalisation and participation and also includes more unusual views (often from a cross-media perspective) of art and its historical repertory, which even current image creation is unable to dispense with. The volume also deals extensively with architecture and the images it conveys.

**Tales Written by the Dying in Awe** Vysheslav Filevsky, 2022-05-15 This book is by a Russian-speaking Brazilian author and contains short stories and fairy tales for adults. They are about the grace of love and awe of the Great Inconceivable and its creation. They are also about the way that consciously fostering these two ideas could create a universal world religion of consensual reconciliation. But who on earth earnestly wants that?

*The Breakaways* Cathy G. Johnson, 2019-03-05 Quiet, sensitive Faith starts middle school already worrying about how she will fit in. To her surprise, Amanda, a popular eighth grader, convinces her to join the school soccer team, the Bloodhounds. Having never played soccer in her life, Faith ends up on the C team, a ragtag group that's way better at drama than at teamwork. Although they are awful at soccer, Faith and her teammates soon form a bond both on and off the soccer field that challenges their notions of loyalty, identity, friendship, and unity. *The Breakaways* from Cathy G. Johnson is a raw, and beautifully honest graphic novel that looks into the lives of a diverse and defiantly independent group of kids learning to

make room for themselves in the world.

**Perilous Desert** Frederic Wehrey,Anouar Boukhars,2013-04-02 The geopolitical significance of the Sahara is becoming painfully clear. Islamist militant groups and transnational criminal networks are operating in the region's most fragile states, exploiting widespread corruption, weak government capacity, crushing poverty, and entrenched social and ethnic tensions. The unrest spills over borders and aggravates protracted regional crises. This insecurity raises urgent concerns for the broader Sahara and the West. *Perilous Desert* details the sources of instability and what can be done to minimize the threat of simmering conflicts. Leading experts, through comprehensive accounts of the changing landscape, demonstrate how foreign assistance that relies exclusively on counterterrorism will only exacerbate the problems. Solutions require understanding and combatting the roots of the Sahara's many challenges.

**A Quantum City** Ludger Hovestadt,Vera Bühlmann,2015-06-16 We know the specific strengths of various cities, are aware of their ranking, are able to discuss their density and growth. But what do all cities have in common, what do we know about the “lowest common denominator”? The “city as a species”, the “primal genetic material of the city”: this is the subject of A Quantum City. This colossal work is a love letter to the city and intellectual culture. We follow the fictional narrative figure, Orlando, beginning in 320 BC, on his odyssey through the Western world up to the present time. The book is divided into four interrelated chapters and can be read page by page in a discursive manner, however randomly browsing through the book also offers new and multi-faceted interpretations. Great intellectual achievements are compared with obscure and mundane events. A Quantum City offers an inspiring view of the city that is in us and around us.

*Corruption in the Energy Sector: The Dangers of BCEF (Bribery, Crime, Exploitation, Fraud)* Marc-Joel Fortelny,2014 The objective of this study is to depict the energy environment regarding the various sources of energy, the correlation of energy mixes, various trends of transition and mainly corruption of these preceding aspects. An insight of successful and failing counter-measures is also provided.The term corruption in an economic environment is defined as fraud, bribery, immorality

and misuse of power, however the actual scope is greater, as the interdependencies of nations, economies and their corresponding interactions create disruptions and discrepancies – especially when lobbying is exploited. Misinformation and the corruption of data are the most difficult research topics, as science should not be misused in forcing an opinion with falsifying facts for instance and must not lead to technical provable contradictions. The approach to fight corruption is most likely to be efficient and successful if performed supranational on all public sectors - with adaptations to the energy sector - by all means with high collaborative efforts.

