The Sticking Point Solution Jay Abraham, 2010-06 Businesses can plateau, stall, OR stagnate without the owners or key executives even realizing it. **The Disappearing Spoon** Sam Kean, 2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. The Disappearing Spoon masterfully fuses science with the classic lore of invention, investigation, and discovery -- from the Big Bang through the end of time. Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

*At Home* Brian Paquette, 2021-04-06 Evoking memories of the past and aspirations for the future to create unique contemporary interiors. Interior design should not be sterile or static; it's a living extension of art meant to be touched, used, and admired. This mindset is the heart of Brian Paquette's interiors. Beginning with the motto, "Function and comfort, first and always," Paquette explores each client's interests and lifestyle to create homes that reflect their identity, history, and aspirations. Integrating the placement of furniture, exposure to light, surface texture, and art, a client's memories are translated into an evocative presence in the home, anchoring them to their past while providing a space of comfort and function for their future. *At Home* provides inspiration to replicate these methods in your own home regardless of style or budget. How does a person keep their memories alive in a home? Through fabric? A particular scent? Surface texture? Light exposure? Considering these elements and others, this is how Brian Paquette builds a room. By sharing each unique process of design for the ten homes featured in his book, readers can begin to consider their own memories and aspirations for how they too can create a home interior that is a true reflection of themselves.

**Design Is The Problem** Nathan Shedroff,2009-02-01 Design makes a tremendous impact on the produced world in terms of usability, resources, understanding, and priorities. What we produce, how we serve customers and other stakeholders, and even how we understand how the world works is all affected by the design of models and solutions. Designers have an unprecedented opportunity to use their skills to make meaningful, sustainable change in the world—if they know how to focus their skills, time, and agendas. In *Design is the Problem: The Future of Design Must be Sustainable*, Nathan Shedroff examines how the endemic culture of design often creates unsustainable solutions, and shows how designers can bake sustainability into their design processes in order to produce more sustainable solutions.