**Oath of Loyalty** Vince Flynn, Kyle Mills, 2022-09-13 Named the Best Thriller of 2022 by The Real Book Spy Mitch Rapp confronts a very different kind of killer in this explosive “and entertaining from the first page to the last” (The Providence Journal) addition to Vince Flynn’s #1 New York Times bestselling series, written by Kyle Mills. With President Anthony Cook convinced that Mitch Rapp poses a mortal threat to him, CIA Director Irene Kennedy is forced to construct a truce between the two men. The terms are simple: Rapp agrees to leave the country and stay in plain sight for as long as Cook controls the White House. In exchange, the administration agrees not to make any moves against him. This fragile détente holds until Cook’s power-hungry security adviser convinces him that Rapp has no intention of honoring their agreement. To put him on the defensive, they leak the identity of his partner, Claudia Gould. As Rapp races to neutralize the enemies organizing against her, he discovers that a new type of assassin is on her trail. Known only as Legion, the shadowy killer has created a business model based on double-blind secrecy. Neither the assassin nor the client knows the other’s identity. Because of this, Legion can’t be called off nor can they afford to fail. No matter how long it takes—weeks, months, years—they won’t stand down until their target is dead. Faced with the seemingly impossible task of finding and stopping Legion, Rapp and his people must close ranks against a world that has turned on them in this white-knuckled thriller filled with “plenty of action and political intrigue” (Booklist).

**Domesticating Symbols** Ludger Hovestadt,Vera Bühlmann,2014-09-23 domesticating symbols looks at the entropic dissolution of symbolic structures we are experiencing today and explores various approaches towards learning to create code. Photovoltaics and its capacity to capture energy by coding instead of exploitation of resources, and of integrating in additional or surplus quantities of energy into the ecosphere of the planet's natural balance is the central focus of this publication. Energythereby also encompasses the genuinely abstract format of electricity, which makes it possible to convert any form of energy into any other form. This is the second volume of the Applied Virtuality book series based on the Metalithicum Conferences by the Laboratory of Applied Virtuality at the Chair for Computer Aided Architectural Design, Swiss Federal Institute of Technology (ETH) Zurich.

Climate Change Baffles Brains L. Rowand Archer,2019-09-04 We have now sunk to a depth where the restatement of the

obvious is the duty of intelligent men. George Orwell's words are worth repeating as climate-warming alarmists promote doomsday scenarios that have no basis in science. L. Rowand Archer examines the lie of global warming—and the motivations for it—in this treatise that exposes the socialist agenda and fear mongering of the liberal left. Lost in the propaganda is the fact that man-made CO2 emissions have greened Earth, transforming some former desert regions into verdant oases of greenery, and contributing to record crop yields. Instead of demonizing CO2, we should be praising CO2 for helping to feed the world. Because weather is familiar to all, it seems that everyone has a theory about what causes climate change, and that makes it difficult to argue rationally about the real science behind climate change. This book is intended to provide a nontechnical understanding of climate skepticism as argued by over 300 knowledgeable authors in their fields who question the notion that humankind is the major influence of climate change. Get real answers to what is really happening in *Climate Change Baffles Brains*.

Who Made American Schools Marxist Training Centers? Diana L. Anderson, Gary L. Clark, 2022-10-27 Nine Philosopher kings were commissioned to under gird the articles of Marxist faith while expunging dogma and religious doctrine. Their seeds of a pre-ordained organic philosophy were planted to upbring young sprouts to destroy the America republic and rebuild from that rubble the next Marxist country. The unrelenting pressures to indoctrinate children with the Marxist family of totalitarian ideologies that promises to 'free the child' comes to communities under various guises. The allure of promises made in the name of fairness, equity, tolerance and more recent of social justice has drawn a large percentage of millennials to socialism. Behind the race baited mantras, metro regional government is working for the eventual transformation of schools as learning centers staffed with soviet councils to transform neighborhoods into self-sustaining eco-villages. Children will be socialized as activists for their community to install Fascist green agendas, paired with Marxist social justice.

*SHEAVES* Ludger Hovestadt, Vera Bühlmann, 2013-10-09 "SHEAVES" will not describe anything. It will not judge. It will inspire. There are no continuous texts, but a wide range of topics. How to read this book? Take the notions seriously. Search the Internet and they will lose their generalness. They will begin to speak to you vividly. Bundle these riches with the riches of other notions and they will activate each other. Also take the pictures seriously. Photograph or scan them. Use them as an index, while searching the Internet. Again, you will find rich stories. Bundle those riches, concentrate them into new identities that are interesting to you. Let yourself be inspired by the intellectual wealth of our world. You can expand it. It is an exciting adventure, demanding and optimistic.
